# INTRODUCTION

It's a 3¾-inch world, and its inhabitants have played a key role in making *Star Wars* part of worldwide popular culture. It took a combination of luck, pluck, and smart business decisions to make mass-produced tiny plastic movie heroes and villains so iconic, but the secret ingredients are something that not even the savviest marketing genius can produce: fun and passion.

*Star Wars* was the right film at the right time for many reasons. It helped popularize and expand a small but growing trend in the 1970s of collecting modern toys. Until then, toy collectibles usually meant old dolls, trains, large cast-iron cars, and maybe some Disney items from the 1930s. Collectors were largely well-off adults who had the time and inclination to seek out specialized dealers and shows around the world.

That started changing with kids collecting inexpensive and plentiful baseball cards and comics. But it was *Star Wars* that jump-started the idea of collecting modern toys. A key part of that was wave after wave of *Star Wars* action figure releases that got kids and their parents to return to stores looking for the next characters—and maybe picking up a vehicle or playset to use with the figures. With home video still half a decade away, *Star Wars* toys became a way for children to bring home a piece of the fantasy and experience it over and over in their imaginations.

Yet the whole thing almost never happened. With a few exceptions such as Mickey Mouse, the licensing business was still in its infancy. There had almost never been a truly successful licensing program for a movie. Executives of Lucasfilm Ltd. and Twentieth Century Fox kept knocking on doors and had some moderate success with an advance novelization of the movie from Ballantine Books and a comic adaptation from Marvel, but both were aimed at marketing the film rather than making money. The major toy companies had no interest.

But in Cincinnati, Ohio, an advance look at some *Star Wars* material grabbed the attention of a group of science fiction and fantasy-loving toy designers who worked for midlevel player Kenner Products, then a part of the Fun Group of cereal giant General Mills. The late Bernie Loomis, Kenner president at the time, told me in an interview years ago that he had been intrigued by the movie's title after reading a brief story about it in an entertainment trade newspaper, and wanted to find out more. "Fox came back with the script and a few photos and it looked like an interesting group of characters and vehicles that we could do something with."

To Loomis, *Star Wars* had a "toyetic" feel. Still, "nobody could've predicted how big the movie would become," he said. "In fact, I assumed the film would come and go quickly—movies never lasted more than a couple of months—and that we'd do the toys the following year without any movie there to help us. Frankly, *Star Wars* just [didn't seem] that big a deal for us."

The key decision turned out to be the unusually small size of the figures. Hasbro had coined the term "action figure" in the 1960s for its 12-inch G.I. Joe "dolls," and its competitor MEGO later set the standard for 8-inch superhero and *Star Trek* figures with cloth costumes. But Kenner realized that if it wanted to take advantage of the rich assortment of vehicles and environments that populated George Lucas's space fantasy, the figures had to be small enough to use with affordable, compact accessories. So Kenner went with the little-used 3¾-inch format.

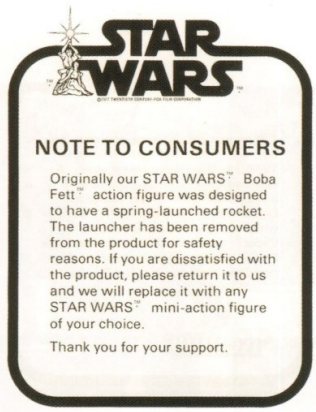

Once *Star Wars* opened on May 25, 1977, there was no containing public demand. Kids wanted to bring *Star Wars* home to reenact the big-screen adventure or create new ones of their own. There was a problem, however. The normal toy-industry cycle for three-dimensional molded toys was twelve to eighteen months, and Kenner signed its *Star Wars* contract just a month before the film premiered.

Knowing that the first figures wouldn't be ready until early 1978, Loomis ignored advice and shipped 600,000 "empty boxes" for the holiday shopping season—sealed cardboard portfolios that included mail-away forms guaranteeing that you'd be among the first to receive a package of four *Star Wars* figures. The "Early Bird Certificate Package" was harshly criticized in the media, and a high percentage went unsold, but Loomis was happy because he kept the soon-to-ship figures in the spotlight.

Meanwhile, the designers were working under impossible deadlines and often with insufficient reference material or resources. Compromises and mistakes were inevitable. At best, the figures had five joints, or points of articulation: heads turned,

From Top:

arms swung from the shoulders, and legs bent forward from the waist or hips. So how could a Stormtrooper sit astride a dewback, the green desert lizard, when the figure's knees didn't bend and its legs weren't flexible? One possibility: a trapdoor on the top of the creature so that the trooper would be seen only from the waist up. "It was bizarre, it was hokey, but it looked okay, so Lucasfilm said yes," recalled then-design team head Dave Okada.

Loomis pushed hard for lightsabers held by Luke Skywalker, Obi-Wan Kenobi, and Darth Vader to appear "magically" in their hands. The team tried lots of concepts, including a crank in the figure's back that would spin out and retract a sturdy monofilament; that would have been fine if lightsaber blades were curved. Because Luke was the first of the three characters to ship as part of the Early Bird promotion, the team went with a piece of plastic with a tab that slid down a slot in the back of the figure's right arm, with an even thinner piece that could be pulled out from that. But there were multiple production and assembly issues with the "double telescoping" saber, so it was quickly abandoned for a one-piece slider with a short, thin tip. (There are a handful of super-rare advance samples of carded double-telescoping versions of all three figures.)

After more shrinkage than expected from the preproduction sculpt, Han Solo emerged from Asian plants with a pinhead in proportion to the rest of his body. So while the factories were still turning the figures out, Kenner made a quick "running change" for a large-head Han, which is why two versions exist.

The small Jawa wearing a vinyl cape was half the size of the other figures and didn't go over well, so another running change put Jawas into more movie-like cloth capes. While an excellent-condition, sealed, 12-back cloth cape Jawa might sell today for as much as $300, a vinyl caped version could bring ten times that.

Because of insufficient reference material, a background cantina alien made as a Sears playset exclusive for the winter of 1978—Snaggletooth—was produced as a tall blue-suited figure with beige gloves and silver boots. When the corrected carded version was released later, he was short, dressed in red, and had hairy feet.

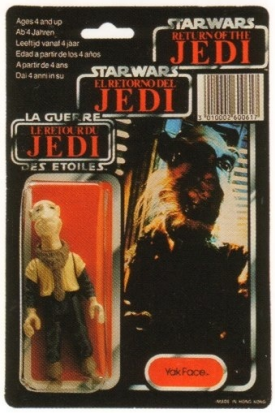

The most notable change to any early toy by far came before it was even produced. Boba Fett, the dramatic-looking bounty hunter from *The Empire Strikes Back*, was introduced on the *Star Wars Holiday Special* in November 1978, and was used for a major marketing push as a mail-away promotional offer. Fett was widely touted as having a spring-loaded, missile-firing backpack, but because of product-safety issues that surfaced with projectile-firing toys from another company, the small missiles had to be sonically welded into the backpacks. Some still claim that they were among the few who received missile-firing versions, but none were ever shipped. There are, however, a handful of painted and unpainted missile-firing prototypes that "escaped" from Kenner to become holy grails for collectors.

When the first twelve carded figures started shipping in the spring of 1978, selling for as little as $1.97 each, it was difficult to keep up with demand. By the time the last of what we now call "vintage" Kenner figures worked their way through stores worldwide in 1985, about a quarter of a billion of them had been sold. Then, with no new *Star Wars* movies on the way and Lucasfilm deciding to rest the brand for a while, the curtain came down.

It took a decade for *Star Wars* action figures to return. With Episode I on the horizon, Kenner, which had become part of Hasbro in 1991, started releasing new figures of the original characters, still with only five points of articulation, but now with muscle-bound He-Man and superhero-like bodies. Executives were convinced that kids demanded the buff look. They hadn't reckoned on the disapproval of an entirely new market: The kids who had grown up with the original figures now considered themselves collectors. These older fans wanted styling as close to screen-accurate as possible. It was the dawn of widespread and easy Internet usage and a brand-new phenomenon: fan sites and instant fan feedback. It took a couple of years, but Hasbro finally paid attention and banished the bulk.

The main heroes and villains will always need to be part of the line, but how does Hasbro keep them fresh while also adding new characters? To help refresh the line, the design and marketing teams continue to re-watch the movies. There's one scene in *The Empire Strikes Back*, for example, where Han Solo is in his familiar parka, but it's open and the hood is down—time for another figure. Then there are secondary characters whom fans vote on. One Internet poster insisted that a background humanoid on Cloud City was carrying something that looked like an ice cream maker. That

From Top:

went viral and eventually gave birth to Willrow Hood, aka Ice Cream Man. There are even homages to past mistakes. In the vintage line, Hasbro switched the names of two bounty hunters, the droid 4-LOM and the alien Zuckuss, for their first release. This was corrected in the 1990s, but then, as a special thirtieth anniversary *Empire* homage, the company released a special two-pack with the figures misnamed again, this time deliberately.

Advances in technology have also led to totally new takes on figures and what they can do. A Han Solo was produced that could cross his legs and stretch his arm back to the wall, just like his casual pose in the cantina scene before he shoots Greedo. Admiral Motti was given an articulated elbow so he could hold his hand to his throat, mimicking when he was being Force-choked by Lord Vader. And by switching the type of plastic used, Hasbro was able to create figures like an amazing C-3PO with thin removable plating that exposed his "electronic" interior.

Kenner had first proposed non-movie characters in the mid-1980s, but it wasn't until the line's rebirth in the 1990s that Hasbro started doing figures based on characters in video games, fiction, and especially comics. Comic two-packs based on classic Marvel and modern Dark Horse comic characters became popular, and even let Hasbro do such unlikely characters as an all-white Vader and a Luke who has turned to the dark side.

So just how many different action figures are there? One answer: a lot! But it really depends on your guidelines, what you mean by a variation, and how willing you are to make exceptions. The original vintage line is a bit easier. After all, the last Kenner card in the United States says, "Collect All 92!" But there was a ninety-third figure, Yak Face, which was never directly released in the United States. Then there are the twelve figures from the *Droids* animated TV series and six from the *Ewoks* series. Add in the boxed Max Rebo band (three figures) and perhaps Jabba the Hutt, as we have, since he was a major character, and . . . oops, what about Salacious Crumb, the vinyl- or cloth-cape Jawas, small- or large-head Han Solos, Bespin Leia with a flesh-colored neck or a turtleneck . . . and you can see where the problems lie.

This book focuses on characters, and thus the figures themselves. We've placed the characters in alphabetical order, by the first letter of their name, and arranged all the figures of the same character chronologically so that you can see how the art of sculpting and producing figures has changed dramatically over the life of the *Star Wars* line—and how many "different" versions of Tatooine Luke could be released. The figures have gone from five or less points of articulation to fourteen or more. One medical droid, FX-7, has eighteen separate arms, each with two joints! Instead of having to guess who some of the characters are, the miniature sculpts have become much more exacting. The development and widespread use of "pad printing," which can transfer a 2D image onto a 3D surface, has added a new spectrum of color and detail to the action figures.

That's not to say that some collectors, members of the original *Star Wars* generation, don't still prefer the nostalgia and simplicity of the original figures, but it's hard to ignore the fact that many of today's action figures are a wondrous mix of art and technology. For the casual or beginning collector and the lover of nostalgia, or for the hard-core collector who wants to track down every figure, this book is a great way to tour the still-expanding universe of more than 2,300 separate figures.

Top:
A beefy Luke figure from 1995

Unproduced *Ewoks* and *Droids* figures

If you're the kind of collector who values every card variation that figures have been packed on, if it's important to find a clone trooper whose chest plate is accidentally missing one of four color dots, or if you want to know which figures had short lightsabers packed in long-slotted trays (a passing obsession of the mid-90s), then there are plenty of resources out there to help you.

We've tried to be as inclusive as possible in our selections, at least mentioning major variations if not picturing every single one. While we've excluded figures that have just been repackaged with no changes—and in recent years there have been several hundred of those—we've included figures that have small but noticeable paint variations. If a figure appeared first without a certain item of clothing, like a cloak, we've counted the newer cloaked version as a separate figure—but not if the cloaked figure came first and was followed by one that simply eliminated the covering. We've included distinct figures that were packed with vehicles, creatures, playsets, and action figure carrying cases. We have excluded non-sentient creatures but included the ubiquitous army of mechanicals. We've even included a few figures that have no moveable parts at all. You may argue with some of our choices—but that's part of the fun of collecting. You get to make your own rules!

## How to Use This Book

Figures in this book are idenitified in several ways:

**Character Name (Packed with, or Grouping)**
YEAR FIRST RELEASED, SOURCE MATERIAL, PRODUCT LINE
Details about the figure and/or character.

The characters are organized alphabetically by the first letter of their names, ranks, or titles, and then by chronological order of release. So, for example, Grand Moff Tarkin appears under G, and not W for Wilhuff (you knew that's what his friends called him, right?). General Grievous and the many Imperial and Rebel officers are likewise alphabetized by rank. Many aliens started their *Star Wars* careers with no names, only on-set nicknames—like Hammerhead, an alien from the Mos Eisley cantina first released in 1979. He was later given the name Momaw Nadon, but in this book we're sticking with Hammerhead for the sake of simplicity (and maybe a little nostalgia, too).

As with any rule, there are a few exceptions. While Princess Leia is under P, in deference to her title and the original figure name, Palpatine has so many different (even overlapping) titles throughout his story arc—Emperor, Senator, Chancellor, Darth Sidious—that we're classifying all those figures under Palpatine. The same goes for Queen and later Senator Padmé Amidala, who is also under P. We've separated Anakin Skywalker and Darth Vader, however, because there is a clear break between the characters and the action figure designs.

The clones have their own section, both to keep them from taking over the book and to show the endless minute variations on their armor. Within the section, they are alphabetized by character name, and, within each character, ordered by release date.

*"That which you seek, inside you will find."*

**2-1B (Medic Droid)**

In its second version, 2-1B looks more metallic. The legs have been redesigned to give the medic more of a mechanical droid look.

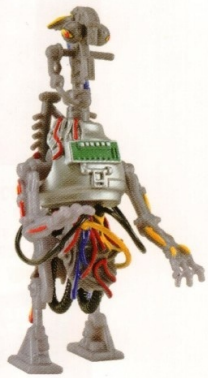

**2-1B (Surgical Droid)**
2008, REVENGE OF THE SITH/TAC

This all-new sculpt of the surgical droid is the most accurate yet. This type of droid operates on Anakin Skywalker and, years later, his son, Luke.

**2X-7KPR Security Droid (with Jawa)**

The small perimeter droid, scavenged by Jawas, is part of the lineup at the Lars moisture farm.

**3T-RNE (Star Tours Travel Agency)**
2005, STAR TOURS/OTC STAR TOURS

This apparently obsolete droid has a potbelly. If it were human, one might call it a bit slovenly.

**4-LOM (Zuckuss)**

1982 | THE EMPIRE STRIKES BACK/TESB 47-BACK

Because of some still-mysterious error, this bounty hunter's name was transposed with another, Zuckuss, on the packaging, and the two toys were known that way for years. It took role-playing game maker West End Games to notice that droids—not aliens—used a number-letter naming system. Lucasfilm made the change. Twenty-plus years later Hasbro offered a special release with 4-LOM and Zuckuss in the "wrong" packaging.

## 4-LOM

1997 | THE EMPIRE STRIKES BACK/

Finally with its correct name, the bounty hunter droid looks very close to the movie version, especially with all the rust markings. Wags at Industrial Light & Magic say 4-LOM's home stands for "for love of money."

A repaint of a nine-year-old figure, this 4-LOM has a different rust pattern and a notable red swoosh high on the left chest.

**4-LOM (Bounty Hunter)**

This all-new sculpt of the droid bounty hunter has far less rust deco than previously, but keeps the 2006 red swoosh.

This spy droid from *The Clone Wars* has the repainted body of a 2008 C-3PO and a newly sculpted head.

This A-wing pilot was the first exclusive figure to be packed with a mainline vehicle.

**A-Wing Pilot (with A-Wing Fighter)**
2003, RETURN OF THE JEDI/SWS VEHICLE

A totally new sculpt of the A-wing pilot, this is the first time the figure comes with a removable helmet.

**Aayla Secura (Jedi Knight)**

2003 | ATTACK OF THE CLONES/SWS

Aayla Secura has nine points of articulation, so she can do balletic battle kicks with one leg anchored. The character is based on a *Star Wars* comic character from ace artist Jan Duursema, with a cover by Jon Foster. George Lucas saw the comic and decided the character would be a great background Jedi for the Battle of Geonosis in Episode II. Keeping things close to home, an ILM production assistant was cast in the role. Aayla's role in the Expanded Universe kept growing, and the character was given a poignant death scene in Episode III. Aayla has a presence in *The Clone Wars* animated series. The figure's lightsaber hilt is "Force attracted" (via a magnet) to her left hand.

Hett was a human who lived among Sand-people. A Jedi like his father, he fell to the dark side and became Darth Krayt.

**Aayla Secura (Jedi Knight)**
2005, REVENGE OF THE SITH/ROTS

With fourteen points of articulation, Aayla is one lean, mean fighting machine. A slightly dirtier version was released in 2007 in two different battle packs.

**Aayla Secura (Jedi Hologram)**
2005, REVENGE OF THE SITH/ROTS

The translucent holographic Aayla is based on the previous carded version and has multiple points of articulation.

This new animated Aayla comes with a flight kit that includes goggles, breath mask, armored harness, and jet backpack.

**Aayla Secura**
2012, ATTACK OF THE CLONES/TVC

This new sculpt of Aayla, with many points of articulation, is the most accurate yet. Attention is paid to details like clothing texture.

**Adi Gallia**

1999 | THE PHANTOM MENACE/EPISODE I

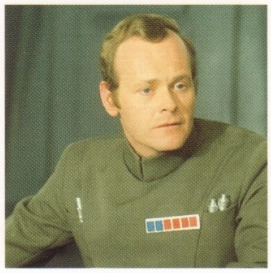

Adi Gallia was a member of the Jedi Council. Like all the Episode I figures, she comes with a CommTech chip that has lines from the movie (or new lines for some characters if they didn't say enough). But the voices aren't those of the actors, the sound quality is poor, and a separate player had to be purchased. Hasbro planned to make the chips part of the figures but could never get them small enough. And, yes, that's a red lightsaber blade.

**Achk Med-Beq (Outlander Club)**

The character's name comes from the actor who played him, Ahmed Best, who was also Jar Jar Binks.

**Admiral Ackbar**
1997, RETURN OF THE JEDI/POTF2 GREEN

This figure of Admiral Ackbar (long forgiven his moment of timidity—or rationality—in *Jedi*) shows the qualitative leap in reproducing movie characters in miniature.

**Admiral Ackbar**

1983 | RETURN OF THE JEDI/ROTJ 65-BACK

One of the first characters to be revealed for what was then called *Revenge of the Jedi*, the figure of this Mon Calamari Rebel commander was first available as a 1982 mail-away offer. For six proofs of purchase, kids could wait about eight weeks until a small white box arrived with the figure, a mini toy catalog, and a small sheet with some details about Ackbar.

**Admiral Ackbar**
2010, RETURN OF THE JEDI/TVC

One of the most-requested updates, this version of Ackbar has added articulation points, a smooth deco, and screen-accurate accessories.

**Admiral Motti**
2000, STAR WARS/POTF2 COMMTECH

Motti has such supreme confidence that he talks back to Vader—who almost kills the admiral with a Force choke. Motti's left arm bends so he can grasp his throat.

**Admiral Motti (Death Star Briefing)**
2007, STAR WARS/TSC SCENE PACK

A repaint of the 2000 Motti figure, this one is part of a seven-pack that re-creates the briefing aboard the Death Star.

**Admiral Ozzel (Executor Assault)**
2004, THE EMPIRE STRIKES BACK/SWS

Ozzel spoils the Empire's surprise attack on the Rebels on Hoth, for which he pays the supreme price at the hands of Vader.

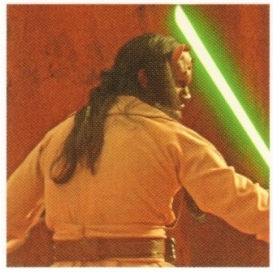

**Agen Kolar (Jedi Master)**
2005 | REVENGE OF THE SITH/ROTS

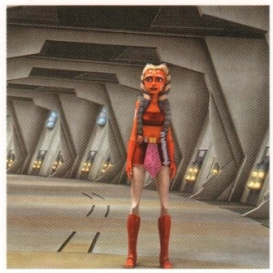

With twelve points of articulation, a cloth skirt, and a lightsaber with a detachable blade, this Jedi is ready to rumble. However, both his arms detach below the elbow—a harbinger of what lies ahead. The first figure released as Agen Kolar was just a repack of fellow Zabrak Jedi Eeth Koth.

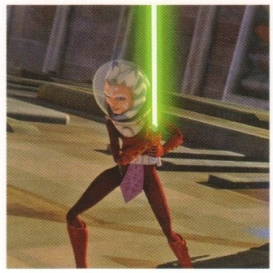

**Agen Kolar**

2011 | THE CLONE WARS/TCW BLUE SKIES

Ahsoka has grown up by *The Clone Wars* third season, and this figure shows her new look. Ahsoka plays an important role in the animated series, both as a foil for Anakin Skywalker as well as his friend and observer. She can be as impetuous as her master, but her skills and strategic abilities grow from episode to episode. This version of Ahsoka comes with both short- and long-bladed lightsabers: she is learning Jar'Kai, the challenging art of dueling with two lightsabers at the same time.

**Ahsoka Tano (Cad Bane's Escape)**

He is seen briefly in *Return of the Jedi.* He was played by a female puppeteer but looks like a humongous version of a tiny flatworm with the colors of an unripe banana. His name, we are told, is just a nickname for his species, which has been alternately spelled Amanin or Amani. Neither the specific character seen in Jabba's palace nor his species have made it far in the Expanded Universe.

# Anakin Skywalker

**Anakin Skywalker**

1985 | RETURN OF THE JEDI/POTF 92-BACK

First available as a mail-away offer, the avuncular-looking Anakin is one of the hardest—and thus priciest—figures to find on a Power of the Force card. This is the spirit version of actor Sebastian Shaw as Anakin Skywalker. For the 2004 DVD release, George Lucas replaced Shaw with a spirit version of Hayden Christensen.

**Anakin Skywalker**

1999, RETURN OF THE JEDI/POTF2 FLASHBACK

Old Anakin only looks like this in spirit form, at the end of *Return of the Jedi*—and he isn't holding Obi-Wan's lightsaber then.

**Anakin Skywalker (Tatooine)**

**Anakin Skywalker (Hangar Duel)**
2002, ATTACK OF THE CLONES/SWS

Anakin's right hand magnetically attracts his green lightsaber, a wheel on his back rotates his left wrist, and his right arm separates at the elbow.

**Anakin Skywalker**
**(Outland Peasant Disguise)**

2002 | ATTACK OF THE CLONES/SWS

Like the vintage figures of Luke, Obi-Wan, and Vader, Anakin's lightsaber blade pulls straight out from the hilt. A magnet in the left hand uses "Force action" to open an included storage box and attract a blaster to his hand.

*Attack of the Clones*

**Anakin Skywalker (Force-Flipping Attack)**

2002 | ATTACK OF THE CLONES/SWS DELUXE

This Anakin Skywalker is one of three action-posed figures (along with Obi-Wan and Darth Tyranus) that comes with a launching pad and a magnetic landing platform. Theoretically, after you press a button, Anakin launches, flips over once, and nails a clean landing—thanks to the magnets on his feet. But, as Hasbro cautions, you have to "use the Force wisely" and "skill and practice is required."

**Anakin Skywalker (Lightsaber Slashing Action)**

2002, ATTACK OF THE CLONES/SWS DELUXE

Anakin has two sabers that swing with a touch of a button to "cut" a Geonosian (included) into three bloody pieces.

**Anakin Skywalker (Tatooine Attack)**

**Anakin Skywalker (Secret Ceremony)**

2003, ATTACK OF THE CLONES/SWS

Anakin goes against the Jedi code and secretly marries Padmé. This figure is articulated to allow the couple to grasp hand to robotic-right-hand prosthesis.

**Anakin Skywalker**

2003, CLONE WARS/CLONE WARS ANIMATED SERIES

The exaggerated cartoon Anakin figure is typical of the two dozen-plus figures produced for the micro-series *Star Wars: Clone Wars.*

**Anakin Skywalker (with Swoop Bike)**

2003, ATTACK OF THE CLONES/SWS VEHICLE

Anakin looks a bit windblown after riding his swoop bike to the Tusken camp, only to find his mother dying. The figure's lightsaber action tells you what follows.

**Anakin Skywalker**

2003 | EXPANDED UNIVERSE/CLONE WARS

With the release of this figure of Anakin in a costume that he doesn't wear in the movies, Hasbro instituted a *Clone Wars* line—not to be confused with two similarly sounding animated series. It was the start of a policy that continues: taking characters from animation and sculpting them as if they were in the movies, and vice versa.

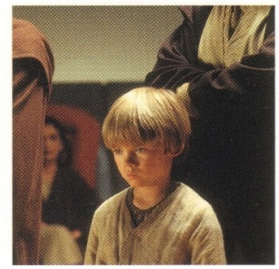

**Anakin Skywalker (Jedi High Council)**
2004, THE PHANTOM MENACE/

Based on the battle-scarred Anakin, this figure has a new head and geometric scars on his torso.

**Anakin Skywalker (Battle Damage)**

2005 | REVENGE OF THE SITH/ROTS

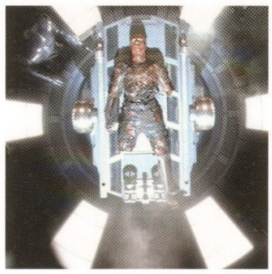

This gruesome version of Anakin is after his defeat by Obi-Wan on Mustafar. A plastic cloak and robes cover his already burned body, which has an alternate head and a pair of sleeve-covered arms for the "before" version. The "after" version's fire-scarred head and hands match the body. And the torso is further shortened when you remove the boot-covered lower legs (not shown) just beneath the knees.

**Anakin Skywalker (Changes to Darth Vader)**

2005, REVENGE OF THE SITH/ROTS DELUXE

**AT-AT Commander**

2010 | THE EMPIRE STRIKES BACK/TVC

An existing Imperial officer body and a new head sculpt freshen up the commander. The helmet, goggles, and chest plate are all removable. The All-Terrain Armored Transports, or Imperial Walkers, are relatively slow but heavily armored and difficult to stop. They can terrorize local resistance fighters with their intimidating sounds before they even appear on the horizon. They also carry Imperial troops in practically any climate and can offload light vehicles.

*The Empire Strikes Back*

**AT-AT Driver (with AT-AT Walker)**
1997, THE EMPIRE STRIKES BACK/
POTF2 GREEN VEHICLE

The second version, included with an AT-AT, is a more realistic-looking AT-AT driver.

**AT-AT Driver**
1998, THE EMPIRE STRIKES BACK/
POTF2 FREEZE FRAME

This figure is almost identical to the one packed with an AT-AT in 1997 except for a postural tweak that made it easier to stand.

**AT-AT Driver**

2006 | THE EMPIRE STRIKES BACK/TSC

This all-new version of the driver comes with 10 points of articulation and more realistic sculpting. The heavily-trained drivers work in teams of two and also operate the AT-AT's laser cannons. During the Battle of Hoth, they shoot down Rebel snowspeeders and destroy the shield and power generators of Echo Base.

**AT-AT Driver**
2009, THE EMPIRE STRIKES BACK/LC RED

An even newer version of the driver has fourteen points of articulation and a removable helmet so you can see the human face underneath.

**AT-AT Driver (Imperial AT-AT)**
2010, THE EMPIRE STRIKES BACK/
SOTDS VEHICLE

This is a repaint of a 2006 figure. The main changes are details on the helmet and chest and back boxes.

**AT-ST Driver**
1984, RETURN OF THE JEDI/ROTJ 77-BACK

ILM model makers called the AT-ST vehicle the Chicken Walker because of its ungainly movement and shape. The vehicle was first seen in *Empire*, the pilots in *Jedi*.

**AT-ST Driver**
1997, RETURN OF THE JEDI/POTF2 GREEN

The two featured AT-ST drivers in *Jedi* were director Richard Marquand and coproducer Robert Watts.

**AT-ST Driver (Imperial Forces 4-Pack)**
2003, RETURN OF THE JEDI/SWS MULTIPACK

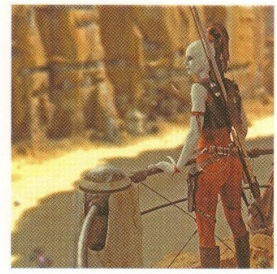

Take the body of a POTJ Imperial officer and the head of a Rebel trooper, add a helmet, redo the paint job—and you've got this figure.

**AT-ST Driver (The Battle of Hoth)**
2007, THE EMPIRE STRIKES BACK/
TAC BATTLE PACK

This figure may be an Imperial, but it uses the body of a 2004 Han Solo and the head from a 2007 Rebel fleet trooper.

**AT-ST Driver (Battle of Endor)**
2007, RETURN OF THE JEDI/TAC BATTLE PACK

Like the previous version, this combines a Rebel body and head with a repaint to come up with a new Imperial.

**Aurra Sing (Bounty Hunter)**

2001 | THE PHANTOM MENACE/POTJ

A deadly bounty hunter, Sing is seen briefly in Episode I. But she has had a large role in *The Clone Wars* and the Expanded Universe. Sing trains as a Padawan under the mysterious Dark Woman but leaves the Jedi Order before her training is complete. Her long-range projectile rifle fires armor-piercing ammunition.

**AT-ST Driver (with AT-ST)**
2009, RETURN OF THE JEDI/LC RED VEHICLE

Previously with light brown hair, now with black—maybe he's the twin of the earlier AT-ST driver.

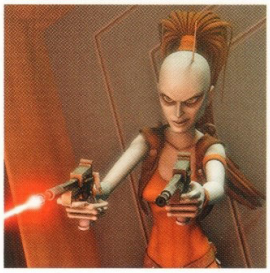

**AT-ST Driver (Attack on Hoth)**
2010, THE EMPIRE STRIKES BACK/
SOTDS MULTIPACK

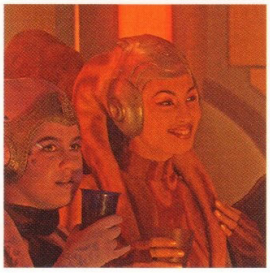

This totally new, super-articulated driver has jet-black hair, a harness, and a helmet with separate goggles.

**Aurra Sing**
2007, BOUNTY HUNTERS: AURRA
SING COMIC/TSC

Although she looks quite different, this Aurra Sing is just a clever repaint of the 2001 figure.

From Top:
*Star Wars: The Clone Wars*

**Aurra Sing**

2010 | THE CLONE WARS/TCW BLUE SKIES

The first version of the animated Aurra Sing from *The Clone Wars*, this figure has sculpted holsters for her blasters and a removable belt and vest. The figure has fourteen points of articulation and is a near-perfect likeness. In the series, it's clear that she's willing to work for anyone who will meet her price. She becomes a sort of mother figure to the young Boba Fett, until she turns on him. She tries to assassinate Senator Amidala but fails.

**Aurra Sing**

2012, THE PHANTOM MENACE/TPM 3D DTF

This all-new Aurra Sing comes with an unusual accessory—a suitcase she uses to store lightsabers of Jedi whom she kills. She also has two pistols and a long rifle.

**Ayy Vida**

2003, ATTACK OF THE CLONES/SWS

This consort of a crime boss comes with jointed legs and her bar stool from the Outlander nightclub—and a purple glass too!

**B-Wing Pilot**

1984, RETURN OF THE JEDI/
ROTJ 77-BACK

While these pilots are in the Rebel briefing room and at the final victory celebration in *Star Wars*, they aren't shown in combat.

**Sullustan B-Wing Pilot (with B-Wing Fighter)**

2001, RETURN OF THE JEDI/POTJ VEHICLE

This Sullustan B-wing pilot is packed with a large B-wing fighter. The combo was sold exclusively at Target.

**B-Wing Pilot (Lieutenant Pollard)**

2008, REBELLION COMIC/TLC BLUE VEHICLE

Lt. Pollard, leader of the new Dagger Squadron, is a repaint of Rebel pilot Keyan Farlander from an Evolutions set, but the head is new.

**B'arin Apma (Republic Elite Forces)**
2007, EXPANDED UNIVERSE/TAC MULTIPACK

Created for an exclusive seven-pack, Apma uses modified parts from two Jango Fett figures along with a new head and torso.

**B'omarr Monk**
1997, RETURN OF THE JEDI/POTF2 MAIL-AWAY

Hasbro's first "Internet exclusive" offer, the spiderlike droid transports and is guided by the brain of a once-humanoid B'omarr Monk.

**B'omarr Monk (Jabba's Court Denizens)**
2004, RETURN OF THE JEDI/SWS ULTRA

Virtually identical to the previous Monk, this version is molded in brown plastic rather than gray, and the brain nutrient is red.

**Bail Organa (Alderaan Senator)**
2003, ATTACK OF THE CLONES/SWS

A noble senator from a doomed planet, Organa ends up adopting the newborn Leia Skywalker.

**Bail Organa (Republic Senator)**
2005, REVENGE OF THE SITH/ROTS

Organa represents the planet of Alderaan, destined to be atomized by the Death Star. The figure comes with a detachable cape and holster for Bail's blaster.

**Bail Organa (with Baby Leia)**

2008 | REVENGE OF THE SITH COMIC/TAC COMIC PACK

Bail and Leia were packed with Obi-Wan and baby Luke. There was an earlier repack of Bail with Leia, but her blanket was light blue. Bail comes with twelve points of articulation and a green cloth cape. At the end of Episode III we catch our first and only glance of the planet Alderaan as Bail's wife Breha holds the adopted baby Leia in her arms.

**Bane Malar**
2008, EXPANDED UNIVERSE/TLC BLUE

This is an all-new figure of a bounty hunter "created" by a card-game licensee. Malar's backstory was supplied by a fan.

**Barada**
1985, RETURN OF THE JEDI/POTF 92-BACK

The sculpt is based on a different Barada alien, but the shirt is painted yellow to match Luke's guard on Jabba's skiff. Barada also comes in a Sears playset.

**Barada (Jabba's Skiff Guards)**
1999, RETURN OF THE JEDI/
POTF2 CINEMA SCENE

Placing Nikto, Barada, and Klaatu in one package truly pays homage to the famous line in *The Day the Earth Stood Still*.

**Barada**
2005, RETURN OF THE JEDI/TSC

Barada is a sharp repaint of a figure first released in 1999 and then repacked in a 2004 set.

**Baron Papanoida (Lucas Collector Set)**

2006 | REVENGE OF THE SITH/TSC MULTIPACK

There have been George Lucas figures before, but this one commemorates his first and only cameo in a *Star Wars* movie. He is in a scene with one of his daughters in the Galaxies Opera House on Coruscant. His other daughter plays a senator and his son, the fourth figure in this set, is a Jedi Padawan who is slain defending the Jedi Temple after Order 66.

**Baron Soontir Fel (with Hobbie Klivian)**
2007, X-WING: ROGUE SQUADRON COMIC/ TAC COMIC PACK

Baron Soontir Fel, leader of the 181st Imperial Squadron, is a formidable adversary. He and his family play a large role in the EU.

**Baron Soontir Fel (with Ysanne Isard)**
2010, X-WING: ROGUE SQUADRON COMIC/ LC RED COMIC PACK

This version of Fel, who eventually defects from the Empire, uses parts from previous figures of Captain Needa and a Death Star trooper, along with a new head.

**Barquin D'an (Max Rebo Band Set 1)**
2007, RETURN OF THE JEDI SPECIAL EDITION/ TAC EXCLUSIVE

This version of Barquin D'an has a slightly glossier finish.

**Barquin D'an (with Droopy McCool)**

1998 | RETURN OF THE JEDI SPECIAL EDITION/ POTF2 2-PACK

When George Lucas made changes to *Return of the Jedi* for the Special Edition release in 1997, he added musicians to the band sequence in Jabba's Palace and changed one existing puppet into a digital character. Hasbro paired an original band member with a new one in three different "Max Rebo Band Pairs" packs. The new Barquin D'an, similar to the Bith musicians in the Cantina scene in *Star Wars,* blows a mean kloo horn. (Also see: Modal Nodes.)

**Barriss Offee**
2003, ATTACK OF THE CLONES/SWS

Luminara Unduli's Padawan comes with limited poseability, but her base connects with others from the Geonosis arena battle.

**Barriss Offee**

**Basso in Disguise (with Mouse)**
2007, EMPIRE COMIC/TAC COMIC PACK

Basso, who becomes a Rebel hero, has the body of a 2007 sandtrooper with a new head sculpt. He was shipped with or without his orange pauldron.

**Bastila Shan**
2011, KNIGHTS OF THE OLD REPUBLIC VIDEO GAME/TVC

Shan is an all-new Fans' Choice figure. But she is the only winner not noted as such on the packaging.

**Battle Droid (with STAP)**
1998, THE PHANTOM MENACE/POTF2 GREEN

One of two "sneak preview" figures, this battle droid comes with a Single Trooper Aerial Platform. It has a wider stance to fit the STAP and freely swinging arms. It was slightly repainted for a 1999 release and then again in 2012.

**Battle Droid (Sliced)**
1999, THE PHANTOM MENACE/EPISODE I

The sliced, or slashed, battle droid looks like it has tangled in hand-to-hand combat and perhaps felt the wrath of a Jedi's lightsaber.

**Battle Droid (Clean)**

1999 | THE PHANTOM MENACE/EPISODE I

There have been action figure variations since the first *Star Wars* twelve-back cards, many of them because of initial production or other errors. This was the first time, however, that Hasbro sold four different versions of the same figure sculpt using the same card, all distributed in equal numbers. That made some sense, because these were soldiers for the Trade Federation, and you can never have too many "army guys." Buyers had to check closely to make sure they were buying the right ones, and the collector community came up with simple nicknames for each version.

**Battle Droid (Shot)**
1999, THE PHANTOM MENACE/EPISODE I

This battle droid shows signs of heavy laser blast damage.

**Battle Droid (Dirty)**
1999, THE PHANTOM MENACE/EPISODE I

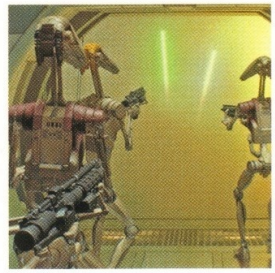

The dirty battle droid has smudges all over its body, perhaps a sign that it has taken tumbles on the battlefield.

**Battle Droid (from Theed Generator Complex)**
1999, THE PHANTOM MENACE/
EPISODE I PLAYSET

This is the international pack-in figure, but with a full battle-damaged deco.

*The Phantom Menace*

**Battle Droid (International Pack-In)**

1999 | THE PHANTOM MENACE/EPISODE I

Because of the cost and complexity of translating the ComTech chip–recorded lines into multiple languages in countries with smaller sales, Hasbro decided instead to pack twenty-eight different Episode I figures with the same "bonus" battle droid. This version of the droid had very limited articulation and no paint, and the blaster is permanently attached to its right hand.

**Battle Droid (with Theed Hangar)**
1999, THE PHANTOM MENACE/
EPISODE I PLAYSET

The Theed Hangar playset comes with a "power spin" Qui-Gon Jinn whose lightsaber halves the battle droid—thanks to a magnet connecting its top and bottom.

**Battle Droid (Security)**
2000, THE PHANTOM MENACE/POTJ

This battle droid's coloring indicates that it's a security droid programmed to guard prisoners and protect Trade Federation bases.

From Top:

**Battle Droid (Boomer Damage)**
2000, THE PHANTOM MENACE/POTJ

**Battle Droid (with Armored Scout Tank)**
2000, THE PHANTOM MENACE/

The tank driver's blue markings give it a unique appearance.

**Battle Droid (Arena Conflict)**
2002, ATTACK OF THE CLONES/SWS ACCESSORY

This rusty, battle-damaged droid can be fitted with a large backpack that has two firing missiles (not shown).

**Battle Droid (Arena Battle)**
2002, ATTACK OF THE CLONES/SWS

The blaster of this battle-damaged droid comes with a red "blaster effect," much like you'd find in a comic book.

**Battle Droid (Arena Battle)**
2002, ATTACK OF THE CLONES/SWS

Both the tan and red battle droid were packed in equal amounts on the same card.

**Battle Droid (Blast-Apart, with Mace Windu)**
2002, ATTACK OF THE CLONES/SWS DELUXE

Mace Windu uses a plastic "Force effect" or "Force blast" to separate the halves of this magnetically joined dirty battle droid.

**Battle Droid (Blast-Apart, with Mace Windu)**
2002, ATTACK OF THE CLONES/SWS DELUXE

The second version of the droid is the correct movie color. Mace can also split it in half with "the Force."

**Battle Droid (with C-3PO, Droid Factory)**

2002 | ATTACK OF THE CLONES/SWS DELUXE

Battle droids are oafish to begin with, but the pinnacle is in the Geonosis droid factory. C-3PO falls onto the assembly line and his head gets switched with a battle droid. To complicate matters, the figures have mix-and-match heads, arms, and legs. An included toy crane can exchange heads magnetically.

**Battle Droid (Droid Army)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

This battle droid splits in two and its backpack falls off after a lightsaber blow.

**Battle Droid (Naboo Final Combat)**
2004, THE PHANTOM MENACE/OTC MULTIPACK

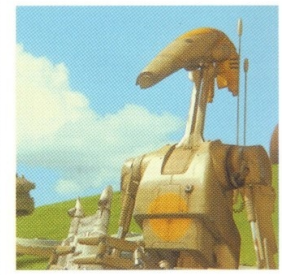

Once released as a battle-worn droid with boomer damage, this time the droid comes without blast or any other damage.

**Battle Droid (Separatist Army)**
2005, REVENGE OF THE SITH/ROTS

This battle droid uses the same sculpt as 2002's Arena battle droid but has a much different deco.

From Top:
*Revenge of the Sith*
*The Phantom Menace*

**Battle Droid (Sith Lord Attack)**
2006, THE PHANTOM MENACE/TSC BATTLE PACK

This droid, part of a pack featuring Darth Maul, Qui-Gon Jinn, and Obi-Wan Kenobi, is a retooling of a droid from 2000.

**Battle Droid (Kashyyyk Conquest)**
2006, REVENGE OF THE SITH/TSC

The two droids in this pack, repaints from 2002, now have green deco to provide camouflage for the invasion of Kashyyyk.

**Battle Droid Commander**

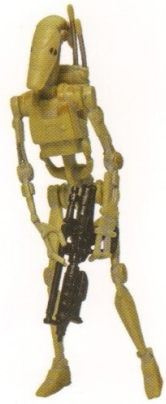

2007 | THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

For build-your-army and diorama enthusiasts, Hasbro introduced four two-packs of battle droids in Saga Legends packaging. All basically the same figure, they differ only in color, type, and degree of "battle damage." This one outranks them all.

**Battle Droid (STAP Attack)**
2007, EXPANDED UNIVERSE/TAC BATTLE PACK

Blue highlights and a dry, red wash give this droid a different look than its predecessor, the 1999 sneak preview figure.

**Battle Droid Infantry**
2007, THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

This lowly infantry droid is packed with the commander. He has seen little action.

2007 | ATTACK OF THE CLONES/TAC SAGA LEGENDS 2-PACK

The maroon droids are seen in *Star Wars*: Episode II *Attack of the Clones*. The multipointed splat indicates he was shot with a blaster. Like other figures in this Saga Legends packaging, the droids come with a blaster, a backpack, and a collector coin.

**Battle Droid II B (Lightsaber Damage)**
2007, ATTACK OF THE CLONES/TAC SAGA LEGENDS 2-PACK

The slash across the chest was made by a Jedi's lightsaber.

**Battle Droid III A (Blaster Damage)**

Fairly severe blaster damage doesn't seem to stop this battle droid.

**Battle Droid III B (Lightsaber Damage)**
2007, THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

This droid has been slashed and singed by silver lightsaber strikes.

**Battle Droid IV A (Dirty)**
2007, THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

No silver slash marks or blaster holes, but this droid has surely mixed it up in battle.

**Battle Droid IV B (Cleaner)**
2007, THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

This droid has a worn look below the knees. He boasts unusual small silver markings.

**Battle Droid**
2008, THE CLONE WARS/TCW BLUE

Battle droids from the animated television series *The Clone Wars* have a simpler, if clunkier, look.

**Battle Droid (Monastery Assault)**
2008, THE CLONE WARS/TCW BLUE BATTLE PACK

This retooled battle droid, with its "electro-blast" effect and battle damage, is shorter than other battle droids.

**Battle Droid (Battle of Christophsis)**

The two battle droids from this "ultimate" battle pack are redecorated versions of the 2008 carded battle droid.

**Battle Droid (AAT Driver)**

2009 | THE CLONE WARS/TCW RED

This specialized droid with green camouflage is a repaint of a 2008 battle droid. It is specially programmed to drive an Armored Assault Tank (AAT). The droid comes with eight points of articulation and a missile-firing blaster cannon. These droids were seen in the first televised episode of *The Clone Wars* as Yoda leads a squad of clone troopers against a seemingly overwhelming Separatist force on the planet of Toydaria.

**Battle Droid (vs. Joclad Danva)**
2009, ATTACK OF THE CLONES/
LC RED GEONOSIS ARENA

The red battle droid is a new sculpt with added articulation to fight Jedi Joclad Danva.

**Battle Droid (Armored Scout Tank)**
2009, THE CLONE WARS/TCW RED DELUXE

A new deco version of a 2008 battle droid, it has a "dirty" wash and blue markings of a pilot; the legs have no articulation.

The battle droid is a repaint from a 2009 figure.

**Battle Droid II**

**Battle Droid (with STAP)**
2010, THE CLONE WARS/TCW RED BATTLE PACK

With eight points of articulation on its arms and legs, this brown STAP pilot can maneuver his one-droid flying platform.

**Battle Droid**

2012 | THE PHANTOM MENACE/TVC

This is a totally new battle droid sculpt, with separate backpack and antenna. It is slightly smaller and has a shorter neck than previous movie-version droids. Interestingly, while the majority of the figure has a nice paint wash, the head and backpack have been left the color of the original plastic.

**Battle Droid (with Separatist Droid Speeder)**
2011, THE CLONE WARS/
TCW BLUE SKIES DELUXE

This all-new figure has more realistic proportions and articulation along with a snazzy new paint job.

**Battle Droid (with ARF Trooper Waxer)**
2011, THE CLONE WARS/TCW BLUE

From the popular Season 2 episode "Landing at Point Rain," this battle droid has a unique paint job topping a much-used 2008 sculpt.

**Assassin Battle Droid (Droid Pack)**
2007, BATTLEFRONT II VIDEO GAME/
TAC MULTIPACK

Armed with a sniper rifle, this battle droid is a camouflage repaint of a 2002 droid.

**Assault Battle Droid (Droid Pack)**

Yet another re-deco of the 2002 battle droid; it may be called an engineer droid, but this type makes up the bulk of the infantry.

**Firefighter Battle Droid**
2010, THE CLONE WARS/TCW RED

Based on a 2008 battle droid, this firefighter saw action in *The Clone Wars* after the Separatist ship *Malevolence* was attacked by Republic forces.

**Ben Quadinaros (with Pit Droid)**
2012 | THE PHANTOM MENACE/TVC

Probably the silliest looking of all the Podracer pilots, Hasbro has done an excellent sculpting and painting job of Ben to match the digital creation. Ben, as we're sure you know, is a timid Toong from the planet Tund.

**Rocket Battle Droid**
2009, THE CLONE WARS/TCW BLUE

The rocket, or hunter, battle droids have rocket packs and bright lamps atop their heads so they can find and destroy emergency lifepods floating in space.

**Aunt Beru (with Service Droid)**

1999 | STAR WARS/POTF2 FLASHBACK

The first-ever Beru Lars figure comes with her iconic pitcher of blue milk and a cup. She is packed with a WED Treadwell repair droid. The "flashback" photo on this card turns from Aunt Beru into Shmi Skywalker—from the woman who is the closest thing to a mother that Luke Skywalker ever knew, to Luke's grandmother, who dies before he is even born. Both women understood that a larger destiny awaited their sons.

**Beru Whitesun**

2009, ATTACK OF THE CLONES/TLC BLUE

This is the first version of Aunt Beru as a younger woman. As Beru Lars, she helps raise Luke Skywalker.

**Bespin Security Guard**

The white Bespin guard can be found with both a regular and a Fu Manchu mustache, as shown here.

**Bespin Security Guard**

1982, THE EMPIRE STRIKES BACK/TESB 45-BACK

The black version of the Bespin guard is a new, somewhat more realistic sculpt, without the mustache.

**Bespin Security Guard**

2001, THE EMPIRE STRIKES BACK/POTJ

With his removable cap perched at a jaunty angle, his baton and blaster at his side, and magnacuffs not far away, this Cloud City security officer is ready for business.

**Bespin Security Guard**

2001, THE EMPIRE STRIKES BACK/POTJ PLAYSET

This more cartoon-like version of a Bespin security guard comes with a carbon-freezing chamber playset so you can carbon freeze just about any of your action figures.

**Cloud City Wing Guard (Sergeant Edian)**
2009, THE EMPIRE STRIKES BACK/LC RED

This is an updated sculpt of the 1982 figure of the black Bespin guard seen in Episode V. He has fourteen points of articulation.

**Cloud City Wing Guard (Utris M'Toc)**
2010, THE EMPIRE STRIKES BACK/LC RED

Using the same basic body as the 2009 black Bespin guard, this is a figure of a humanlike alien guard that is actually seen only in still photos taken on set.

**BG-J38**
2010, RETURN OF THE JEDI/

A background droid in *Jedi*, BG-J38 is put together with extra parts included in the packages of six other action figures.

**Bib Fortuna**

1983 | RETURN OF THE JEDI/ROTJ 65-BACK

As Jabba the Hutt's major-domo, Bib controls access–except under the influence of a Jedi mind trick. Kenner 77-figure card backs show a photo of a prototype Bib Fortuna with a red cape, but none were distributed that way. Nearly all the capes are shades of gray-brown. There is one notable exception. In Mexico, licensee Lily Ledy packed an unknown number of early Fortunas with a dark burgundy cape. However, there have been so many fakes made of that version, that unless the figure is mint on a sealed card it is difficult to tell if it's real.

**Bib Fortuna**
1997, RETURN OF THE JEDI/POTF2 GREEN

The second Bib figure uses soft plastic to emulate cloth and makes the character look a lot better than the vintage one, with its actual cloth cape.

**Bib Fortuna**
2004, RETURN OF THE JEDI/OTC

Originally released in the POTF2 line, this figure of Jabba's assistant has been given an updated paint job.

*Star Wars*

**Bib Fortuna**
2005, RETURN OF THE JEDI/TSC

A totally resculpted version of Jabba's aide, this one makes Bib look like he's screaming—or singing along with the Max Rebo band.

**Biggs Darklighter**

1998 | STAR WARS/POTF2 FREEZE FRAME

The role of Biggs Darklighter, Luke's best friend, was cut to practically nothing in the completed film but more footage appears in the Special Edition and in a deleted scene on the 2011 Blu-ray release. Fans had long suspected there was more Biggs footage, because the early Marvel comic book adaptation depicts the deleted scene near the start of the movie. The scene was shown publicly for the first time to an unsuspecting audience at San Diego Comic-Con International, and then released in low resolution on a LucasArts CD-ROM, "Behind the Magic."

**Biggs Darklighter (Rebel Pilot)**
2007, STAR WARS/TAC

The updated version of Biggs has a new head sculpt and repainted helmet atop a previously used X-wing pilot body.

**Biggs Darklighter (Tosche Station)**
2007, STAR WARS/TAC

This is the version of Biggs seen in deleted Tosche Station footage, where he tells Luke about his plans to join the Rebellion.

**Biggs Darklighter (Imperial Pilot I)**
2008, EMPIRE COMIC/TLC BLUE EVOLUTIONS

Biggs first enrolls at the Imperial Academy. This figure shows him in his TIE fighter pilot gear with a special helmet to show his face.

**Biker Scout**
1983, RETURN OF THE JEDI/ROTJ 65-BACK

Because vintage figures were made in up to four different factories, there were variations in the biker scout's helmet and body armor.

**Biker Scout (with Speeder Bike)**
1995, RETURN OF THE JEDI/POTF2 RED VEHICLE

Off his bike, which the package notes "explodes and ejects rider in battle," this scout looks more than a bit bowlegged.

**Scout Trooper/Biker Scout (Imperial Patrol)**

2000 | RETURN OF THE JEDI/POTJ

There are two versions of the scout trooper (aka biker scout): one pristine and clean, the other dirty. The clean version, released first, is far rarer. This line of figures comes packed with miniature booklets called Jedi Force Files that describe the character and his or her vital statistics; weapons, accessories, and technology used; photos of "allies and enemies"; discussion questions called "adventures"; a list of skills; and a graphic rating the character on a scale of zero to twenty in areas like strength and intelligence.

*Return of the Jedi*

**Scout Trooper/Biker Scout (Imperial Patrol)**
2000, RETURN OF THE JEDI/POTJ

The dirty version of the scout trooper came second. There are not only black smudges all over his white armor, but also mud stains on his boots.

**Scout Trooper/Biker Scout (Endor Victory Set)**
2002, RETURN OF THE JEDI/SWS ACCESSORY

The black paint is different from the POTJ trooper, and the belt is assembled backward.

**Biker Scout**
2006, RETURN OF THE JEDI/TSC VINTAGE-STYLE

The superaccurate sculpt of this "army building" figure has fourteen points of articulation and a realistic paint job to match.

Using the same super-articulated body as the 2006 vintage-style figure, this goes one better by adding a face under the visor.

**Shadow Scout (with Speeder Bike)**
2007, EXPANDED UNIVERSE/TAC VEHICLE

This is a repainted and retooled version of the 2006 white biker scout. The legs have a wider stance to allow the figure to sit on its all-black speeder bike.

**Biker Scout I (Battle of Endor)**
2007, RETURN OF THE JEDI/TAC BATTLE PACK

Given the name Nik Sant, this undercover Rebel helps in the shield generator assault during the Battle of Endor.

**Scout Trooper/Biker Scout**
**(Hoth Speeder Bike Patrol)**

2008 | EXPANDED UNIVERSE/TLC BLUE BATTLE PACK

This biker scout in cold weather armor is a repainted mash-up of the 2006 super-articulated scout with the arms of a 2007 snowtrooper. While the scouts are lightly armored, they make up for that with their mobility and speed when they're riding their bikes. They patrol perimeters, perform reconnaissance missions, and scout enemy locations.

**Biker Scout**
2009, RETURN OF THE JEDI/LC RED

This rerelease of the 2006 super-articulated biker scout has a more realistic, darker color for his undervest and straps.

**Scout Trooper/Biker Scout (with Speeder Bike)**
2009, RETURN OF THE JEDI/LC RED VEHICLE

This version of the trooper (biker scout) is a mostly clean version of the line's carded figure. There is some light dirt on the boots.

**BL-17 (with Boba Fett)**
2009, DROIDS/LC RED DROID FACTORY

Using the arms and legs from a 2007 4-LOM and a new head and body, this droid was owned by Boba Fett in the 1985 series.

**Blackhole Hologram (with Stormtrooper)**
2010, CLASSIC STAR WARS COMIC/LC RED

Not articulated, this is still an imposing figure of the Imperial Intelligence Director in the *Star Wars* comic strip. It's about half the size of the Stormtrooper.

**Boba Fett with Jet-Pack**
1995, RETURN OF THE JEDI/POTF2 RED

Fett's original film debut comes in *Empire*, but this is his more colorful costume from *Jedi*. The first release has two half circles on his hand, later corrected with a full circle.

**Boba Fett**

1979 | THE EMPIRE STRIKES BACK/SW 21-BACK

A bounty hunter of few words, Boba Fett remains one of the most popular characters in the *Star Wars* saga. Introduced in an animated segment of the 1978 *Star Wars Holiday Special*, Fett initially was available only as Kenner's first mail-away offer. But a promised backpack rocket-firing feature had to be abandoned because of product-safety issues, ironically making the figure even more buzzworthy. The few remaining rocket-firing prototypes command big bucks in the collectors' market.

**Boba Fett with Wing-Blast Rocket**
1997, EXPANDED UNIVERSE/
POTF2 GREEN DELUXE

Although the bounty hunter never had such a contraption in the movies, this deluxe figure is taller and more accurate than 1995's *Jedi* Fett.

**Boba Fett (300th Figure Special Edition)**
2000 | THE EMPIRE STRIKES BACK/POTJ

This cool figure of the bounty hunter was sold in a window box at a premium price. While Hasbro marketed it as the 300th figure to be produced, in reality the company had no idea how many figures had come before. Hasbro was off by more than 100, but who's counting? The first Boba Fett figure became infamous for what it didn't have: a rocket-firing feature eliminated for product-safety concerns. This figure touts a rocket-firing backpack, but the black missile (not shown) is almost as tall as the figure.

**Boba Fett (Kamino Escape)**
2002, ATTACK OF THE CLONES/SWS

"Baby" Boba comes with a removable rain poncho, blasters, jet-pack, and his dad, Jango's, helmet. His wet hair is evidence of the rainstorm in Tipoca City on Kamino.

**Boba Fett**
2003, THE EMPIRE STRIKES BACK/
SW SILVER ANNIVERSARY

A bit late for the actual *Star Wars* 25th anniversary, this silverized Boba Fett was popular as a Hasbro convention exclusive. It's based on the POTJ Fett.

**Boba Fett (Pit of Carkoon)**
2003, RETURN OF THE JEDI/SWS

The first wave of 2003 figures came out on the 2002-style card, followed by a second wave using the same numbers but different cards. Sometimes that led to figure tweaks, such as this new Boba Fett.

**Boba Fett (Pit of Carkoon)**
2003, RETURN OF THE JEDI/SWS

Same toy, same line number, different card . . . and a light green bodysuit that is much closer to the movie than the original blue one. The new deco started appearing late in the run on the first card style.

**Boba Fett**
2004, RETURN OF THE JEDI/OTC

Perhaps the third time is the charm? This figure was released twice before, in a darker blue and then a light green bodysuit. Here, Hasbro goes for a lighter gray-blue.

**Boba Fett**
2004 | RETURN OF THE JEDI/OTC VINTAGE-STYLE

As part of Hasbro's Original Trilogy Collection, there was a subcategory of twelve special figures on vintage-style cards—four for each film in the original trilogy. This may be the ultimate Boba Fett figure, with fifteen points of articulation, including a lot of ball joints to make just about any pose possible. The figure also had the most detailed paint job of any to this point.

**Boba Fett**
2005, RETURN OF THE JEDI/TSC

This flying Fett is made up of the body and legs of two earlier Fetts. It has been repainted and has a new rocket pack.

2008 | MARVEL STAR WARS COMIC/TAC COMIC PACK

This comic-book color repaint of a 2004 Boba figure is from the original Marvel *Star Wars* issue #81, cover-dated March 1984. The book shows the bounty hunter being ejected from the sarlacc's maw. Unconscious, Fett later awakens with amnesia in the hold of a sandcrawler, having been mistaken by Jawas for a mechanical like a nearby RA-7 protocol droid. By the end of the tale, the sandcrawler and all aboard—including Fett—plunge into the sarlacc, giving future authors another chance to bring Fett back to life.

**Boba Fett (Rocket Firing)**

2010 | THE EMPIRE STRIKES BACK/TVC MAIL-AWAY

At last, after more than thirty years, here's an authentic rocket-firing Boba Fett . . . from a certain point of view. Hasbro did an excellent job matching the sculpt and paint job of the infamous 1978 special-offer, missile-firing bounty hunter that was never released because of product-safety concerns. This new version does contain a firing missile—which is about triple the length than the first was supposed to be.

**Prototype Armor Boba Fett**

One of the few humanoids in the cantina, BoShek is a smuggler who points out Chewbacca when Obi-Wan needs a ride.

**Boss Nass**
1999, THE PHANTOM MENACE/EPISODE I

The massive Gungan leader, a fully CG alien, comes with his staff of authority and wears a removable robe. Hasbro made this version far too short.

**Boss Nass (Gungan Sacred Place)**
2000, THE PHANTOM MENACE/POTJ

The second version of Nass looks much happier, since this is when the Queen of Naboo comes to him as a supplicant, not a superior.

**Bossk (Bounty Hunter)**

1980 | THE EMPIRE STRIKES BACK/TESB 31-BACK

Originally a background creature in the Mos Eisley cantina nicknamed Croc, the mask was repainted and combined with new arms, legs, and costume to form the bounty hunter Bossk. The hunter is a Trandoshan, and his species is known for its hatred of Wookiees, tracking them down for their skins or to sell into slavery. Although seen only briefly in *Empire*, Bossk has had a fairly active life in the Expanded Universe, appearing in several episodes of the animated series *The Clone Wars*.

**Bossk**

2007 | THE EMPIRE STRIKES BACK/TSC VINTAGE-STYLE

This all-new sculpt sets the standard for accuracy and articulation. Many pieces that had been part of the body mold, like the harness, are separately molded and painted accessories. Like many of the other costumes in the original trilogy, Bossk's outfit made use of available military surplus. The main bodysuit is a British Royal Air Force pressure suit developed in the early 1960s for pilots. In re-creating costumes, many *Star Wars* fans try to find the original source or a close equivalent in military surplus stores.

**Buzz Droid (with Droid Tri-Fighter)**

2005 | REVENGE OF THE SITH/ROTS VEHICLE

Shot out by droid tri-fighters as a swarm of balls, these weapons are pesky as gnats but quite deadly to spacecraft. The buzz droids play a frightening role in the huge battle over Coruscant that opens Episode III. These insect-like mechanicals, known in the EU as Pistoeka sabotage droids, are launched against Obi-Wan's Jedi starfighter. They destroy his astromech navigator and nearly cut through all of the ship's controls.

**C-3PO**

1998 | STAR WARS/POTF2 COIN

While marking time until the release of the first prequel film, Hasbro came up with clever gimmicks such as the seven-figure subline Millennium Minted Coins, which came with collectible souvenir coins. The company reused the fronts of vintage Power of the Force souvenir coins in gold rather than the original silver. Hasbro made slight changes in the accompanying figures. C-3PO, for example, borrows an upper body from one figure and legs from another.

The "naked" Episode II droid comes with rough finishing panels put on by Padmé in a scene that was eventually deleted. Altogether there are eight removable/replaceable panels to cover Threepio. 2005 | REVENGE OF THE SITH/ROTS

Antilles, apparently a very popular last name in the faraway galaxy, has seen Clone Wars action, judging by his scars. **Chancellor Valorum**

1999 | THE PHANTOM MENACE/EPISODE I

The troubled leader of the Galactic Republic, Chancellor Valorum comes with his ceremonial staff and an incredibly printed plastic cape that is flexible enough to be removed. The included Commtech chip contains the line: "The Chair recognizes the senator from the sovereign system of Naboo." This eventually leads to the vote of no confidence that removes him as head of the Galactic Republic.

# Chewbacca

**Chewbacca**

1978 | STAR WARS/SW 12-BACK

Chewie, at more than a quarter-inch taller than the standard figures in the line, was sculpted with a kid-friendly look. Chewie's weapon, a bowcaster, can be found in three different colors: dark green, blue, and black.

**Chewbacca with Bowcaster**

1995, STAR WARS/POTF2 RED

Although Chewie is at least a head taller than Darth Vader, both figures in this line are about the same height. In the earliest release, the bandolier strap was glossy.

**Chewbacca (Classic Edition 4-Pack)**

1995, STAR WARS/POTF2 MULTIPACK

This Chewie figure from Kenner's limited "Classic Edition 4-Pack" is nearly identical to the 1978 figure, except it is slightly shorter, with a matte finish.

**Chewbacca in Bounty Hunter Disguise**

1996, SHADOWS OF THE EMPIRE/SOTE

Well, hello Chewie! Oh, excuse me. Your flattop and eye patch indicate that you're Snoova, the bounty hunter. Great disguise!

**Chewbacca (from Death Star Escape)**

1997, STAR WARS/POTF2 CINEMA SCENE

Chewie uses the same body as another 1998 Chewbacca but a new head. He's matched up with Leia and Han inside the throat of a giant space slug in this Cinema Scene.

**Chewbacca (Boushh's Bounty)**

1998, RETURN OF THE JEDI/
POTF2 FREEZE FRAME

Besides the gray fur and charming chain accessory from being the prisoner of Leia, who is disguised as Boushh, most of these Chewbacca figures were painted cross-eyed.

**Hoth Chewbacca**
1998, THE EMPIRE STRIKES BACK/
POTF2 FLASHBACK

Chewbacca's fur is apparently good protection against the bone-chilling cold and snow on Hoth.

**Chewbacca (Dejarik Champion)**
2000, STAR WARS/POTJ

Chewbacca is specially articulated so the figure can lean back at the dejarik game table as shown in *Star Wars* when C-3PO advises R2-D2, "Let the Wookiee win!"

**Chewbacca**
2001, THE EMPIRE STRIKES BACK/POTJ

Chewie has a new face sculpt that gives him a spiffy fresh hairdo in this version as the *Millennium Falcon*'s mechanic. The Wookiee comes with a welding torch and goggles.

**Chewbacca (Death Star Escape)**

2002 | STAR WARS/POTJ SILVER ANNIVERSARY 2-PACK

For *Star Wars*' Silver (25th) Anniversary, Hasbro released three two-packs of the most iconic movie characters from the first movie, in three of the most memorable situations. Obi-Wan and Vader fight "The Final Duel," Luke and Leia take their "Swing to Freedom," and Chewie and Han make their "Death Star Escape." All of the figures, like this Chewbacca, are in action poses closely resembling a film frame.

**Chewbacca (with Death Star Trash Compactor)**
2002, STAR WARS/SWS SCREEN SCENE

Packed with Princess Leia and half a dianoga and trash compactor, Chewbacca is posed for action, but even he can't stop the walls from moving.

**Chewbacca (Cloud City Capture)**
2002, THE EMPIRE STRIKES BACK/SWS

One of the coolest Chewbacca figures ever made, this Wookiee is newly sculpted with nine points of articulation and a more realistic face. It comes with a mesh net to hold poor C-3PO after his Imperial encounter.

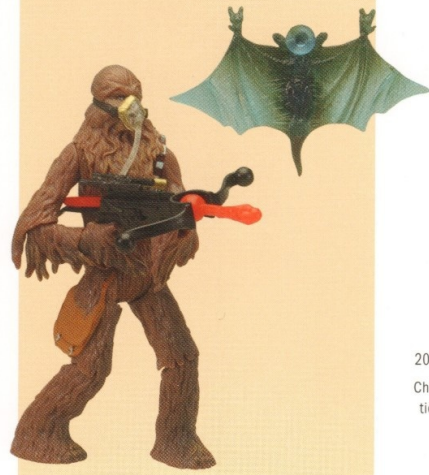

*The Empire Strikes Back*

**Chewbacca (Battle of Hoth 4-Pack)**
2003, THE EMPIRE STRIKES BACK/
SWS MULTIPACK

Chewie is based on the first SWS version, but with a different head and spattered with snow.

**Chewbacca (Mynock Hunt)**

2003 | THE EMPIRE STRIKES BACK/SWS

Chewbacca goes hunting for flying mynocks that could wreck the *Millennium Falcon*. Mynocks are energy-feeding parasites; they attach themselves to the *Falcon* and threaten to destroy the main power systems. It's only when Chewie, Han, and Leia step outside the ship to investigate the creatures's strange noises that they realize that the "tunnel" they've landed in is actually the gullet of a creature.

**Chewbacca**
2004, RETURN OF THE JEDI/OTC VINTAGE-STYLE

Chewbacca has an incredible fifteen articulation points in this new sculpt, and the most detailed deco job to this point.

**Chewbacca (Wookiee Rage)**

**(*Millennium Falcon* Copilot)**
2009 | STAR WARS SAGA/LC RED

Chewie has a 2004 body, a new head sculpt, and a removable communications headset so he can copilot the *Falcon*. The figure has fifteen points of articulation. **Chewbacca (Vintage Android 3-Pack)**
2011, STAR WARS SAGA/TVC

We guess Chewie doesn't mind being called an "android." This is a noticeable paint change for a 2005 figure of the Wookiee.

**Clegg Holdfast**

Another one of the cartoony Podracer pilots, Clegg has a surprising eleven points of articulation and removable goggles. He was released again in 2012.

**Clone Trooper (7th Legion)**

This veteran of the Battle of Utapau is a repaint of a 2010 clone trooper, with the same thirteen points of articulation.

**Clone Trooper (327th Star Corps)**
2008, REVENGE OF THE SITH/TLC BLUE

The original version of the Star Corps clone, based on a 2005 sculpt, it has a matching color pauldron that was replaced with an orange one late in the run.

**Clone Trooper (212th Attack Battalion)**
2009 | THE CLONE WARS/TCW BLUE

How many different clone trooper variations are there? That's like trying to count snowflakes falling during a blizzard. Suffice it to say, a lot. For many, like this one, Hasbro used a standard clone trooper body but different deco. As the number increased, so did the unusual paint and other treatments. The 212th is led by Commander Cody and General Kenobi.

**Tactical Ops Clone Trooper (Vader's 501st Legion)**
2005, REVENGE OF THE SITH/ROTS

This member of the 501st, a repaint of the AT-TE tank gunner, helps Darth Vader with the slaughter at the Jedi Temple.

**501st Clone Trooper (Jedi Temple Assault)**
2005, REVENGE OF THE SITH/ROTS BATTLE PACK

The three clone troopers in this pack are 501st members, repaints of the basic white trooper. Squeeze their legs together for quick-draw attack.

**501st Clone Trooper**

2007 | REVENGE OF THE SITH/
TAC SAGA LEGENDS

The clone troopers of the 501st are an homage to a worldwide fan costuming and service group, the 501st Legion, which was founded in 1997. Author James Lucero started using the name in *Star Wars* fiction, referring to the unit led by Anakin/Vader that storms the Jedi Temple. George Lucas adopted the idea for Episode III. This is a repaint of a 2005 tactical operations trooper.

**Clone Trooper (501st Legion)**
2008, THE CLONE WARS/
TCW BLUE EXCLUSIVE

**Aerial Recon Clone Trooper (Anti-Hailfire Droid Squad)**
2010, THE CLONE WARS/TCW BLUE SKIES MULTIPACK

Relaying the position of enemy Hailfire droids from the air, this recon trooper is a repaint that uses the body of clone trooper Denal and a helmet from trooper Echo.

**Airborne Clone Trooper (with Anakin Skywalker)**
2007, EXPANDED UNIVERSE/TAC ORDER 66

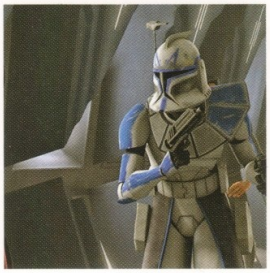

By his colors, we can deduce this airborne trooper is a member of the 501st. The figure is based on a 2005 airborne trooper.

**Airborne Clone Trooper**

2007 | REVENGE OF THE SITH/TAC

A member of the Parjai Squad, the 2nd Airborne Company that lands on Utapau, this battle-worn trooper is based on a 2005 figure but repainted and with new parts. It has been completely repainted, with a new left shoulder, different helmet, and some other minor modifications. It still comes with a man purse (or satchel) to sling over his shoulder. But turn that over to see its real function: inside an exact cut-out rests the trooper's D-17 blaster.

**ARC Clone Trooper**
2003, CLONE WARS/CLONE WARS

The Advanced Recon Commando troopers are personally trained by Jango Fett. Instead of two different paint jobs in the same packaging, Hasbro went for three this time.

**ARC Clone Trooper**
2003, CLONE WARS/CLONE WARS

The only major difference with this trooper is that he has a gray right shoulder pad. That likely was a deliberate variation.

**ARC Clone Trooper**
2003, CLONE WARS/CLONE WARS

At least the red version, a captain, is distinguishable. All three have positionable range finders on their helmets, just like Jango.

**ARC Clone Trooper**
2005, CLONE WARS/CLONE WARS

For Season 3 of the *Clone Wars* micro-series, Hasbro introduced an Advanced Recon Commando trooper. The red deco indicates this is an ARC trooper captain.

**ARC Clone Trooper (with Obi-Wan Kenobi)**
2007, REPUBLIC COMIC/TAC COMIC PACK

The comic book version of the ARC trooper is repainted and kit-bashed with several new parts including head and helmet. His kama (half kilt) has an artistic flourish.

**ARC Clone Trooper (Hunt for Grievous)**
2006 | CLONE WARS/TSC BATTLE PACK

Although Hasbro calls four of the five figures in this pack "clone troopers," this one is clearly dressed as an ARC trooper. The Hunt for Grievous battle pack contains five figures. The ARC trooper has twelve points of articulation and is a repaint of a carded 2003 ARC trooper. There's also a heavy gunner clone trooper and two regular clone troopers. The star of the set is a figure of Captain Fordo, whose color accent is an almost luminescent red.

**ARC Clone Trooper (Republic Elite Forces)**
2007, EXPANDED UNIVERSE/TAC MULTIPACK

This set of seven figures includes two sharp-looking ARC troopers that are repaints from the comic pack trooper with Obi-Wan.

**ARC Clone Trooper (with Anakin Skywalker)**
2008, EXPANDED UNIVERSE/TAC ORDER 66

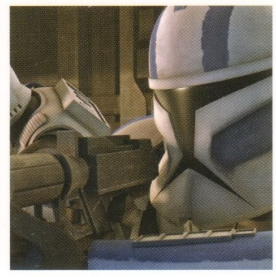

This is a repaint of a 2007 ARC with the kama of a 2003 figure. He is dressed as a 501st trooper but not called out as such.

**ARC Clone Trooper (with Master Sev)**
2008, CLONE WARS ADVENTURES COMIC/ TAC ORDER 66

This ARC trooper with yellow and black consists of repainted parts from three earlier figures.

*Star Wars: The Clone Wars*

**ARC Clone Trooper**
2009 | REPUBLIC COMIC/TLC BLUE

The basic carded ARC trooper is a slight repaint of the one included in an Order 66 two-pack with Anakin. It has fourteen points of articulation and removable helmet, kama, and shoulder pauldron with gauntlet. The elite Advanced Recon Commandos have received special programming that allows for independent thought. They are sent on exceptionally dangerous missions that demand flexibility and self-sufficiency.

**Alpha-17 ARC Clone Trooper**
2009, STAR WARS SAGA/LC RED EVOLUTIONS

A three-pack of clone commandos includes Alpha-17, another repaint—with a new head—of the ARC trooper with Obi-Wan.

**ARC Clone Commander Blitz (Defend Kamino)**
2011, THE CLONE WARS/TCW BLUE SKIES BATTLE PACK

Commander Blitz is a repaint and a kit-bash from several earlier ARC troopers.

**ARF Clone Trooper**
2009, THE CLONE WARS/TCW RED

With fourteen points of articulation, this figure marks the debut of the Advanced Reconnaissance Force trooper, often found riding AT-RTs into combat.

**ARC Clone Commander (Captain Fordo)**

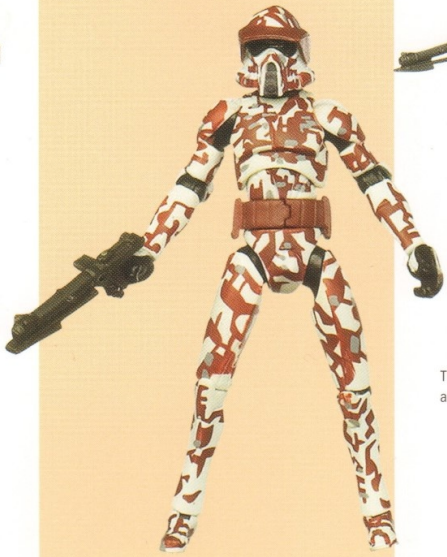

2011 | CLONE WARS/TVC

The card says the figure, an homage to the original 2003 ARC trooper, is "inspired by" Captain Fordo of the *Clone Wars* micro-series. It actually uses the body of a Phase 1 clone trooper with a new head and accessories. A unique extra helmet is like the one Fordo wore during the Battle of Coruscant.

**ARF Clone Trooper (Jungle Camo)**
2010, THE CLONE WARS/TCW BLUE SKIES

A wild "jungle" camouflage covers a redo of the basic 2009 ARF trooper.

**ARF Clone Trooper (with AT-RT Walker)**

2011 | THE CLONE WARS/TCW BLUE SKIES DELUXE

A maroon and gray camouflage cover that matches his All Terrain Recon Transport makes this trooper an unwitting fashion statement. Advanced Recon Force troopers usually are assigned to short-range reconnaissance missions by top brass or Jedi generals. ARF troopers serve in many different units of the clone army.

**ARF Clone Trooper (Assault on Geonosis)**
2011, THE CLONE WARS/
TCW BLUE SKIES BATTLE PACK

This figure is distinguished from the Waxer and Boil ARF trooper figures by a streak of hot yellow on his breastplate.

**ARF Clone Trooper (Republic Scout Speeder)**
2011, EXPANDED UNIVERSE/
TCW BLUE SKIES DELUXE

The trooper included with the smallish scout speeder is based on a 2009 carded version.

**ARF Clone Trooper (Kamino)**
2011, THE CLONE WARS/TCW BLUE SKIES

With five colors on the white helmet alone, and a sixth on the armor, the basic ARF trooper has really been spiffed up with this series-accurate clone.

**ARF Clone Trooper Boil (with AT-RT)**
2011, THE CLONE WARS/
TCW BLUE SKIES DELUXE

In the battle to retake Geonosis, Boil dons an ARF trooper uniform to pilot an All Terrain Recon Transport. The figure is a repaint of the basic ARF trooper.

**ARF Clone Trooper Waxer (with Battle Droid)**
2010, THE CLONE WARS/
TCW BLUE SKIES 2-PACK

Waxer as an ARF trooper is a repaint of ARF Trooper Boil but with a distinguishing yellow stripe over the camouflage.

**AT-RT Driver (with AT-RT)**
2005, REVENGE OF THE SITH/ROTS VEHICLE

**AT-RT Driver (Missile-Firing Blaster)**

2005 | REVENGE OF THE SITH/ROTS

Originally called "Turbo Tank Driver," the clone trooper was renamed and changed to match the version included with the All Terrain Recon Transport vehicle. The helmet has two versions: the one seen here with white above the side pieces, and one that was covered with the same deco as the helmet sides.

**AT-RT Driver (with Obi-Wan Kenobi)**

2007, EXPANDED UNIVERSE/TAC ORDER 66

The clone driver, who doesn't appear in Episode III, is a Utapau repaint of a 2005 basic AT-RT driver. He comes with a separate battle-damaged chest plate.

**AT-RT Driver (AT-RT Assault Squad)**

2007, EXPANDED UNIVERSE/TAC BATTLE PACK

Both clone drivers in this pack have a new Kashyyyk jungle camouflage deco on top of a 2005 AT-RT driver figure.

**AT-RT Driver (Episode III Set)**

2007, REVENGE OF THE SITH/

This dirtier version of a 2005 AT-RT driver is interesting because it uses the deco given to the concept version of the character.

**AT-RT Driver (with Luminara Unduli)**

2008, REPUBLIC COMIC/TAC ORDER 66

Apparently there is no standard camouflage design for these clones, since this Kashyyyk veteran exhibits yet another pattern.

**AT-RT Driver**

2011, REVENGE OF THE SITH/TVC

While the paint job is similar to some past clone figures, this is an all-new sculpt for the basic line, with a much sharper look.

### AT-TE Tank Gunner (Clone Army)

2005 | REVENGE OF THE SITH/ROTS

Among the unusual features of this basic-line figure are shoulder plates that detach, and a unique tan and gray "top-helmet" piece over the regular helmet. The All Terrain Tactical Enforcer is a walking tank that foreshadows the taller AT-AT Imperial walkers. It can carry troops, AT-RT walkers, and other equipment. Its shielding protects it from ion cannon blasts.

**Clone Trooper (AT-TE)**
2008, THE CLONE WARS/TCW BLUE VEHICLE

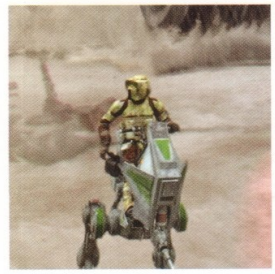

A gunner aboard a giant All Terrain Tactical Enforcer, this clone is a slight variation of the Christophsis trooper.

**Clone Captain Fordo (Hunt for Grievous)**

2006 | CLONE WARS/TSC BATTLE PACK

Captain Fordo, leader of a task force known as the Muunilinst 10, commands four other troopers in this pack. He is a repaint and mash-up of three earlier figures: a head from a clone trooper captain, the body of a clone commander, and the pauldron of an ARC trooper. Known for his aggressive fighting, Fordo always uses firepower over finesse. He was once awarded the Chancellor's Service Medal, but refused to accept.

*Star Wars: The Clone Wars*

**Clone Captain Rex (Mail-Away)**
2008, THE CLONE WARS/TCW BLUE MAIL-AWAY

Captain Rex was a sneak peek figure with a card that becomes a diorama. Here, Rex is a "shiny," a word the series uses for "newbie."

**Clone Captain Rex I**
2008, THE CLONE WARS/TCW BLUE

The carded Rex underwent several changes in a short period: from very dirty, to fairly clean with damaged stripes, to clean but with lighter blue stripes.

**Clone Captain Rex II**
2008, THE CLONE WARS/TCW BLUE

This is a sort of clean but clearly battle-worn version of Rex.

*Star Wars: The Clone Wars*

**Clone Captain Rex III**
2008, THE CLONE WARS/TCW BLUE

This is the third and final running change on the carded figure. The blue is lighter and more authentic to Captain Rex's uniform in the animated series.

**Clone Captain Rex (Rookies, with Trooper Fives)**

**Clone Captain Rex (Rocket & Propulsion Packs)**
2011 | THE CLONE WARS/TCW BLUE SKIES

Finally, a new and heroic sculpt of Captain Rex to support the massive new rocket and propulsion packs. Rex serves under Anakin Skywalker in the Clone Wars as commander of Torrent Company, part of the 501st Legion. He often works closely with Commander Cody, who serves under Obi-Wan Kenobi.

**Clone Captain Rex (Cold Assault Gear)**

**Clone Captain Rex**
2012, THE CLONE WARS/TPM 3D TCW

**Clone Commander**
**(Clone Trooper Army)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

The best Republic leaders were smart enough to treat clones as individual people.

**Clone Commander (with Yoda)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

Like the other two in this pack, the yellow-striped commander is also a repaint of a previous red-striped clone trooper captain.

**Clone Commander**
2005, CLONE WARS/CLONE WARS

While the word *yellow* is often used as slang for coward, it clearly doesn't mean that in the Clone Wars, since commanders wear it.

*Attack of the Clones*

**Clone Commander (Battle Gear)**
2005, REVENGE OF THE SITH/ROTS

The clone commander, who wears armor similar to that of an ARC trooper, comes with a movable visor, shoulder pauldron, two blasters, a rifle, and a zip line.

**Clone Commander (Battle Gear)**

2005 | REVENGE OF THE SITH/ROTS

This is the green version of the ROTS clone commander, which was produced as a running change in the line. While major changes of a figure on the same card can lead to increased sales, it can also confuse some potential buyers who think they've already purchased that specific figure.

*Attack of the Clones*

**Clone Commander (Troop Builder 4-Pack)**
2005, REVENGE OF THE SITH/OTC MULTIPACK

Yellow markings indicate a commander in the clone ranks in Episode III.

The same commander figure also comes with battle damage.

**Clone Commander (Mace Windu's Attack Battalion)**

*Revenge of the Sith*

**Clone Commander Bacara**
2009, REVENGE OF THE SITH/LC RED

In the world of toys, it's not unusual to produce a dirtied figure first (Bacara from 2008) followed by one with clean armor.

**Clone Commander Bly (Battle Gear)**

2005 | REVENGE OF THE SITH/ROTS

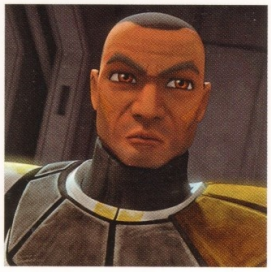

The elaborately decorated Commander Bly seems ready to blend in with the colorful flora of Felucia. But when Order 66 is issued, he turns on Jedi Aayla Secura. This Bly has yellow shoulder and ankle joints and brown dirt stripes on his upper legs. His helmet and chest stripe are also darker. But there are versions with white joints, no brown dirt, all yellow stripes, and no battle damage on his boots.

**Clone Commander Bly (Betrayal on Felucia)**
2007, REVENGE OF THE SITH/TAC BATTLE PACK

This version of Bly, packed with three other Star Corps troopers and Jedi Aayla Secura, is a clean repaint of earlier battle-worn figures.

**Clone Commander Cody**

2010 | THE CLONE WARS/TCW BLUE SKIES

The repaint on the third-season version of Commander Cody is more light brown than the previous shade of orange. Cody has long shown the ability to think independently. He starts out as a captain under General Kenobi, but is quickly recommended for a promotion because of his ability to lead other clones and his impressive tactical skills. The men develop a deep mutual respect for each other—making the sudden onslaught triggered by Order 66 even more shocking.

**Clone Commander Cody**
2010, REVENGE OF THE SITH/TVC

Cody is a repaint of the updated 2009 figure, correcting some details and getting the belt right side up.

**Clone Commander Cody**
**(Jet Propulsion Pack)**

**Clone Commander Keller (with Galactic Marine)**

**Clone Commander Neyo (Treachery on Saleucami)**

2007 | REVENGE OF THE SITH/ TAC BATTLE PACK

A repaint and retooling of a 2003 basic clone trooper, Neyo has a new head and better positioned legs and hands to ride the included BARC speeder . . . from which he assassinates Jedi Stass Allie on Saleucami. He comes packed with a clone trooper to aid his treacherous act after receiving Order 66.

**Clone Commander Ponds**

2008, DARK TIMES COMIC/TAC ORDER 66

Vill uses a body and a head from two past clones and gets a repaint too.

**Clone Commander Wolffe**
2011, THE CLONE WARS/TCW BLUE SKIES

The head sculpt—with a prominent injury caused by Asajj Ventress—along with a beautiful paint job on the armor, make Commander Wolffe an imposing figure.

**Clone Commander Wolffe**

2012 | THE CLONE WARS/TPM 3D TCW

Just a year after his first appearance, Commander Wolffe has a totally new action figure and a huge new weapon to accompany him. Wolffe, who loses his right eye in a fight with Asajj Ventress, serves under Jedi General Plo Koon as leader of the 104th Battalion's Wolfpack Squad. He is known as a problem-solver and skilled strategist. While having the deepest respect for Plo Koon, Wolffe thinks far less highly of the human Major Kendal Ozzel, who operates separately from the Jedi and the clone army.

**Clone Commando (with Super Battle Droid)**
2007, STAR WARS TALES COMIC/
TAC COMIC PACK

**Clone Pilot (with Firing Cannon)**
2005, REVENGE OF THE SITH/ROTS

Only the elite fly the Republic ARC-170 starfighter. The two identical pilots in this pack are colorful repaints of a 2005 pilot.

**Clone Pilot (with Firing Cannon)**

**Clone Pilot Goji**

**Clone Pilot Odd Ball**
2008, THE CLONE WARS/TCW BLUE

How could you not love a clone with a name like that? The figure is a basic clone trooper with a new helmet sculpt. There isn't a Republic fighter that he can't fly.

**Clone Pilot Davijaan (Odd Ball)**
2012, REVENGE OF THE SITH/TVC

So now you know Odd Ball's real name. This is the way he would have looked if he had appeared in Episode III. Odd Ball has also been in novels, comics, and a video game.

**Clone Pilot Warthog (with Y-Wing Scout Bomber)**

**Clone Trooper (with Speeder Bike)**
2003, CLONE WARS/CLONE WARS DELUXE

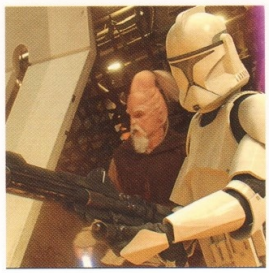

This clone trooper, based on the TV microseries, has snap-on armor, a throwing arm activated by a button, and widespread legs to fit on the included speeder bike.

*Attack of the Clones*

**Clone Trooper**
2003, CLONE WARS/CLONE WARS

With simplified lines and some exaggerated flaring on the helmet, the standard clone trooper goes from the large screen to the somewhat smaller home screen.

**Clone Trooper I (Clone Trooper Army)**
2003 | ATTACK OF THE CLONES/CLONE WARS MULTIPACK

Read carefully, because there will be a quiz! The Clone Trooper Army three-packs were released with figures permanently locked into four different poses: lying flat, kneeling, legs spread and holding electrobinoculars, and standing. All the figures came in white. Then came color variations: flat also came with red markings, kneeling with green, legs spread with yellow, and standing with blue. So that makes eight variations. If you shopped carefully, you could get every variety by buying five packages, for a total of fifteen figures.

**Clone Trooper**
2003, ATTACK OF THE CLONES/CLONE WARS

This is the plain-vanilla version of the clone trooper introduced at the end of Episode II. With fourteen points of articulation, it can kneel, run, and more. It came packed facing left or facing right.

**Clone Trooper II (Clone Trooper Army)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

Clone troopers were supposed to be identical because they were all cloned from Jango Fett. And certainly their standard armor was.

**Clone Trooper III (Clone Trooper Army)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

The clones started to develop individual personalities as they were pressed into battle and found themselves under pressure.

**Clone Trooper IV (Clone Trooper Army)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

Many clone troopers even developed different looks by how they styled or cut their hair, tattoos, and even through the aging process.

**Clone Trooper (with ARC Trooper)**
2003, ATTACK OF THE CLONES/
CLONE WARS MULTIPACK

In late 2003, Hasbro offered three unusual double-packs (for the price of one figure). This trooper is based on the red-striped captain from the Star Wars Saga line.

This trooper comes with an alternate clone pilot helmet with attached chest pack. He may also be an engineer. Yellow signifies his rank as commander.

**Clone Trooper**
**(Quick-Draw Attack)**

2005 | REVENGE OF THE SITH/ROTS

As red as a ripe cherry, the second version of the quick-draw attack trooper better be fast since he draws a lot of attention to himself. The armor matches the red shock trooper seen on Coruscant and Mustafar. Squeeze his legs together and he'll raise his right arm to shoot you.

**Clone Trooper (DVD Collection)**
2005, CLONE WARS/
CLONE WARS COMMEMORATIVE

This Wal-Mart-exclusive trooper uses the basic line's trooper body with an updated helmet.

**Clone Trooper (ROTS)**
2005, REVENGE OF THE SITH/ROTS EVOLUTIONS

This Target-exclusive deco version of a super-articulated clone trooper also has a new helmet. The front label and cardback use the Target name.

**Clone Trooper I (Build Your Army)**

2005 | REVENGE OF THE SITH/ROTS DELUXE

It's time to build another clone army, this time with the new design of the Episode III uniforms. These six variations all use parts from the Episode II figure Build Your Army molds but have new helmets and torsos based on *Revenge of the Sith*. Once again, you need to buy four packs of three figures each to get the six variations.

**Clone Trooper (Clone Attack on Coruscant)**
2005, REVENGE OF THE SITH/ROTS BATTLE PACK

This Target-exclusive five-pack contains a commander and four of the same troopers. They are repaints of the deluxe trooper with the firing jet backpack.

**Clone Trooper II (Build Your Army)**
2005, REVENGE OF THE SITH/ROTS DELUXE

Kneeling on one knee gives more stability, especially when you can't move.

**Clone Trooper III (Build Your Army)**
2005, REVENGE OF THE SITH/ROTS DELUXE

This trooper is *not* lying down on the job! He actually can't stand up.

**Clone Trooper IV (Build Your Army)**
2005, REVENGE OF THE SITH/ROTS DELUXE

The blue trooper is prone. And he's going to stay that way.

**Clone Trooper V (Build Your Army)**
2005, REVENGE OF THE SITH/ROTS DELUXE

The green trooper kneels on his right knee.

**Clone Trooper I (DVD Collection 3)**

2005 | REVENGE OF THE SITH/ROTS MULTIPACK

Originally released as Build Your Army three-packs with four different color schemes, this is yet another color variation. And there are further variations; the two standing clones have one dirt deco while the third clone, in a kneeling position, has a different one. All of the troopers with color are from concept art, not seen on screen.

**Clone Trooper VI (Build Your Army)**
2005, REVENGE OF THE SITH/ROTS DELUXE

The red trooper is a stand-up guy.

**Clone Trooper II (DVD Collection 3)**

**Clone Trooper (Troop Builder 4-Pack)**

2005 | REVENGE OF THE SITH/OTC MULTIPACK

Based on the plain white clone trooper from the 2003 Clone Wars line, the figures in the four different Troop Builder four-packs have plenty of variations. The closest to the original figure is this one (there are four identical ones in the pack), except that it has holes in its soles so it can stand on a pegged figure base.

**Clone Trooper (Troop Builder 4-Pack)**
2005, REVENGE OF THE SITH/OTC MULTIPACK

**Clone Trooper (Troop Builder 4-Pack)**

**Clone Trooper (Mace Windu's Attack Battalion)**
2006, EXPANDED UNIVERSE/TSC BATTLE PACK

Unlike their commander, the troopers are repaints of a shock trooper figure with an added shoulder pauldron available courtesy of Commander Bacara.

**Clone Trooper (Utapau)**

2006 | REVENGE OF THE SITH/TSC

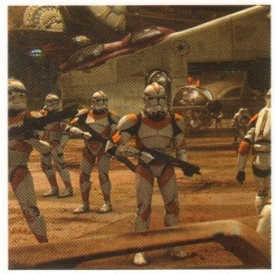

This repaint of a super-articulated clone trooper was a good army builder. Obi-Wan led a large invasion force to Utapau, so there was plenty of source material for action figures. Utapau is an arid and windy planet dominated by deep sinkholes. Its native Pau'ans and Utai live on carved-out levels of the sinkholes. The planet was not a member of the Galactic Republic when General Grievous brought members of the Separatist Council there.

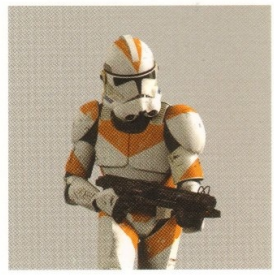

**Clone Trooper (Fifth Fleet Security)**

2006, EXPANDED UNIVERSE/TSC

This battle-worn trooper is another repaint of the standard white clone, although a similar color scheme is used on a deluxe trooper set.

2008 | THE CLONE WARS/TCW BLUE

Hasbro released the basic white clone figure in clean and very dirty deco jobs. Your fastidious mother wouldn't approve of this one. These figures were released shortly before the theatrical release of the CG-animated movie *Star Wars: The Clone Wars* in August 2008.

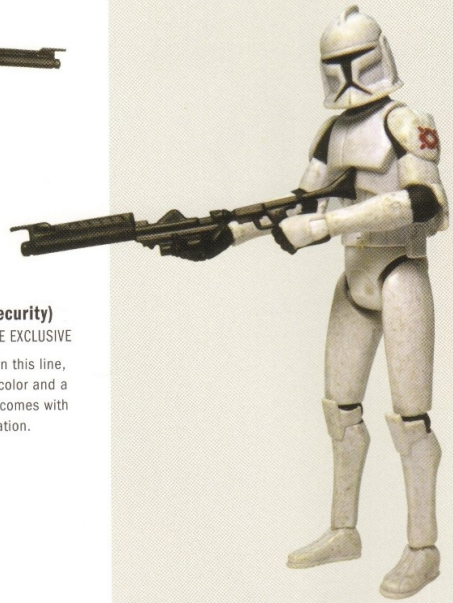

**Clone Trooper (Space Gear)**

**Clone Trooper**

2010 | REVENGE OF THE SITH/TVC

This amalgam of two earlier figures is a great example of how to drive hard-core collectors nuts. After the first release, a running change was made to assemble the belt correctly for the first time. Then a second change was made to get the correct deco on the helmet. So if you need every variation–good luck! (The final version is shown here.)

**Clone Trooper Echo**

2009 | THE CLONE WARS/TCW RED

**Count Dooku (Dark Lord)**

*Attack of the Clones*

**Darth Tyranus (Force-Flipping Attack)**
2002, ATTACK OF THE CLONES/SWS DELUXE

Count Dooku/Darth Tyranus may look like an old man, but apparently the Force flip is with him. He can spring off a launching platform, flip, and land on a magnetic base.

**Count Dooku**
2003, CLONE WARS/CLONE WARS

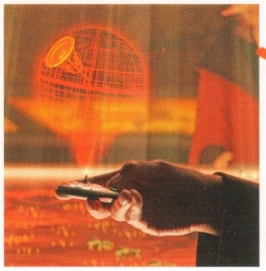

The animated leader of the Separatists has been stylized with flattop hair and dark, arching eyebrows.

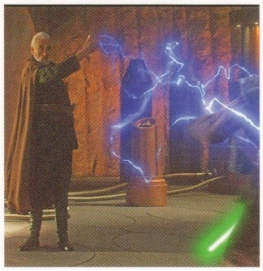

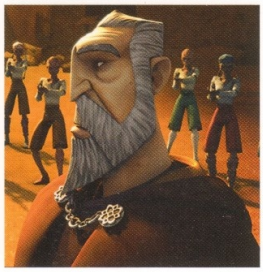

**Darth Tyranus (Geonosian Escape)**

2003 | ATTACK OF THE CLONES/SWS

Tyranus? Why, he looks just like Count Dooku! This version of the Count/Sith Lord has lightsaber-dueling action when his legs are squeezed together. Dooku/Tyranus had been a Jedi Master as well as the heir to a fortune and a noble title. He was an accomplished swordsman, an instructor at the Jedi Temple, and Master and mentor to Qui-Gon Jinn. But after decades in the Jedi Order, he becomes disaffected and falls under the sway of Darth Sidious. He replaces Darth Maul as the Sith Lord's apprentice.

The speeder bike in this set is a repaint of a movie version of the bike Dooku uses in Episode II on Geonosis. In the animated movie *Star Wars: The Clone Wars*, Dooku uses it to speed across the Tatooine desert to confront Anakin Skywalker and lie to Jabba the Hutt, claiming that the Jedi have kidnapped his son Rotta the Hutt.

1998 | DARK FORCES VIDEO GAME/POTF2 3D SCENE

In one of the most ambitious packaging projects ever done for the *Star Wars* line, Hasbro released nine Expanded Universe figures from video games, novels, and comics on 3-D pop-up cards that become environments for the figures. The thick cards need to be cut around three sides on the back, and the hinged "set" then opens. This is the Phase III Dark Trooper, being developed in secret to put an end to the Rebellion. **Darth Malak (Sith Lord)**
2007, KNIGHTS OF THE OLD REPUBLIC VIDEO GAME/TAC

Malak is a Dark Lord during the Jedi Civil War more than four thousand years before the Battle of Yavin.

**Darth Maul (Jedi Duel)**

1999 | THE PHANTOM MENACE/EPISODE I

No one was quite prepared for the popularity of the evil Sith apprentice who had relatively little face time in the movie. But Darth Maul was the breakout character. Unfortunately, the face sculpt on the first figure released leaves a lot to be desired. So does the first paint job, which features an incorrect tattoo pattern and an almost pink chin. That was corrected, and the new version shipped in cases with nothing but Darth Maul figures, since they couldn't be kept in stock.

**Darth Maul (Tatooine)**
1999, THE PHANTOM MENACE/EPISODE I

This was the first Maul figure to come with a removable flexible plastic cape and hood. When Maul's double-bladed lightsaber has only one blade, it looks a bit out of proportion to the figure.

**Darth Maul**
1999, THE PHANTOM MENACE/EPISODE I DELUXE

Maul was one of three unique figures that came with a lightsaber hilt that attached to its back. A push of the handle swivels his hips; a push of a button moves his arms.

**Darth Maul (Sith Lord)**

Later in the year, a Maul figure with a cloth "skirt" was released. Another special feature: removable lightsaber blades, so Maul can use just one, as in the film.

Darth Maul returns from the dead in this "imaginary" comic story prior to *The Clone Wars* Season 4 final episode, where the event occurs. In the story, Maul returns from the dead to hunt down Obi-Wan, the Jedi who cut him in half. Owen Lars has to fight Maul to protect the life of his nephew Luke Skywalker. The concept was so well received that it was basically adopted for the TV series.

# Darth Vader

**Darth Vader**

1978 | STAR WARS/SW 12-BACK

The popular Vader figure didn't change during the vintage period. There were a handful of prototypes with double-telescoping lightsabers that command top prices today. The story of Anakin Skywalker, who falls to the dark side and becomes the evil Sith Lord Darth Vader, is at the center of the *Star Wars* saga. It is a story of a young slave boy with strange powers who grows up to be a renowned Jedi, only to fall to the dark side because of his anger and his fear of loss. Vader is the standard-bearer of Emperor Palpatine's reign of terror until, at last, Vader's son Luke refuses to believe there is no good left in his father and ultimately leads him to redemption.

**Darth Vader with Removable Cape**

1995, STAR WARS/POTF2 RED

The first new-wave Vader, besides being more muscular, used both gloss and matte black paint to distinguish between the cloth and the harder parts of the costume.

**Darth Vader (Classic Edition 4-Pack)**

1995, STAR WARS/POTF2 RED

This remake of the vintage Vader figure has a wider slot under his right arm for his less colorful lightsaber. There are round instead of hexagonal holes in the shoe soles.

**Darth Vader (vs. Prince Xizor)**

1996, SHADOWS OF THE EMPIRE/SOTE

Vader never has a direct duel with Prince Xizor in the Expanded Universe. This Vader pose has been tweaked from a figure released a year earlier.

**Darth Vader (Power F/X)**

1998 | STAR WARS/POTF2 FLASHBACK

In the lead-up to the release of Episode I, Hasbro released a sub-line of figures on Episode I Flashback Photo cards. Through a simple paper technique, a photo to the left of the figure could go from a classic figure to the way the character appeared in Episode I; at least that was the idea. It works with Vader, whose flashback photo is young Anakin Skywalker. But so is Luke Skywalker's! Still, there is an explanation on each card as to why the seemingly strange links make sense.

**Darth Vader (Holiday)**

2004 | EXPANDED UNIVERSE/OTC EXCLUSIVE

After a few years of doing holiday figures based on Lucasfilm cards designed by Ralph McQuarrie, Hasbro decided on a different direction. It took a Darth Vader figure that had been released at least four prior times, coated it in glossy red, and placed it on a base with a wreath and ribbon. Tongue in cheek, but not written that way, the card back says that after a tough year of crushing Rebels, terrorizing planets, and choking underlings, Vader decides he "needs to give in to the fun side of the Force." It was the fans who rebelled, making this the final holiday figure.

Dash is the stand-in for a missing Han Solo in the *Shadows of the Empire* novel, comic, and video game.

**Death Star Droid**

1979 | STAR WARS/SW 20-BACK

The silver droid with an insectoid head also appears in *Star Wars* in gold and black versions. This was later dubbed an RA-7 series droid. Similar to the 3PO series of protocol droids, the RA-7 model is of lower intelligence and capacity. However, it has a hidden built-in surveillance system that is widely used by Imperial Intelligence.

**Dengar**

1981 | THE EMPIRE STRIKES BACK/
TESB 41-BACK

In bandages and scavenged Imperial armor, the bounty hunter embodies the expression *galaxy-weary*. Dengar is from the same planet as Han Solo, Corellia. In fact, according to the EU, they tangle in a swoop race where Dengar sustains life-threatening injuries. This makes him even more anxious to find Solo for Darth Vader.

**Destroyer Droid**

1999 | THE PHANTOM MENACE/EPISODE I

Destroyer droids, also called droidekas, roll out in a ball before standing up and firing. They are much more reliable than the usually ineffective battle droids. There aren't more of them available because they are much more expensive to produce than the almost-disposable battle droids.

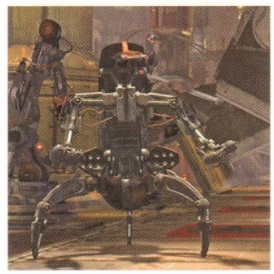

**Depa Billaba (Jedi High Council)**

This destroyer fires laser blasts from its two cannons. A lever in the rear makes the arms go back and forth for "blasting action."

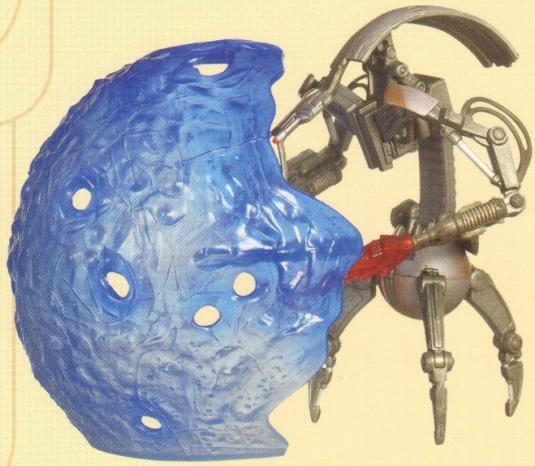

**Destroyer Droid Rolled (Battle Launcher)**
2003, ATTACK OF THE CLONES/ CLONE WARS DELUXE

This is a simpler version of a destroyer droid, but it comes with a launcher that spins it out with the pull of a strap.

**Destroyer Droid Unrolled (Battle Launcher)**
2003, ATTACK OF THE CLONES/ CLONE WARS DELUXE

Packed with the rolled droid, this is the plainest battle-ready destroyer droid yet when it comes to action and deco.

**Destroyer Droid (Droideka)**

2007 | ATTACK OF THE CLONES/TAC

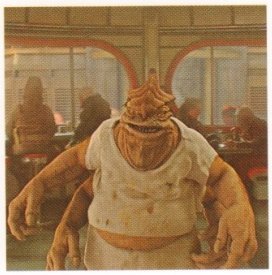

A repainted kit-bash of destroyers from 1999 and 2002, the droideka comes with half an energy shield, which can form a full dome with a second purchase. The destroyers's personal energy shields are one of their major selling points, since they can deflect or absorb just about any kind of light to medium projectile and rebuff lightsaber blades. The shields are fusion-generated from a sphere at the junction of the droids's legs.

**Destroyer Droid (Firing Arm-Blaster)**

**Dice Ibegon (with Trinto Duaba)**

He is musical, like many Rodians, and takes on gigs at the Mos Eisley cantina and with the Rebo band at Jabba's palace.

Priest, a Mandalorian trainer, is based on a repainted 2004 Boba Fett figure with a new head, torso, and belt.

**Droopy McCool (Max Rebo Band)**

1983 | RETURN OF THE JEDI/ROTJ PLAYSET

Poor Droopy didn't get his name on the open-window Sy Snootles and the Rebo Band box that he was packed in—the first time Kenner sold three related figures together as part of its regular line. The flute that he's playing was made from a hollow chidinkalu plant from his home planet of Kirdo III. That's one small part of a large backstory for even the most minor of film characters.

**Droopy McCool (with Barquin D'an)**
1998, RETURN OF THE JEDI/POTF2 2-PACK

Droopy has a much more detailed paint job than the vintage-line version, but the Kitonak flute player is as chubby as ever.

This version of Droopy is a slight repaint from the 1998 figure.

**Dulok Shaman**

1985 | EWOKS/EWOKS

Even though the *Ewoks* animated series lasted two seasons compared to *Droids'* one, only six figures were produced, compared to twelve for *Droids*. The Duloks, who fought the Ewoks on Endor, had a limited life outside the *Ewoks* television series, appearing as action figures, in a few storybooks, and in a short 1986 Ice Capades segment titled "The Ewoks and the Magic Sunberries."

## Durge

2003 | CLONE WARS/CLONE WARS ANIMATED SERIES

Durge, a striking-looking bounty hunter, had a short but active life in the *Star Wars* Expanded Universe. Although the character appears in the *Clone Wars* micro-series on Cartoon Network, the design was developed by Lucasfilm. Durge was going to have a more important role in the final season of the series until George Lucas decided he wanted the show to introduce his Episode III villain, General Grievous.

**Durge (Commander of Separatist Forces)**
2003, CLONE WARS/CLONE WARS

The character ID for the "real life" version of Durge as well as the figure's complexity hint at the important role he was going to play.

**Durge (with Swoop Bike)**
2003, CLONE WARS/
CLONE WARS DELUXE

A somewhat simplified version of the "real world" Durge comes packed with the warrior's swoop bike.

It took thirty years for this cantina background alien to be immortalized in plastic. He looks a bit like the tortured soul in *The Scream*.

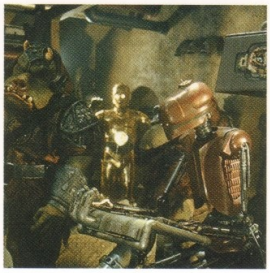

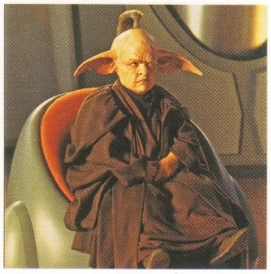

**Ellorrs Madak (Fans' Choice)**

2001 | STAR WARS/POTJ

Madak is first seen in the Mos Eisley cantina. When Hasbro started surveying fans about what unmade action figures they'd like to see, they voted for this Duros as the first. George Lucas likes the look too, since bounty hunter Cad Bane is a Duros, and the species was the basis for another bunch of bad guys, the Neimoidians in the prequels.

Piell is killed (we hope for the last time) in the episode "Citadel Rescue."

**Even Piell (Jedi High Council)**

2003 | THE PHANTOM MENACE/SWS SCREEN SCENE

A diminutive but fierce fighter, Piell is seen in Episodes I and II. The poor guy has been killed off twice. The first time was in the 2008 novel *Coruscant Nights I: Jedi Twilight*. However, the makers of the animated series, who work many years out, didn't know that. In 2011, they needed a prominent Jedi to kill off during Season 3—the time frame of which takes place before the novel. After being attacked by an anooba, Piell dies in the arms of Ahsoka Tano. A slight repaint was released in 2008.

**Ewok**
1998, RETURN OF THE JEDI/
POTF2 COMPLETE GALAXY

Revealed inside a globe of a miniature Forest Moon of Endor, this generic Ewok soars and readies his primitive, yet effective, weapons.

**Ewok (Assault on Endor)**
2004, RETURN OF THE JEDI/SWS ULTRA

This unnamed Ewok comes with a hang glider and rock "bombs" in addition to his spear. He was later given the name Tokkat. The figure bears some similarities to the Teebo figure released in 2002.

**2-Headed Announcer (with Jabba the Hutt)**

1999 | THE PHANTOM MENACE/EPISODE I CREATURES

There are two distinctly different versions of the two-headed announcer who does the play-by-play at the Boonta Eve Podrace in Mos Espa. Because of the long production cycle of toys, this version of what came to be called Fodesinbeed is based on the two actors in makeup who voice the role. When it was decided that test footage of those heads on CG bodies didn't look good, the entire character was created digitally.

**Gamorrean Guard**

1983 | RETURN OF THE JEDI/ROTJ 65-BACK

Powerful but stupid, the "pig" guards keep Jabba's palace safe for villainy. Their vibro-ax weapon is quick and lethal. The Gamorrean society is a matriarchy: ownership of land is passed down through females, who also do all of the productive work. The males fight. When they're not fighting, they're training for the next fight.

2005 | CLONE WARS/CLONE WARS

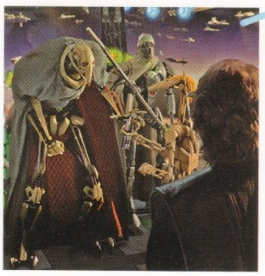

George Lucas decided to introduce one of the Episode III villains in the *Clone Wars* micro-series. The animated version of Grievous is a force to reckon with. In the final three episodes of the *Clone Wars* series, Grievous leads a huge battle force to attack Coruscant. His main target, it later becomes clear, is Chancellor Palpatine. In the final episode, with Coruscant under a withering siege, the cyborg general kills two Jedi and abducts Palpatine . . . leading to the start of Episode III.

**The Demise of General Grievous**
2006, REVENGE OF THE SITH/TSC EXCLUSIVE

The gory end of Grievous is a reworking of several earlier figures with a special paint job, damaged forearms, and modified eye sockets so flames can plug in.

**Concept General Grievous**
2007 | EXPANDED UNIVERSE/TAC SIGNATURE

This is Episode III artist Warren Fu's original concept of Grievous, protected by a smooth metal casing. George Lucas had given the direction that he wanted a "droid general" to lead the Separatist army, but with a frightening visage and not reminiscent of Darth Vader. Fu saw the complex plastic spray top of a bottle of household cleaner and was inspired by its shape. Thus the half-alien, half-mechanical cyborg general began to take shape.

General Dodonna is the strategist who briefs the Rebel pilots about the Death Star's vulnerability. The figure's accessories include three ceremonial medals; maybe there's one for Chewie after all.

**General Grievous (Hunt for Grievous)**

2011 | THE CLONE WARS/TCW BLUE SKIES BATTLE PACK

Grievous is the basic figure that comes with the Attack Cycle, but he looks very different in this incarnation, thanks to his first two-layer soft-goods cape in this line.

A brilliant Rebel strategist, the general apparently is also a good plumber. Well, that looks like a *Star Wars* plunger to us!

**General Madine (Imperial Shuttle Capture)**
2004, RETURN OF THE JEDI/SWS

General Crix Madine is the strategist behind the Rebel victory in the Battle of Endor. This is the first update of his figure since the vintage line.

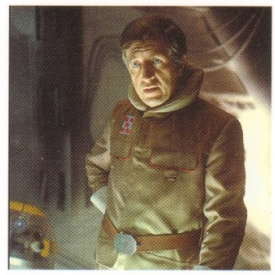

**General McQuarrie (Rebel Officer)**

2007 | THE EMPIRE STRIKES BACK/TAC

This tribute figure to the original trilogy's iconic concept artist is based on his brief appearance in *Empire*. It uses mostly parts from the 2006 Major Bren Derlin figure. McQuarrie had done some concept art on a proposed movie for friends of George Lucas. When the two men met, they hit it off, and they worked together to develop many of the now-iconic characters and settings of the original *Star Wars* trilogy. Some of the artist's fully painted scenes helped reassure Fox that the movie was worth a gamble.

**Flying Geonosian (with Sonic Blaster)**

2002 | ATTACK OF THE CLONES/SWS DELUXE

This Geonosian flaps its wings with the push of a button on the back and can fire a projectile from its sonic blaster. Most Geonosian warriors, like this one, carry a powerful, handheld sonic blaster as their weapon of choice. Patterned after the larger Geonosian sonic cannon emplacements, it can cause instant death of a living being by rupturing its internal organs. It can also shatter inanimate targets.

**Geonosian Handler (with Massiff)**

**Greedo (with Cantina Bar Section)**

2002 | STAR WARS/SWS CANTINA

There were supposed to be six separate figures in this line, each carded with a section of the cantina bar that could be all hooked together. The sculpt of Greedo, like most of the others, has been released before, but the deco is freshened. ## Hammerhead

1979 | STAR WARS/SW 20-BACK

Like the other Mos Eisley cantina denizens who flash by on-screen, the Ithorian known as Hammerhead was later given a proper name and huge backstory in the Expanded Universe. As Momaw Nadon, the story goes, he was exiled from Ithor for revealing secrets about it agricultural technology to the Empire. Nadon really has no choice, and he talks under the threat of the planet's sacred jungle being destroyed by turbolasers. Eventually his exile ends and he returns home.

# Han Solo

**Han Solo**

1978 | STAR WARS/SW 12-BACK

Although the story isn't totally clear, the first Han Solo was released with both small and larger heads—each a completely different sculpt. The small-head version shown here seems like a more accurate portrayal than the large-head version, which lasted through the entire vintage line. There is some indication that the two versions came from different factories in Asia.

**Han Solo (Large-head version)**
1978, STAR WARS/SW 12-BACK

This large-head Han Solo is the version Kenner chose to stick with.

**Han Solo (Hoth Outfit)**
1980, THE EMPIRE STRIKES BACK/

On a mission to find Luke, Han is bundled in a jacket that appears blue on-screen but is dark brown in the Lucasfilm archives.

**Han Solo (Bespin Outfit)**
1981, THE EMPIRE STRIKES BACK/
TESB 41-BACK

Han actually wears this outfit on Hoth as well as on Bespin. His pants are not as brown as they look here nor as blue as they appear on-screen—but somewhere in between.

**Han Solo (in Trench Coat)**
1983, RETURN OF THE JEDI/
ROTJ 77-BACK

A more mature-looking Han shows the difficulty of mass-producing clothing for figures less than four inches tall. The coat's collar came with and without the camo design.

**Han Solo (in Carbonite Chamber)**
1985, RETURN OF THE JEDI/POTF 92-BACK

While a one-piece Han molded in a carbonite block was released with the *Slave I* toy vehicle, this is the first removable jointed action figure to come with its own "prison."

**Han Solo**
1995, STAR WARS/POTF2 RED

Hasbro was convinced that a new generation of kids demanded a more muscular superhero-type action figure—which proved wrong when it came to *Star Wars*. Fans demanded movie-accurate figures.

**Han Solo in Stormtrooper Disguise**
1995, STAR WARS/POTF2 MAIL-AWAY

This exclusive promotional figure from Kellogg's Froot Loops came with no weapons.

**Han Solo in Hoth Gear**
1996 | THE EMPIRE STRIKES BACK/POTF2 RED

The second version of Han on the ice planet Hoth sparked a huge debate among hard-core fans: was his jacket brown as in this version, or blue like the vintage version (and like it seemed to be on-screen). This figure also had a running change to modify Han's right hand so that it could hold his blaster.

From Top:

**Han Solo (Classic Edition 4-Pack)**
1995, STAR WARS/POTF2

In addition to being shorter and in a matte finish, this Han's hair and eyebrows differ from the vintage figure. His blaster is made of more flexible gray plastic.

**Han Solo in Carbonite Block**
1996, THE EMPIRE STRIKES BACK/POTF2 RED

Unlike the vintage version, Han's hands can be placed accurately in the carbonite—which is opaque instead of transparent—and there's a clip to secure the figure inside.

**Han Solo with Smuggler Flight Pack**
1996, EXPANDED UNIVERSE/POTF2 RED DELUXE

To add more play value at a higher price point, the toy makers stretched the limits of probability even within a fantasy universe.

**Han Solo in Endor Gear I**

**Bespin Han Solo**
1997, THE EMPIRE STRIKES BACK/POTF2 GREEN

Hasbro figures were starting to lose the muscle-bound look by the fall of 1997, but Han in his Bespin gear remains an exception.

**Han Solo (with Jabba the Hutt)**
1997 | STAR WARS/POTF2 GREEN

When Solo met Jabba. . . . In the original trilogy release, we don't meet Jabba the Hutt until *Return of the Jedi*. But when George Lucas released the *Star Wars Trilogy Special Edition*, he reinserted a cut scene and replaced a human stand-in with a digital Jabba. This figure has been resculpted and is a bit more svelte than the carded version; as in the scene, Han's shirt collar sticks out over his vest.

**Han Solo (Death Star Escape)**
1997, STAR WARS/POTF2 CINEMA SCENE

The Cinema Scene Han Stormtrooper has a slightly different pose than the mail-away version. It also comes with a blaster rifle.

**Han Solo (Princess Leia Collection)**

We'll admit it. With few exceptions, trying to mass-produce 1¼-inch-tall cloth jackets for action figures usually doesn't work.

**Han Solo (with Gunner Station)**

It's not hard visualizing the blaster flying from Han's grasp through Force power and landing in the hands of Darth Vader. The figure's arms and hands are jointed to allow Han to reach into his holster for his blaster. Also included are binders that cuff Han's hands after his capture.

This figure scores with a beautiful and detailed new sculpt, fourteen points of articulation, and a gun holster that's actually functional.

Remember Han wearing his AT-ST driver's outfit and tricking the . . . Well, don't worry, because in the movie we saw, you might have missed him. In fact, this figure caused quite a debate in the fan community. Han is seen briefly in the driver's helmet in a grainy transmission that tricks the Imperials into opening the Endor bunker. This figure reuses a comic pack version of Han as Stormtrooper, with a new belt.

**Han Solo (Death Star Escape)**
2009, STAR WARS/LC RED

This kit-bashed figure with a new head uses parts from two previous versions of Han.

**Han Solo (Echo Base Outfit)**

**Han Solo (The Search for Luke Skywalker)**
2011, THE EMPIRE STRIKES BACK/TVC MULTIPACK

Silly hat? Blue vs. brown? It must be another Hoth Han—a repaint of a 2007 figure with new hips and thighs and a part-cloth parka.

**Han Solo (Trench Coat)**

2011 | RETURN OF THE JEDI/TVC

This figure, which first appeared as a Blu-ray commemorative piece, is a slight repaint of a 2009 version with a trench coat in a new fabric and pattern. This Han was also issued on a Revenge of the Jedi card.

**Hem Dazon**
2006, STAR WARS/TSC

This is the first-ever figure for this Mos Eisley cantina patron, which was known as T-Head during production.

**Hermi Odle (Baragwin)**
2007, RETURN OF THE JEDI/TAC

This big, smarmy slimeball is one of Jabba the Hutt's hired goons in *Return of the Jedi*.

Assembled from six parts included with other figures in a "build a droid" promotion, the HK means that this is a hunter-killer assassin droid—especially focused on Jedi. The droid is built by Sith Lord Darth Revan soon after the end of the Mandalorian Wars, some four thousand years before the destruction of the first Death Star.

**Hoth Rebel Soldier**

1997 | THE EMPIRE STRIKES BACK/
POTF2 GREEN

Hoth soldiers like this in *The Empire Strikes Back* were played by Norwegian mountain-rescue skiers who were used to the subzero temperatures and snow. Filming took place at Finse, Norway, the northernmost stop on the railway system between Oslo and Bergen. Hardangerjøkulen glacier stood in for the exterior of Echo Base on Hoth.

## IG-86 Assassin Droid

2008 | THE CLONE WARS/TCW BLUE

This all-new figure has an amazing twenty points of articulation. In a running change, the guns were painted bright metallic blue. The model officially is known as a "sentinel" droid and sold as a bodyguard or for home security. But many of the purchasers use it for more sinister purposes. Ziro the Hutt, who is behind the kidnapping of Jabba the Hutt's son Rotta, has several IG-86 droids in his employ. Cad Bane has also been known to use some.

**IG-86 (Ambush on the Vulture's Claw)**
2009, THE CLONE WARS/TCW BLUE BATTLE PACK

This sports a darker paint job than the first version of IG-86.

**IG-86 (with Cad Bane)**
2010, THE CLONE WARS/TCW BLUE SKIES

This is another repaint job, one that makes the droid's photoreceptors look like they are lighting up.

**IG-88 (Bounty Hunter)**
1980, THE EMPIRE STRIKES BACK/
TESB 31-BACK

In a running change, the paint job was upgraded to a fine glittery coating.

**IG-88 (vs. Boba Fett)**
1996, SHADOWS OF THE EMPIRE/SOTE

Paired in a deluxe two-pack with Boba Fett, IG-88 is even closer to the prop than the vintage version. It also has a rotatable hip for action play.

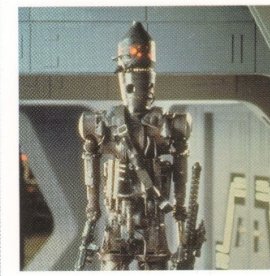

**IG-88 (Bounty Hunter)**
2000, THE EMPIRE STRIKES BACK/POTJ

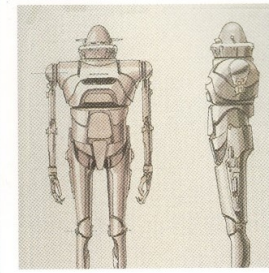

This was the most accurately sculpted IG-88 to this point. The head reflects all of the curves and lines of the original, the body is aged, and the bandolier is removable.

2009 | EXPANDED UNIVERSE/LC RED

Based on a sketch by concept artist Ralph McQuarrie, this initial version of IG-88 was more rounded and less spindly. The movie version ended up looking even less humanoid. In the Expanded Universe, there are only four IG-88 models, also known as Phlutdroids. They are obsessed with hunting and killing. As soon as they are activated, they kill their makers and later plan a "droid revolution" as a galaxy-wide takeover by droids of all descriptions.

**Imperial Engineer**
2008, BATTLEFRONT II VIDEO GAME/
TLC BLUE

The engineer is a repaint of a 2006 Death Star gunner with removable chest plate and helmet.

**Imperial Gunner**

1985 | RETURN OF THE JEDI/POTF 92-BACK

The gunners in *Star Wars* have body armor, so this is definitely the *Jedi* version, seen amidst troops awaiting the Emperor's arrival on the second Death Star. The gunners' helmets were nicknamed "jawbone" helmets because of the prominent section below the visor.

**Imperial Jumptrooper**
2008, THE FORCE UNLEASHED VIDEO GAME/TAC

Somewhere between a clone trooper and a Stormtrooper/biker scout, the jumptrooper is a close cousin of the EVO trooper. This has fourteen points of articulation.

**Imperial Jumptrooper (The Force Unleashed II)**

**Imperial Officer (Shield Generator Assault)**

2008 | RETURN OF THE JEDI/TLC BLUE BATTLE PACK

A redo of the 2006 Moff Jerjerrod figure, repainted with a new head, this may be the officer who called Han "You Rebel scum!" While many of the officers wore black uniforms, others of high rank wore gray or green-gray. The color seems to vary based on the lighting.

*Star Wars*

**Imperial Scanning Crew**
2009, STAR WARS/LC RED

This is a member of the crew who scans the *Millennium Falcon* after it is captured by the Death Star. This is an all-new sculpt, far less bulky than a previous version.

**Imperial Trooper**
2004, STAR WARS/OTC

Fans voted for this character because they needed more soldiers for their dioramas. It has more detailed deco.

**Imperial Sentinel**
1998 | DARK EMPIRE COMIC/POTF2 3D SCENE

No design gets wasted in the *Star Wars* universe! This sharp-looking figure is a character in Dark Horse's *Dark Empire* comic series. But before that, it was almost used in two other settings. The earliest was a concept painting for what became the more classic-looking Emperor's Royal Guard in *Return of the Jedi*. Then Kenner borrowed the design and suggested it as a new bad guy, Altha Prime, to be the center of the toy company's own Expanded Universe.

**Incinerator Troopers (with Darth Vader)**
2008, SW: THE FORCE UNLEASHED VIDEO GAME/TAC EXCLUSIVE

One of two twin terrors, identical repaints of a 2006 Shadow Stormtrooper, they fire powerful plasma rifles.

**Interrogation Droid (Death Star Accessory)**

**Interrogation Droid (with Black Hole Hologram)**
2010, MARVEL STAR WARS COMIC/ LC RED COMIC PACK

This comic book version of the IT-O has blast effects on its included clear base, which is a lot more dynamic than a thin, clear rod.

**Isabet Reau (Republic Elite Forces)**

A female Mandalorian who is in charge of an alt-training clone trooper, Isabet is new sculpt.

**Ishi Tib**

**J'Quille (Jabba's Sail Barge)**

**Jabba the Hutt**

1983 | RETURN OF THE JEDI/ROTJ PLAYSET

The galaxy's notorious crime lord wouldn't ordinarily fit our definition of an action figure because of his size and usual packaging. But since the sentient slug is such an important part of the saga, here he is in all his repulsive glory. In his first release as a vintage playset on a "throne" that has opening gates to drop opponents into a shallow prison, Jabba comes with a slave collar and his jester, Salacious Crumb. When you turn his head, the Hutt's tail swishes from side to side.

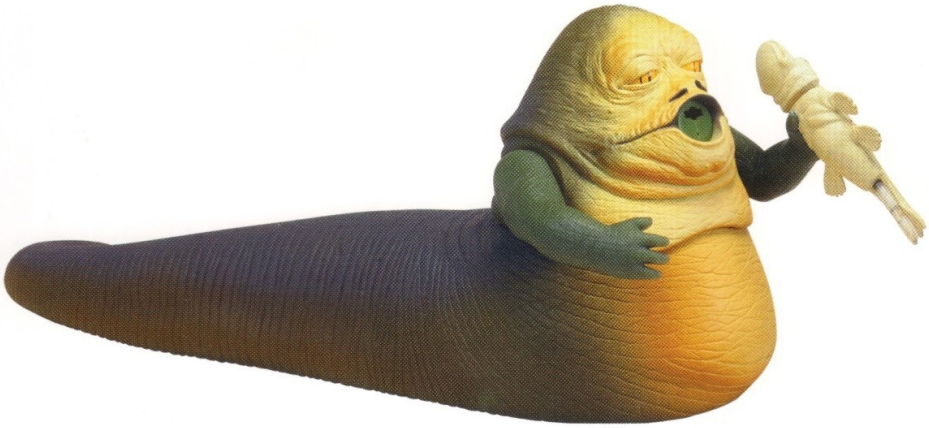

**Jabba the Hutt (with Han Solo)**

Just as Boba Fett was a sneak preview figure before Episode V, Jango Fett was one of four advance figures prior to Episode II.

**Jango Fett (Electronic Backpack)**
2002, ATTACK OF THE CLONES/SWS DELUXE

Jango's chest and lower arm armor are detachable, pressing his jet-pack button brings battle action sounds, and his blaster rifle fires a long projectile.

**Jango Fett (Kamino Escape)**

2002 | ATTACK OF THE CLONES/SWS

Jango's face can be revealed when his helmet is removed. He is ready for Obi-Wan in the battle in the rain on the surface of Tipoca City with a missile-firing jet-pack, a grappling hook, and two blasters. Although Boba Fett is similarly equipped in the original trilogy, this is the first time that we see a Fett actively use much of his intriguing equipment in a real battle.

**Jango Fett (Final Battle)**
2002, ATTACK OF THE CLONES/SWS

Jango mixes it up on the battlefield of Geonosis. His legs can be pushed back into a leaping pose, and he can fire a flame projectile from his arm gauntlet.

**Jango Fett (Slave I Pilot)**
2002, ATTACK OF THE CLONES/SWS

With a much-improved face sculpt, this figure actually looks like actor Temuera Morrison. When you press down his backpack missile, both arms spring up for quick-draw action.

**Jango Fett (Kamino Showdown)**
2003, ATTACK OF THE CLONES/SWS DELUXE

Sharing many parts with the 2002 Kamino Escape Fett, this version has magnetized arms to cling to a Tipoca City column after being snapped upward.

**Jango Fett (Episode II Set)**
2006, JANGO FETT/TAC COMMEMORATIVE

Jango's top half is from one past figure and his lower half from another, keeping him all in the family.

**Jango Fett (Droid Factory Capture)**

TAC BATTLE PACK

Push down his missile and his hands spring up. The figure takes the head of the sneak preview figure and the body of a Jango pilot figure.

## Jango Fett (Bounty Hunter)

2007 | ATTACK OF THE CLONES/TAC

This is another all-new Jango figure, but this time with a soft-goods poncho. Fett's helmet is the only part that has been used elsewhere. This is an unusual figure: with the poncho, the helmet and the armor removed, it becomes the Fett who meets Obi-Wan in his apartment on Kamino, dressed in a long-sleeved blue shirt and pants.

**Jar Jar Binks (Mos Espa Encounter)**

1999 | THE PHANTOM MENACE/EPISODE I CINEMA SCENE

Jar Jar's stomach gets the better of him in the scene that inspired this figure. He tries to grab a froglike creature before ending up in a confrontation with the arrogant Podracer Sebulba. Packed in the box with Jar Jar are Sebulba and young Anakin Skywalker. In the scene that features all three of them, the chub Jar Jar is reaching for with his tongue goes sailing into Sebulba's soup, but Anakin quickly puts an end to the brewing bellicosity of the angry Dug Podracer.

**Jar Jar Binks**
1999, THE PHANTOM MENACE/EPISODE I

The basic Jar Jar Binks figure has bent knees to better counterbalance his huge ears and also to make the figure a little shorter. He comes with a Gungan battle staff.

**Jar Jar Binks (with Kaadu)**
1999, THE PHANTOM MENACE/ EPISODE I CREATURES

This version of Jar Jar Binks has articulated legs and knees so the Gungan can mount the saddle aboard a kaadu in the battle against the Trade Federation.

**Jar Jar Binks (with Gungan Assault Cannon)**
2000, THE PHANTOM MENACE/ EPISODE I VEHICLE

Jar Jar is more accurately sculpted and painted in this version. His arms are molded to operate a Gungan assault cannon.

**Jar Jar Binks (Naboo Swamp)**
2000, THE PHANTOM MENACE/EPISODE I

This version of Jar Jar seems to have joints everywhere—legs, feet, arms, head—so that the Gungan can assume a swimming pose. He comes packaged with a Naboo fish.

**Jar Jar Binks**
2009 | THE CLONE WARS/TCW BLUE

This first animated Jar Jar figure really does make him look like a bit of a goofy Gungan. In his first episodes, Jar Jar becomes an unlikely hero. He distracts the Senate representative of the Trade Federation long enough for vital resupply ships to leave Toydaria. Then, after Padmé is captured on Rodia, Jar Jar dons Anakin Skywalker's Jedi cape, which causes total confusion and helps save the day.

**Jar Jar Binks (Tatooine)**

**Jawa I**

1978 | STAR WARS/SW 12-BACK

The tiny Jawa was among the first of what has become a long line of major variations. Although planned to have a cloth cape, it debuted with a cheaper–and less attractive–vinyl cape. But selling at the same price as figures twice the size, it didn't fly off the shelves, so Kenner made a running change to a richer-looking cloth cape. Today, of course, a sealed mint-on-mint card vinyl-cape Jawa has become a holy grail for collectors, and the price can top $2,000! A cloth-cape Jawa? Not even a tenth of that.

**Jawa II**
1978, STAR WARS/SW 12-BACK

Richer-looking perhaps–but not worth anywhere near what the vinyl-cape Jawa fetches in today's market.

**Jawas I (with Glowing Eyes)**

A Whiphid Jedi, this is an all-new sculpt since nothing else comes remotely close! K'Kruhk also appears on the *Clone Wars* micro-series. The Jedi has had amazing staying power in the Expanded Universe, having survived Order 66 and numerous close calls after that. In Episode II, Fisto is always smiling—even while cutting down Geonosians in the arena battle. Perhaps that's because the man in the costume had started out on the set as a carpenter, and was so tickled to be part of a *Star Wars* movie that he could hardly believe he was on set and in costume. # Luke Skywalker

**Luke Skywalker**

1978 | STAR WARS/SW 12-BACK

As befits George Lucas's alter ego in the *Star Wars* saga, Luke was one of the first four figures issued, and through 2012, there were at least ninety different versions of the heroic farm boy–turned-Jedi (many more if you count sometimes minute variations). The entire action figure line is based on the 3¾-inch height of the Luke figure. An undetermined number of the initial figures sent to consumers as part of an Early Bird Kit redemption have a much-sought-after double-telescoping lightsaber coming out of his right arm: a very thin second tip that could be pulled out even farther. And from different factories came both blond- and brown-haired versions.

**Luke Skywalker (X-Wing Pilot)**

1979, STAR WARS/SW 20-BACK

While sold as Luke Skywalker, this figure could be just about any X-wing pilot because of its generic-looking face sculpt. The helmet is not removable.

**Luke Skywalker (Bespin Fatigues)**

1980, THE EMPIRE STRIKES BACK/
TESB 31-BACK

The face sculpt is the same as the original, although the figure is slightly taller. This also has blond- and brown-haired variations.

**Luke Skywalker (Hoth Battle Gear)**

1981, THE EMPIRE STRIKES BACK/
TESB 45-BACK

All of Luke's accessories are part of the figure mold except for the blaster rifle.

**Luke Skywalker (Jedi Knight Outfit)**

1983, RETURN OF THE JEDI/
ROTJ 65-BACK

Luke came with a blue lightsaber, then green. The cape had color and sewing variations.

**Luke Skywalker (in Battle Poncho)**

1984, RETURN OF THE JEDI/POTF 92-BACK

Under the removable cloth poncho that Luke wears to the battle on Endor is his molded black Jedi outfit.

**Luke Skywalker (Imperial Stormtrooper Outfit)**

1985, RETURN OF THE JEDI/POTF 92-BACK

Although the Stormtrooper disguise (and wet-head look) are from the 1977 film, this was one of the last vintage figures released.

**Luke Skywalker**
**(Grappling Hook Blaster)**
1995, STAR WARS/POTF2 RED

When actor Mark Hamill first saw this buff figure he chortled, "That's supposed to be me? I wish!"

**Luke Skywalker (X-Wing Fighter Pilot Gear)**
1995, THE EMPIRE STRIKES BACK/POTF2 RED

This is the flight suit Luke wears on Hoth and on his way to Dagobah. It is molded with the extra cold-weather jacket used in the film.

**Luke Skywalker**
**(Classic Edition 4-Pack)**
1995, STAR WARS/POTF2

This remade Luke has thicker eyebrows, less of a neck, and a much wider back-of-the arm slot for his lightsaber.

**Luke Skywalker (Dagobah Fatigues)**
1996, THE EMPIRE STRIKES BACK/POTF2 RED

Luke in Dagobah training clothes is the first figure in the revived action figure line that had never been made in the vintage line.

**Jedi Knight Luke Skywalker**
**(Removable Cloak)**

1996 | RETURN OF THE JEDI/POTF2 RED

This figure was first released with a tan-colored vest, but a running change was made to correctly color it black—causing an instant collecting frenzy for the tan ones! About 150,000 of the black-vested figures on *Star Wars* Trilogy Special Edition commemorative cards were given away at theaters across North America for the opening night of the *Jedi* Special Edition. They quickly commanded a price of $50 on the collector's market, but that excitement and premium price soon declined.

**Luke Skywalker**
**(Imperial Guard Disguise)**
1996, SHADOWS OF THE EMPIRE/SOTE

This is the outfit that Luke wears in the comic and video game versions of Shadows of the Empire to infiltrate Prince Xizor's palace.

**Luke Skywalker (with Desert Sport Skiff)**
1996, EXPANDED UNIVERSE/POTF2 RED DELUXE

Can sand-poor moisture farmers really afford a sport skiff? The deluxe figure has tan pants instead of the gray on the carded Luke.

**Luke Skywalker (Stormtrooper Disguise)**
1996, STAR WARS/POTF2 RED

Take one beefy Luke head, add one tweaked Stormtrooper figure, and you've got a guy who clearly isn't "a little short for a Stormtrooper."

**Luke Skywalker on Endor (with Speeder Bike)**
1997, RETURN OF THE JEDI/ POTF2 GREEN VEHICLE

Luke in his camo poncho and hat doesn't come as a carded single figure in the POTF2 line. He is only available with the speeder bike.

**Luke Skywalker (Hoth Gear)**
1997, THE EMPIRE STRIKES BACK/POTF2 GREEN

One of three similar figures of Luke in his cold-weather gear, this one is the simplest—no scars and no bendable legs.

**Luke Skywalker (Death Star Escape)**
1997, STAR WARS/POTF2 CINEMA SCENE

The Luke Stormtrooper carded figure was reposed with wider arms for this Cinema Scene with Han Stormtrooper and Chewie.

**Luke Skywalker (Princess Leia Collection)**
1998 | STAR WARS/POTF2 GREEN

Paired with a regal cloth-dress Leia, you surely remember Luke in his ill-fitting gold cloth ceremonial jacket? In the pre-production sample, the jacket was gold lamé. You'll notice that the stiff plastic of the ceremonial "medal" adds to the awkward look, since it's impossible to get it to sit on Luke's shoulders.

**Luke Skywalker Power F/X**
1997, RETURN OF THE JEDI/POTF2 GREEN

With a battery-operated lightsaber and long backdrop, Luke can hook up with Darth Vader, who originally attached to Obi-Wan for a battle aboard the Death Star.

**Luke Skywalker (Ceremonial Outfit)**
1997, STAR WARS/POTF2 GREEN

Up to this point, every Luke figure in the new line had the same head. To mark the first new sculpt, the package touted the "all-new likeness of Luke."

**Luke Skywalker (Purchase of the Droids)**
1998, STAR WARS/POTF2 CINEMA SCENE

Luke carries his macrobinoculars on his belt in the scene where he buys R2-D2 and C-3PO from the Jawas. The set includes the first Uncle Owen figure, also available carded.

**Luke Skywalker (with Wampa)**
1998, THE EMPIRE STRIKES BACK/
POTF2 GREEN CREATURE

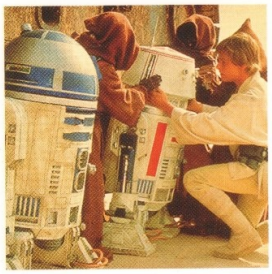

Besides the obvious injuries to his face, this Hoth Luke has a rotatable scarf that can be turned toward the ground when he hangs upside down in the wampa's cave.

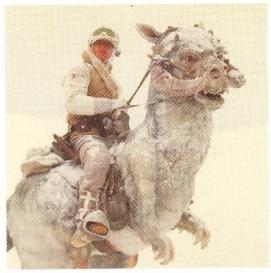

**Luke Skywalker (with Gunner Station)**

1998 | STAR WARS/POTF2 GUNNER STATION

This Luke figure wears a Stormtrooper belt and holster, a reminder of the recent escape from the Death Star. With communications gear molded to his head and the ability to bend at the waist, the figure is ready to be connected to Han Solo, who has his own *Millennium Falcon* gunner station chair. Each sold separately . . . of course!

1998, RETURN OF THE JEDI/
POTF2 COMPLETE GALAXY

Packed inside a globe of Tatooine with a sarlacc, this Luke Jedi figure—similar to four others—has unique legs for better balance.

**Bespin Luke Skywalker**

1998 | THE EMPIRE STRIKES BACK/POTF2 FREEZE FRAME

By 1998, Hasbro had ditched the bulky look and started releasing more realistically proportioned action figures. It came up with a mix of totally new figures and reissues of ones from the vintage line, such as this Bespin Luke. In addition to a more natural pose and more accurate costume, this Luke has a detachable right hand—the one he loses to Darth Vader's lightsaber on Cloud City.

**Luke Skywalker (Dark Empire)**
1998, DARK EMPIRE COMIC/POTF2 3D SCENE

Just by looking at this somber figure you can tell that Luke is in danger of being seduced to the dark side. The red lightsaber is an ominous touch.

**Luke Skywalker in Endor Gear**
1998, RETURN OF THE JEDI/POTF2 COIN

The Luke Endor figure that was packaged with the Millennium Minted Coin is substantially different from the Endor Luke that came with a speeder bike in 1997.

**Luke Skywalker (Final Jedi Duel)**
1998, RETURN OF THE JEDI/
POTF2 CINEMA SCENE

One of five similar Luke Jedi figures, this has unique blaster damage on his right hand, a different chest, and articulated legs.

**Luke Skywalker**
1999, STAR WARS/POTF2 FLASHBACK

Out of context, it looks strange. But this Luke comes with a healing bacta tank to save his life after the wampa attack.

**Luke Skywalker (X-Wing Pilot)**
2001, STAR WARS/POTJ

The most accurate Luke pilot figure to this point, this one comes with a removable X-wing pilot helmet.

**Luke Skywalker (Death Star Trash Compactor)**

2002 | STAR WARS/SWS SCREEN SCENE

After being dragged underwater and beneath garbage by a dianoga, Luke tries to recover with the help of his three other companions in two fit-together sets. Luke is packed with an equally messy and drenched-looking Han Solo, along with half a trash compactor diorama and the back half of a slimy dianoga, a snakelike creature.

2002, STAR WARS/SWS VEHICLE

This figure is virtually identical to the Luke that comes with his floppy hat on a POTF2 card, but this tunic is yellowed by "desert dust."

**Luke Skywalker (Bespin Duel)**
2002 | THE EMPIRE STRIKES BACK/SWS

A somewhat controversial figure, this portrays Luke before and after the lightsaber duel with his father, Darth Vader. His right hand is detachable and originally revealed a bloody stump that could be covered with a strange-looking tourniquet. But someone had second thoughts, and in a running change the red color was removed. The original magnet attachment was replaced by a plug-in

**Luke Skywalker (Throne Room Duel)**
2003, RETURN OF THE JEDI/SWS

Luke looks enraged as he breaks apart the Emperor's throne room aboard the second Death Star. The figure was first shipped with a gloved left hand before being corrected.

**Luke Skywalker (Hoth Attack)**
2004, THE EMPIRE STRIKES BACK/SWS

Luke can hang upside down (his hat scarf responds to gravity and flips) when joined with a separate wampa and ice cave.

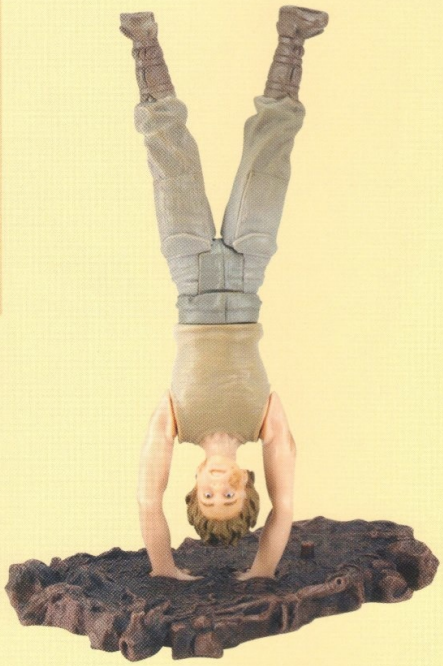

**Luke Skywalker (Jabba's Palace)**

**Holographic Luke Skywalker**

**Luke Skywalker (Dagobah Training)**

2004 | THE EMPIRE STRIKES BACK/OTC

One of the coolest Luke figures, the Jedi-in-training comes with two sets of heads and arms: one to do a handstand with his hair falling with gravity, and one for backpacking with tousled hair and arms in front to grasp a backpack for Yoda. The figure comes appropriately dirty.

**Luke Skywalker (Bespin Duel)**

2004, THE EMPIRE STRIKES BACK/OTC

This Luke Jedi is an all-new sculpt, although like other figures throughout the line it includes the wrong lightsaber—Obi-Wan's, in this case. Hasbro originally printed a photo on the card indicating that this was a Luke figure from Jabba's Palace. But because of the binders (handcuffs) and the lack of a cape, the company later changed the photo and the card name to "Endor Captive" Luke for the classic confrontation between father and son on the Forest Moon of Endor. The figure was shipped with two different versions of the small lightsaber hilt—with and without a peg. Luke comes with and without a peg hole at his waist.

**Mace Windu (Sneak Preview)**
1998 | THE PHANTOM MENACE/POTF2 MAIL-AWAY

To both promote the upcoming Episode I as well as clear stale action figures from store shelves, Hasbro came up with a "sneak preview" figure of Mace Windu. To get one, you had to cut six UPC symbols from action figures and have a register receipt showing that you had bought the figures between October 1 and December 31, 1998—plus a check or money order for $2.99. Hasbro reused the head, body, and lightsaber (the purple blade was yet to come) for an Episode I carded Mace figure.

A plain version of Mace, it comes with a circle of blue Force lightning that can be thrown around his shoulders. Squeeze his legs together and it pops off.

**Mace Windu (vs. Darth Sidious)**
2005, REVENGE OF THE SITH/ ROTS BATTLE ARENA

Mace fights with Sidious in the "battle arena" of the Sith Lord's office. Windu attaches to a circular base and "lightsaber" handles control movement of the antagonists.

**Mace Windu (Jedi vs. Separatists)**
2005, ATTACK OF THE CLONES/ ROTS BATTLE PACK

The Mace Windu in this five-pack uses a 2002 figure body and the head of a deluxe one. His purple-bladed lightsaber is Force-attracted to his palm.

**Mace Windu (Mace's Attack Battalion)**
2006, EXPANDED UNIVERSE/TSC BATTLE PACK

Mace leads a dedicated squad to protect Coruscant from a battle droid invasion during the Clone Wars. This is a rerelease but with a cloth cloak.

**Mace Windu (Jedi vs. Darth Sidious)**
2006, REVENGE OF THE SITH/TSC BATTLE PACK

A repack of a 2003 figure, this Mace "exit" figure comes with a cloth cloak and, of course, a lightsaber to do battle with Palpatine.

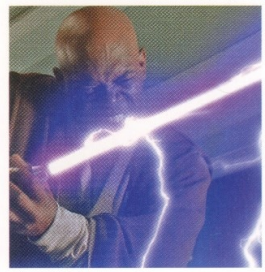

**Mace Windu**
2007, REVENGE OF THE SITH/TAC

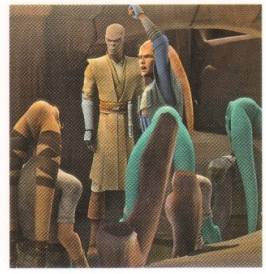

Mace is built out of parts from several previous figures with a new paint job, a new cloth cape, and Force lightning added.

**Mace Windu**
2009, THE CLONE WARS/TCW RED

Mace, an all-new animated figure from *The Clone Wars*, comes packed with partial armor: a clone helmet and shoulder and arm coverings.

**Mace Windu (vs. Battle Droid Commander)**
2009, ATTACK OF THE CLONES/

Mace is a major repaint from his 2007 release. His skin tone is darker, as are his boots and belt. His tan Jedi robes, however, are lighter and his shirt is now white.

**Mace Windu**
2010 | THE CLONE WARS/TCW BLUE SKIES

This Mace uses most of a 2009 figure but adds new legs and a soft-goods lower cape. The figure is packed with an "explosives-filled" Jango Fett helmet. That was planted by young Boba Fett in the hopes that it would blow up the man who had killed his father. Instead, Anakin Skywalker trips the explosion and both men are almost finished off by Boba.

**Mace Windu**
2011, ATTACK OF THE CLONES/TVC

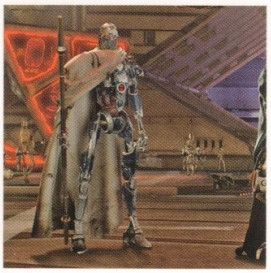

Mace is a repaint of a 2007 Windu figure, with an all-new head sculpt and a soft-goods skirt. The legs have also been repositioned.

**Machook (with Keoulkeech & Kettch)**

**Grievous's Bodyguard (MagnaGuard)**
2005, REVENGE OF THE SITH/ROTS

This is a gray repaint of the earlier Grievous's bodyguard in this same line—but since he had more than one, that's a good thing.

**MagnaGuard**
2008, THE CLONE WARS/TCW BLUE

This is the first MagnaGuard figure released for the CG animated series *The Clone Wars*. It is more angular-looking than figures from the movie version.

**MagnaGuard Droid (Battlefront II Droid Pack)**

TAC MULTIPACK

The IG-100 is a repaint of the 2005 Grievous Bodyguard without a cape or electrostaff.

**MagnaGuard (with Cape)**
2009, THE CLONE WARS/TCW RED

Based on the 2008 regular line figure, this MagnaGuard comes with a new head, legs, and imprinted soft-goods cape. It's repainted an off-white instead of dark silver.

**MagnaGuard**
2010, REVENGE OF THE SITH/TVC

An all-new, more realistic sculpt of a Magna-Guard, this figure comes with two weapons, a removable head wrap, and a tattered cloth cape.

**Major Bren Derlin**

2006 | THE EMPIRE STRIKES BACK/TSC

Does Major Derlin look familiar, but a bit out of place? Like maybe he would be more at home in a bar? The small part in *Empire* was played by John Ratzenberger, who went on to fame as Cliff Clavin in the TV series *Cheers*. It is Derlin who gives the order to close the base's massive blast doors for the night even though Han Solo is out in the cold searching for Luke.

**Major Mianda (Battle over Endor Set II)**
2011, RETURN OF THE JEDI/SOTDS MULTIPACK

Also known as Scythe One, this TIE fighter pilot is a repaint of a 2009 Imperial pilot. He supposedly flew in the Battle of Endor.

**Mandalorian Warrior**

**Mandalorian Warrior (Mandalorian Speeder)**
2010, THE CLONE WARS/TCW BLUE SKIES DELUXE

The warrior packed with a security speeder is a darker repaint of the basic figure.

## Mara Jade

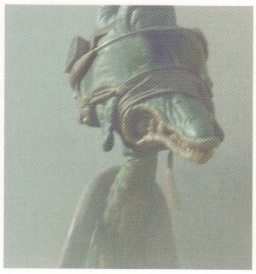

1998 | HEIR TO THE EMPIRE NOVEL/ POTF2 3D SCENE

Mara Jade became one of the best-known non-film characters in *Star Wars* after first appearing in the 1991 novel, and then in scores of other spin-offs. After she and Luke Skywalker marry, they have a son, Ben. She also takes on her niece Jaina Solo as a Jedi apprentice.

**Mara Jade (with Luke Skywalker)**
2007, HEIR TO THE EMPIRE COMIC/ TAC COMIC PACK

**Mars Guo (with Dud Bolt)**
2006, THE PHANTOM MENACE/TSC

How do you take a Podracer pilot seriously who looks like this and whose species is called Phuii? Clearly, you don't! A slight repaint was released with his flag in 2012.

**Mas Amedda**
2000, THE PHANTOM MENACE/POTJ

The vice chair of the Galactic Senate, Mas Amedda presides over the vote of no confidence in Chancellor Valorum, leading to the accession of Chancellor Palpatine.

**Mas Amedda (Republic Senator)**

2005 | REVENGE OF THE SITH/ROTS

Amedda comes with one of Hasbro's more unusual accessories, a long and removable snakelike split tongue used to express his agitation. The Senate's vice chair looks agitated even without it. At the top of his staff is a miniature of a statue of Sistros that is in the chancellor's office and hides Palpatine's lightsaber. Sistros was an ancient demagogue tied to Sith ways.

**Mawhonic**
2012, THE PHANTOM MENACE/TPM 3D DTF

This is the first-ever figure for this potbellied Gran Podracer pilot, who crashes after being smashed by Sebulba.

**Max Rebo**
1983, RETURN OF THE JEDI/
ROTJ PLAYSET

Max Rebo was a hit playing his red ball organ—the size of which made it impossible to package Max as a regular action figure.

**Max Rebo (with Doda Bodonawieedo)**
1998, RETURN OF THE JEDI/POTF2 2-PACK

The leader of the band in Jabba's palace, Max is an ace at the organ, included in the package. He was rereleased in 2007.

2007, EXPANDED UNIVERSE/TAC MULTIPACK

Gilamar, a Hasbro creation, uses parts from two different Jango Fett figures along with a new torso and legs.

**Modal Nodes (Cantina Band Member)**
2007, STAR WARS/TAC COMMEMORATIVE

All five figures in this tin-boxed set are repaints of the earlier figure, with added cloth scarves. They were packed individually for Walt Disney World on musical bases.

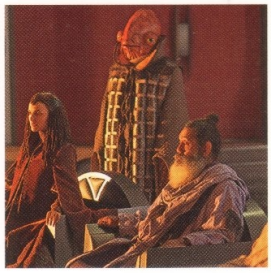

**Figrin D'an: Modal Nodes**
**(Fan Club Exclusive)**

1997 | STAR WARS/POTF2 MAIL-AWAY

Since this Bith cantina musician is playing the kloo horn, it must be Figrin D'an, leader of the Modal Nodes. But the Official Star Wars Fan Club packaged five different instruments in the box, so of course many collectors bought five sets so that they could replicate most of the band. Along with Figrin's horn came a bandfill, a fanfar, a fizzz, and an ommni box.

**Montross (Comic Packs)**

**Mon Mothma (Republic Senator)**
2005, | REVENGE OF THE SITH/ROTS

Armed with nothing but a baton and logic, Senator Mothma quietly begins to form what will become the Rebel Alliance. Mothma goes on to become the first Chief of State of the New Republic after the final defeat of the Empire following the Battle of Endor.

The all-new panning droid comes with a lava bucket, a lava base, and a repulsorlift platform like the kind Obi-Wan and Vader skip across.

**Mustafar Sentry**
2005 | REVENGE OF THE SITH/ROTS

This native Mustafarian uses a spinning energy bolt to protect the Separatist visitors. It was originally dubbed Flea Rider since it rides atop giant flea-like creatures. The Mustafarian sentries are handpicked by the Separatist leaders to guard their secret bunker on the volcano-filled planet with its lava rivers.

**Naboo Royal Guard**
2012, THE PHANTOM MENACE/TVC

**Nabrun Leids (Cantina Aliens)**

1998 | STAR WARS/POTF2 CINEMA SCENE

The four-armed conehead alien wears a gas mask and protective suit because he can't breathe anything except his home planet's methane. Nabrun, who is from Morseer, works for a warlord in the Quelii sector along with others of his species, but flees to escape bounty hunters. He ends up at a cantina on Mos Eisely and observes an old man looking for a pilot.

**Naboo Soldier**

**Nicanas Tassu (vs. Count Dooku)**
2010, ATTACK OF THE CLONES/LC RED
GEONOSIS ARENA

Tassu helps pass spare lightsabers to Anakin and Obi-Wan during the Geonosis Arena battle. The figure uses the body of a 2007 Mace Windu with a new head.

**Nien Nunb**
1997, RETURN OF THE JEDI/POTF2 GREEN

Nien Nunb got his name because the alien was number nine on the creature packing list. He was played both by an animatronic puppet and a man in a costume.

**Nien Nunb (B-Wing Pilot)**
2009, ROTJ/LC RED

Nunb is a repaint of a 2008 Ten Numb figure. This is supposed to be the character earlier in his life, before he copilots the *Falcon*. Some argue this should really be called Ten Numb.

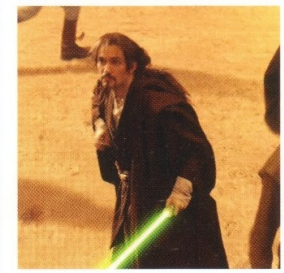

## Nien Nunb

2012 | RETURN OF THE JEDI/TVC

This is a new super-articulated version of the Sullustan pilot with a much more detailed sculpt, a working holster, and a sniper rifle. Yet it bears an amazing resemblance to the vintage 1983 figure. After the success at the Battle of Endor, Nunb becomes Han Solo's copilot on a mission while Chewbacca spends time with his family on Kashyyyk. After Lando Calrissian buys the spice mines of Kessel, he hires Nunb as its administrator. In *Jedi*, Nunb was both an animatronic hand puppet for cockpit close-ups and an extra in a full-body suit.

**Nikto**
1984, RETURN OF THE JEDI/
ROTJ 77-BACK

Several Niktos work for Jabba. One of them becomes an appetizer for the mighty sarlacc. This Nikto has yet to be given a name.

The Neimoidian tries to bluster his way through any crisis. In large part, he is following the secret orders of Darth Sidious. # Obi-Wan Kenobi

**Ben (Obi-Wan) Kenobi**

1978 | STAR WARS/SW 12-BACK

A wizard and mentor, Obi-Wan has many secrets. He shipped in gray and white hair variations, and a handful even had double-telescoping lightsabers. Kenobi is at the moral center of *Star Wars*. He has spent a large part of his life as a hermit on Tatooine, watching from a distance as Luke—the son of his onetime apprentice Anakin Skywalker—grows up and prepares to fulfill his destiny. Looked at in terms of classic mythology, Obi-Wan is the wise man, the mentor, and he starts young Luke on a hero's journey.

**Ben (Obi-Wan) Kenobi with Removable Cloak**

1995, STAR WARS/POTF2 RED

The look of this figure was not popular. But new *Star Wars* figures had been absent for so long that collectors started seeking errors. Packed with long lightsaber or short? Even short in a long tray! Those "important" distinctions have now faded into a distant memory.

**Spirit of Obi-Wan Kenobi**

1997, THE EMPIRE STRIKES BACK/ POTF2 MAIL-AWAY

The first of what has become a long line of translucent "spirit" or "hologram" figures, Obi-Wan was a mail-away offer from Frito-Lay to promote the 1997 release of the *Star Wars* Special Edition movies. It uses the basic sculpt of the new-wave Obi-Wan.

**Ben (Obi-Wan) Kenobi Power F/X**

1997, STAR WARS/POTF2 GREEN

The electronic Obi-Wan is bulky because of a battery pack in his back. He can be linked to Vader for a duel on the Death Star.

**Obi-Wan Kenobi (Naboo)**
1999, THE PHANTOM MENACE/EPISODE I

This version of Obi-Wan has a pliable plastic overcape and a lightsaber hilt. It uses the head, upper torso, and legs of the Obi-Wan Jedi Duel figure.

**Obi-Wan Kenobi**
1999, THE PHANTOM MENACE/
EPISODE I DELUXE

Like the Darth Maul and Qui-Gon Jinn deluxe figures, Obi-Wan comes with an attachable lightsaber handle that triggers a battle swing.

**Obi-Wan Kenobi (Jedi Spirits)**
1999, RETURN OF THE JEDI/
POTF2 CINEMA SCENE

The old Obi-Wan in this set is different from the 1997 mail-away Spirit of Obi-Wan figure because of the less translucent material.

**Obi-Wan Kenobi (Jedi)**
2000, THE PHANTOM MENACE/POTJ

Obi-Wan looks like he's wearing Qui-Gon Jinn's hand-me-down cape. He really does carry Qui-Gon's lightsaber after losing his own.

**Obi-Wan Kenobi (Jedi Knight)**
2000, THE PHANTOM MENACE/EPISODE I

Even though this figure is called "Jedi Knight," Obi-Wan is still wearing his Padawan braid.

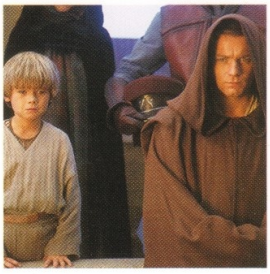

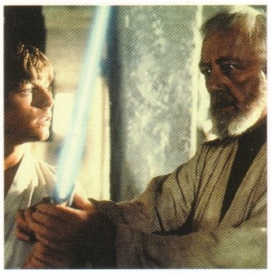

**Ben (Obi-Wan) Kenobi (Jedi Knight)**

2000 | STAR WARS/POTJ

After flirting with young Obi-Wan for a number of carded and pack-in figures, Hasbro went back to the well and added "Ben" to this figure's name to make sure everyone knew the difference. The figure tells a subtle story. In addition to having his own blue-bladed lightsaber, Obi-Wan's belt holds Anakin Skywalker's old lightsaber. He gives it to young Luke, saying, "Your father wanted you to have this."

This acrobatic toy comes with a launcher/landing platform and uses parts from a previous figure.

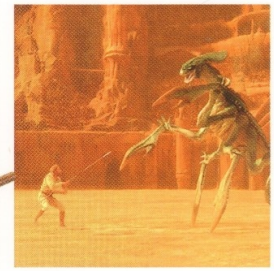

**Obi-Wan Kenobi**
**(Jedi Starfighter Pilot)**
2002, ATTACK OF THE CLONES/SWS

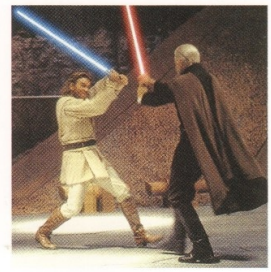

The main difference in this Obi-Wan figure is a new face with a headset as part of the mold. It also comes with a Jedi robe.

**Obi-Wan Kenobi (Acklay Battle)**
2003, ATTACK OF THE CLONES/SWS

When you press Obi-Wan's belt pouch, his arms move in a sideways action to thrust his spear into a threatening acklay that attacks him on Geonosis.

*Attack of the Clones*

**Obi-Wan Kenobi**
**(Outlander Nightclub Encounter)**
2003 | ATTACK OF THE CLONES/SWS

Obi-Wan uses the Jedi gesture of influence, or mind trick, to dissuade a drug dealer from selling his wares ever again. This head sculpt has been used numerous times. We see in the Outlander Nightclub scene that being a Jedi doesn't preclude someone from having a drink at the bar.

**Obi-Wan Kenobi**
2003, CLONE WARS/CLONE WARS ANIMATED SERIES

In a figure based on the *Clone Wars* micro-series, Obi-Wan looks like a Bronze Age warrior whose face is carved on an amphora.

**Obi-Wan Kenobi (Kamino Showdown)**
2003, ATTACK OF THE CLONES/SWS DELUXE

This complex figure uses a bellows and plastic tube to blow air through Kenobi's left palm to use "Force push action," sending a small piece of debris flying.

**Obi-Wan Kenobi (General of the Republic Army)**

General Kenobi mixes it up with the troops, as shown by his dirt-splattered outfit.

**Spirit of Obi-Wan (Dagobah)**
2004, THE EMPIRE STRIKES BACK/OTC

*Revenge of the Sith*

**Ben (Obi-Wan) Kenobi**
2004, STAR WARS/OTC VINTAGE-STYLE

**Obi-Wan Kenobi (Slashing Attack)**
2005, REVENGE OF THE SITH/ROTS

Obi-Wan has a leg-squeezing slashing attack and comes with two right hands, one with and one without a lightsaber. His hair and beard are unusually dark.

**Obi-Wan Kenobi (Duel at Mustafar)**

A bedraggled Obi-Wan feels he has no choice but to destroy Anakin after his erstwhile Padawan turns to the dark side.

**Obi-Wan Kenobi (with Pilot Gear)**
2005, REVENGE OF THE SITH/ROTS

It may look like a static figure, but under the cloak, pilot Obi-Wan has fourteen points of articulation and can easily fit into his starfighter cockpit.

*Revenge of the Sith*

**Obi-Wan Kenobi (Revenge of the Sith)**
2006, REVENGE OF THE SITH/TSC

A nicely modified figure; some extra paint has been added at the temples as a sign of aging. The figure also comes with an oversized cloth cape.

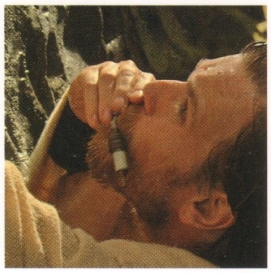

**Obi-Wan Kenobi (with Super Battle Droid)**
2005 | REVENGE OF THE SITH/ROTS DELUXE

Obi-Wan definitely needs a new tailor! But when you press the figure down, it executes a Force jump attack—*if* you release your hand quickly enough—and can smash the included super battle droid—*if* your aim is good enough. Hasbro often has to consider whether it is making a figure primarily for young kids—and thus needs to add play value even if it means making the figure look clunky—or making it for hard-core collectors. The latter group wants a figure as movie accurate as possible and usually with the most amount of articulation. Figures can be made to appeal to both groups, but it's not easy.

**Obi-Wan Kenobi (The Phantom Menace)**
2006, THE PHANTOM MENACE/TSC

This figure of Obi-Wan is a mix and match from at least three earlier figures: Naboo from 1999, and Jedi and Jedi Knight, both from 2000.

2007 | REVENGE OF THE SITH/TAC

This figure mostly retools one from 2005, but has a new head with an open mouth to fit the included rebreather, used to breathe underwater. He also has an electropole from one of General Grievous's defeated guards. When Obi-Wan's clones turn on him, a cannon shot misses him and he plunges into a lake at the bottom of a deep sinkhole—presumed dead.

**Obi-Wan Kenobi (with Baby Luke)**

2007 | REVENGE OF THE SITH COMIC/ TAC COMIC PACK

Repackaged older Obi-Wan and Bail Organa figures holding babies were originally sold exclusively at Walmart in separate blisters. In this comic pack, however, new figures of both men are included along with both babies and the pertinent issue of the Dark Horse comic. Baby Luke, originally in a yellow blanket, is now swaddled in blue, ready to be handed over to Owen and Beru Lars, Anakin Skywalker's in-laws, to be raised away from the turmoil at the center of the galaxy.

2008 | CLONE WARS/TLC BLUE

This is the "real world" version of the *Clone Wars* micro-series General Obi-Wan. This all-new figure's face has a very determined look. That's because Obi-Wan is again facing the powerful killing force known as Durge, a bounty hunter allied with Asajj Ventress. In the Battle of Muunilinst, an armored Kenobi leads a Lancer Battalion of specialized clone troopers on their 105-L lancer bikes, armed with Verpine power-lances, such as the one held by the figure above.

**Officer Cass (Death Star Briefing)**
2006, STAR WARS/TSC SCENE PACK

Cass, a communications officer, is a retooled figure using parts from Moff Jerjerrod and Admiral Ozzel along with a new head and a repaint.

**Oola (with Salacious Crumb)**

1998 | RETURN OF THE JEDI/POTF2 EXCLUSIVE

The vintage line had only one female character: Princess Leia in various costumes. That began to change with the new Hasbro line. The green dancing girl Oola from Jabba's palace was a figure long sought by fans. Most of the ill-fated dancer's fishnet-like costume is sculpted and painted as part of the figure, but real cloth is used where it billows from the knees down. The figure was an Official Fan Club exclusive.

**Oochee (The Battle of Endor)**
2007, RETURN OF THE JEDI/TAC BATTLE PACK

This Ewok warrior is a repaint of a 1998 Logray with a hood from Wicket. He comes with two spears.

**Oola (Jabba's Throne)**

Oola is an all-new figure. Her entire costume is string netting, and her slave collar has a string attached.

**Orn Free Taa (Senator)**

2002 | ATTACK OF THE CLONES/SWS

The corpulent appearance of the Senator from Ryloth is an outward manifestation of his decadent lifestyle. He's the one who nominates Palpatine to be Chancellor. Taa is accompanied everywhere by lithe and attractive female Twi'lek aides. He is an outspoken member of the Republic Senate's Loyalist Committee along with being one of the most greedy and corrupt senators in the entire body. He flaunts his wealth and power along with his weight, dressing in gaudy clothing and always calling attention to himself. The figure is packed with a Senate cam droid.

**Otoga-222 Pit Droid (with Ody Mandrell)**

**Owen Lars**
2009, ATTACK OF THE CLONES/TLC BLUE

This is an all-new figure of the young Owen Lars, who meets his brother-in-law Anakin Skywalker under less-than-happy circumstances.

**Uncle Owen (Purchase of the Droids)**

1998 | STAR WARS/POTF2 CINEMA SCENE

Considering that he plays such a memorable role in the first movie, it's a bit surprising that the first Owen Lars figure didn't arrive until two decades after the action figure line debuted. The original novelization of *Return of the Jedi* indicates that Owen is the brother-in-law of Obi-Wan Kenobi. It isn't until Episode II, with the introduction of young Owen Lars, that we learn he is really Anakin Skywalker's brother-in-law through his father Cliegg's second marriage to Anakin's mother Shmi.

**Owen Lars (with Darth Maul)**
2010, VISIONARIES COMIC/

**Queen Amidala (Theed Invasion)**
2001, THE PHANTOM MENACE/POTJ

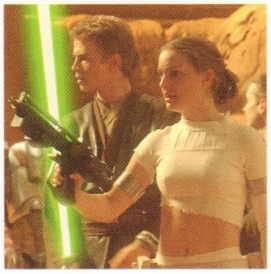

If your planet is going to be invaded, might as well dress for it! In the actual costume, the oval pieces near the bottom light up.

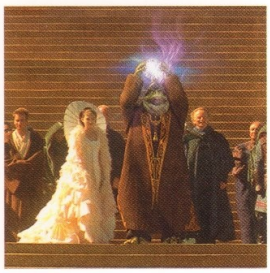

**Padmé Amidala (Queen's Royal Decoy)**

2001 | THE PHANTOM MENACE/POTJ

This is the Queen's decoy, or so we're told. But since George Lucas had Natalie Portman sometimes take the part of her own decoy in Episode I–and since no one supposedly could tell the difference–we're confused! Actually, the Queen in a handmaiden costume stood next to the handmaiden in the Queen costume in this scene. So it is the decoy in a magnificent costume, beautifully carried out in plastic. Kudos to amazing costume designer Trisha Biggar!

Disguised as a pilot, the Senator thwarts an assassination attempt, but her decoy handmaiden Cordé is not as fortunate. The figure has quick-draw action.

**Padmé Amidala (Droid Factory Chase)**
2003, ATTACK OF THE CLONES/SWS

The exciting chase scene through the Geonosis droid factory was added to Episode II at a relatively late stage of production. Amidala's plastic cloak billows out behind her.

**Padmé Amidala (Secret Ceremony)**
2003, ATTACK OF THE CLONES/SWS

As Episode II ends, Padmé and Anakin are wed by a Naboo holy man, a secret ceremony that has great consequences.

**Queen Amidala (Celebration Ceremony)**
2005, THE PHANTOM MENACE/OTC

This all-new figure again shows how well-made plastic clothing can often trump cloth at this size.

**Padmé Amidala (Lars's Homestead)**

2003 | ATTACK OF THE CLONES/SWS

Padmé accompanies Anakin to Tatooine, where he attempts to save his mother. This desert outfit is accompanied by a dark hooded robe to wear after sunset. It is here where Padmé sees a new and frightening side of Anakin, one she never expects. After he returns to the homestead with the body of his late mother Shmi, he breaks down in tears and confesses to Padmé that he has—in anger—slaughtered an entire Tusken Raider village—men, women, and children—where his mother was kept prisoner and died in his arms.

**Padmé (Republic Senator)**
2005, REVENGE OF THE SITH/ROTS

Snowbunny Padmé was so popular that Hasbro brought her back in a year, after the 2007 figure underwent a major upgrade, including additional articulation. Snowy Ilum is a sacred planet to the Jedi, since it is the main source of the crystals that power lightsabers. When Yoda senses a disturbance in the Force on Ilum, Padmé accompanies him there and helps rescue Luminara Unduli and Barriss Offee.

**Queen Amidala (Post-Senate)**

2012 | THE PHANTOM MENACE/TVC

Although this complex costume is seen only briefly on-screen, Hasbro has done an excellent job replicating it in plastic. This is also known as the Queen's "foreign residence" dress. She wears it as a guest in Senator Palpatine's expansive residence on Coruscant after addressing the Republic Senate on the invasion of Naboo. It is dark and somber, fitting her mood.

Dark Horse Comics started off its relationship with the *Star Wars* galaxy with a bang in 1991. *Dark Empire* eventually encompassed three series and fifteen total issues. The story line takes place six years after the action in *Return of the Jedi*. The Emperor's evil genius, it turns out, is not as dead as the galaxy thinks, and Luke Skywalker is drawn closer to the dark side.

**The Emperor (Throne Room)**
2003, RETURN OF THE JEDI/SWS

This sad-sack Emperor seems almost sorry to be killing Luke Skywalker with his Force lightning. He's about to become even sorrier when Darth Vader reacts.

2005, REVENGE OF THE SITH/ROTS

This, of course, is really Darth Sidious. He has a removable hood and he can fire his Force lightning bolt.

**Holographic Emperor Palpatine**

2004 | THE EMPIRE STRIKES BACK SPECIAL EDITION/ OTC EXCLUSIVE

This hologram figure is based on the Emperor's transmission to Darth Vader aboard the Star Destroyer *Executor*. In one of the few changes that George Lucas made to *The Empire Strikes Back* for a 2004 DVD release, the voice and image of the original Palpatine was replaced with that of Ian McDiarmid, who plays the role in *Return of the Jedi* and the prequels. **Palpatine (Lightsaber Attack)**
2005, REVENGE OF THE SITH/ROTS

Based on a 2005 figure with a new, extremely skull-like head sculpt and paint job, Palpatine also comes with a new plastic hood and cloth robe.

**Darth Sidious (Palpatine)**
2009, THE CLONE WARS/TCW RED

The animated version of Sidious, who up to this point had been seen only as a hologram, has his face mostly hidden and has only eight points of articulation.

**Darth Sidious (Palpatine)**
2010, REVENGE OF THE SITH/TVC

This is an all-new Darth Sidious figure. It comes with a brown cloth skirt, an unusual plush black jacket, and a plastic hood.

**Darth Sidious (Palpatine)**
2012 | EXPANDED UNIVERSE/TVC

This is a younger, pre-Episode I Sidious kit-bashed from two previous figures plus a new torso, skirt, and a head with brown hair. To see that head, you have to wrestle with a very tight-fitting plastic hood. Often, head and hood come off together.

The head of the nefarious Corporate Alliance has a name that could easily translate to "a bunch of money."

This is a repaint of the previous Argente, who pays the ultimate price for his greed on the fiery planet of Mustafar.

**Pax Bonkik (Rodian Podracer Mechanic)**

2007 | THE PHANTOM MENACE/TAC

This background Podracer mechanic is a repaint of a 2006 Greedo figure with a vest borrowed from a 2002 Han Solo (Endor Raid). Talk about irony! Pax and his brother Trax are slaves to Podracer pilot Mars Guo, a particularly harsh master. But things improve for them with the help of sympathetic racer Teemto Pagalies.

**Pilf Mukmuk (with Hondo Ohnaka)**
2009, THE CLONE WARS/TCW RED

What the galaxy needs is more jabbering Kowakian monkey-lizards like Salacious Crumb. Presenting Pilf, the non-articulated sidekick of pirate Hondo Ohnaka.

**Plo Koon (Jedi Master)**

2000 | THE PHANTOM MENACE/POTJ

This is the introductory figure for Plo Koon, a member of the Jedi Council who takes on an increasingly important role in the Clone Wars. He was inadvertently packed with a green-bladed lightsaber, not his blue movie version.

**Pit Droid III-B**
2008, THE PHANTOM MENACE/TAC SAGA LEGENDS 2-PACK

The white pit droid with dark green trim also comes molded in a sitting position.

**Pit Droid (with Ratts Tyerell)**
2012, THE PHANTOM MENACE/TVC

Packed with diminutive Podracer pilot Ratts Tyerell, this pit droid is yet another repaint of the original 1999 figure. A similar one is in a 2012 Mos Espa Arena multipack.

Poggle comes packed with Count Dooku (with a hologram of the Death Star) and San Hill, chairman of the Intergalactic Banking Clan. The box also includes half of a holographic battlefield table that shows the Battle of Geonosis progressing in real time. Poggle is a Techno Union representative and leading member of the Separatist Council. He has untold wealth at his disposal.

POTF2 FREEZE FRAME

An Official Fan Club exclusive, this hulking figure carrying a blaster and force pike is on Jabba's sail skiff with Luke Skywalker.

**Power Droid**

1979 | STAR WARS/SW 20-BACK

Fans have had fun with this background droid, nicknaming it Gonk for the alleged sound it makes, and spinning the story of *Star Wars* with Gonk at its center. In the movie, it is actually a costume worn by a little person. The power droids are essentially mobile field batteries, and can be seen practically everywhere in the galaxy.

**Gonk Power Droid (with Jawa)**
1999, STAR WARS/POTF2 COMMTECH

This is a new sculpt of a gonk or GNK power droid, which is like a large walking battery.

**Power Droid (with Treadwell Droid)**

# Princess Leia Organa

**Princess Leia Organa**

1978 | STAR WARS/SW 12-BACK

The only major female in the original trilogy, Princess Leia is also the only female action figure in the 93-character vintage toy line. But Leia is a powerful enough figure to fill the gender gap. For those who expect a "princess" to be a damsel in peril, Leia overturns expectations and becomes a model for strong women heroes in future action movies. Imagine Luke Skywalker's surprise after seeing a beautiful princess in a holographic projection, getting sucked in to the Death Star, risking death more than once, only to have the object of his dreams tell him, "This is some rescue!" We have to cut Luke some slack, since this is long before he realizes that Leia is his twin sister.

**Leia Organa (Bespin Gown)**

1980, THE EMPIRE STRIKES BACK/TESB 32-BACK

A matronly Leia? This first release has a flesh-color neck that was replaced by paint the color of the dress, giving Leia a quasi-turtleneck look.

**Leia Organa (Bespin Gown II)**

1980, THE EMPIRE STRIKES BACK/TESB 32-BACK

Not only was the neck no longer painted to match Leia's face; it's also narrower and straighter than the standard figure's neck, and the head sits awkwardly on top.

**Leia (Hoth Outfit)**

1981, THE EMPIRE STRIKES BACK/TESB 41-BACK

Leia comes with both light and dark brown hair in her cold-weather Hoth outfit. Most of the figures have red lips, but the yellow here may indicate . . . frostbite?

**Princess Leia Organa (Boushh Disguise)**

1983, RETURN OF THE JEDI/ ROTJ 65-BACK

Kenner fit a normal-sized Leia head into the bounty hunter headpiece without making the helmet too far out of proportion.

**Princess Leia Organa (Combat Poncho)**

1984, RETURN OF THE JEDI/ ROTJ 77-BACK

Leia's legs are made of a material pliable enough to sit astride a toy speeder bike.

**Princess Leia Organa**

1995, STAR WARS/POTF2 RED

Doomed forever to be known to fans as "monkey-face" Leia, the figure has a perpetual scowl. This is the first new Leia figure in the revived line.

**Leia (Boushh Disguise)**
1996, SHADOWS OF THE EMPIRE/SOTE

The second Leia in the new line was received by fans with more enthusiasm than the initial 1995 face sculpt.

**Princess Leia: Endor (Speeder Bike)**
1997, RETURN OF THE JEDI/POTF2 GREEN

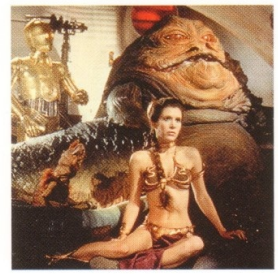

Leia sits on a speeder bike in her Endor outfit, so she doesn't have peg holes in the bottom of her feet like most other figures.

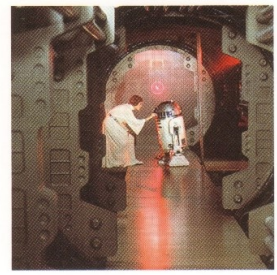

**Princess Leia Organa as Jabba's Prisoner**

1997 | RETURN OF THE JEDI/POTF2 GREEN

Female characters are usually sparse in action figure lines bought primarily by young boys. Part of that may be the nature of the roles and the basic look of the figures. But "slave Leia" bucked the trend. The figure is beautifully sculpted, and actress Carrie Fisher's costume is rendered in great detail. The figure does come with an unusual accessory: a prisoner chain with a neck collar.

**Princess Leia (Blockade Runner)**
1998, STAR WARS/POTF2 GREEN

Perhaps to atone for 1995's inglorious "monkey-face" Leia, Hasbro released four two-packs in a Princess Leia Collection in 1998. This is packed with an R2-D2.

**Princess Leia (Award Ceremony)**
1998, STAR WARS/POTF2 GREEN

This Leia figure, paired with Luke, is the first portrayal of either at the medal ceremony at the end of *Star Wars*. Luke comes with his medal.

**Princess Leia (Bespin)**
1998, THE EMPIRE STRIKES BACK/POTF2 GREEN

**Princess Leia (Endor Gear)**
1998, RETURN OF THE JEDI/POTF2 COIN

The Endor Leia in this minted coin sub-line is a different sculpt than the one included with a speeder bike. It has no articulated legs, for example.

**Princess Leia Organa (Ewok Celebration)**
1998, RETURN OF THE JEDI/
POTF2 FREEZE FRAME

This is a new sculpt and deco, setting this figure apart from the Princess Leia Collection.

**Princess Leia Organa (Hoth Gear)**

1998 | THE EMPIRE STRIKES BACK/POTF2 FREEZE FRAME

This Hoth Leia was supposed to be released in the Complete Galaxy series, but that was canceled. Next, it was going to be part of a cardboard 3-D display, but that got killed too. It was released through the Official Fan Club before finally being sold at retail. Leia helps establish Echo Base on Hoth after the Rebellion has to abandon Yavin 4. It's there that she begins to fall in love with Han Solo. Leia also helps coordinate the evacuation of Echo Base after the Empire discovers its location.

**Princess Leia**
1998, DARK EMPIRE COMIC/
POTF2 3D SCENE

This is the first action figure to portray Leia as a Jedi; she takes on the role to save her brother Luke from the pull of the dark side.

**Princess Leia (Mynock Hunt)**

POTF2 CINEMA SCENE

This version of the Princess from a three-pack differs in several respects from the last Hoth Leia. Her legs are posed differently, for example.

**Princess Leia Organa**
1998, STAR WARS/POTF2 FREEZE FRAME

"All New Likeness" Leia shows blaster skills. This is her outfit as a prisoner on the Death Star. The figure was rereleased in 2003 as "Imperial Captive" Leia.

**Princess Leia (Ceremonial Dress)**
1998, STAR WARS/POTF2 FLASHBACK

This is a complete resculpt from the earlier figure from the ceremony scene. This time, instead of Luke, the Princess is packaged holding the medal.

**Princess Leia**
2000, STAR WARS/POTF2 COMMTECH

Leia has a cloth skirt, but the rest of her clothing is molded. This is how we first see Leia at the start of *Star Wars*, fighting back against Vader's Stormtroopers.

**Leia Organa (General)**

2000 | RETURN OF THE JEDI/POTJ

Leia becomes a Rebel Alliance stalwart and is promoted to general by the Battle of Endor. This is the first figure of her in that role, with the rank insignia on her shoulder. There is very little background on Leia achieving the rank of general in the Rebellion, although it's clear even in *Empire* that she's part of the small team developing military strategy.

**Leia Organa (Bespin Escape)**
2001, THE EMPIRE STRIKES BACK/POTJ

After a daring escape from Darth Vader, Leia desperately attempts to stop Boba Fett from departing Cloud City with the captured Han Solo frozen in carbonite.

**Princess Leia (with Sail Barge Cannon)**
2001, RETURN OF THE JEDI/POTJ DELUXE

Princess Leia comes with a cannon that she turns against Jabba's barge to destroy it. A broken chain attached to her slave collar is her ultimate weapon against Jabba.

**Princess Leia (Swing to Freedom)**

Petite and pretty, but with twelve points of articulation and a blaster, this Leia Organa is an action hero. She comes with a cloth skirt.

**Holographic Princess Leia**

2004 | STAR WARS/OTC EXCLUSIVE

"Help me, Obi-Wan Kenobi. . . ." Princess Leia sparks Luke's attention for the first time as a holographic image. The figure itself was released four previous times as a non-hologram, the first one in 1998. This version was an exclusive at San Diego Comic-Con in 2004.

**Leia Organa (with Prince Xizor)**

2008 | SHADOWS OF THE EMPIRE COMIC/
TLC BLUE COMIC PACK

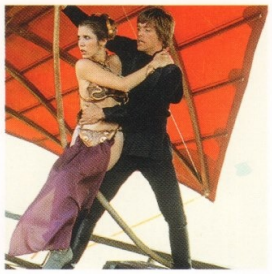

This is a new figure of a very glamorous Leia, who finds herself strangely attracted to Prince Xizor even as she tries to discover why he wants Luke dead. In fact, Leia is almost seduced by the crime lord (it's his pheromones!) until Chewbacca interrupts and explains to her what's happening. Then she knees Xizor in the groin.

2005, THE PHANTOM MENACE/
ROTS EVOLUTIONS

A small but very important aide to Darth Maul: he uses three flying Sith probe droids to track Qui-Gon and Padmé on Tatooine.

**Probot (with Turret)**

1981 | THE EMPIRE STRIKES BACK/TESB PLAYSET

The probe droid, or Probot, begs the question: what qualifies as an action figure? This spy droid, which pinpoints the Rebel Base on Hoth, was first part of a vintage playset with a Rebel turret and cannon. But in the revived line, it was introduced on a card, just like the figures. We've taken an inclusive approach because it's a droid and was carded. We've included the Max Rebo Band, first packaged in a box. But most creatures are excluded because of their size and packaging.

**Qui-Gon Jinn (Naboo)**
1999, THE PHANTOM MENACE/EPISODE I

This version of Qui-Gon comes with a pliable plastic cape and a lightsaber hilt to hang from his belt.

## Qui-Gon Jinn

1999 | THE PHANTOM MENACE/EPISODE I DELUXE

Not only does the deluxe Qui-Gon have a hair extension, he also has an attachable lightsaber handle that triggers a battle swing and moves his arms up and down. Qui-Gon Jinn is a loyal Jedi all his life, but also a true maverick who frequently finds himself at odds with the Jedi High Council. Perhaps that obstinate nature was somehow encouraged by his own Master, Count Dooku, who eventually turns to the dark side as Darth Tyranus. It is Qui-Gon who discovers the young Anakin Skywalker and insists that he could be the long-foretold "Chosen One."

**Qui-Gon Jinn (Tatooine Showdown)**

With a cloth poncho over his tunic, nobody knows Qui-Gon is a Jedi . . . or so we're told. The figure is similar to one packed with an eopie.

The first new sculpt of Qui-Gon in years, the figure comes with fourteen points of articulation and a cloth underskirt and hooded robe. **Qui-Gon Jinn (Jedi Master)**
2002, ATTACK OF THE CLONES/SWS

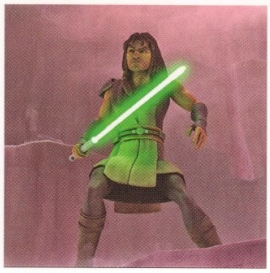

Qui-Gon is difficult to capture in 4-inch-tall plastic. His beard is either too dark or not dark enough, and his flyaway hair sometimes looks like paddles.

**Quinlan Vos (with Vilmarh Grahrk)**
2007 | REPUBLIC COMIC/TAC COMIC PACK

Vos is one of the EU's most popular characters. This is the first figure of the Jedi with an attraction to the dark side. Vos is a Jedi Master from the planet Kiffu. He has unusual powers that let him read "memories" from inanimate objects when touching them. His continuing struggle to keep the dark side at bay makes friends and enemies constantly question which side he's really on.

# R2-D2

## Artoo-Detoo (R2-D2)

1978 | STAR WARS/SW 12-BACK

The first Artoo figure is a bit disappointing, with a paper label instead of molded details and only two legs, but at least the shiny metallized dome (which isn't authentic to the film) clicks when turned. In Japan, Takara made a windup walking R2-D2, which ended up on a card only in Canada. Artoo and his droid companion C-3PO are the only ones to appear in just about their same form throughout the entire *Star Wars* saga. While Threepio's memory banks are wiped following the birth of Luke and Leia, Artoo maintains his knowledge and memory. In a way, the entire saga could be told from the intrepid astro-mech's point of view. He is also the one consistent hero throughout *Star Wars*, always getting his friends out of tough scrapes.

**Artoo-Detoo (R2-D2) with Sensorscope**

1982, THE EMPIRE STRIKES BACK/ TESB 45-BACK

Still sporting a paper label, this Artoo has a pop-up periscope the plucky droid uses after Luke's X-wing crashes in a Dagobah swamp.

**Artoo-Detoo (R2-D2) with Pop-Up Lightsaber**

1985, RETURN OF THE JEDI/POTF 92-BACK

In the film, Luke's lightsaber shoots out of Artoo into the Jedi's hands. For safety, this one rises slowly as the droid's head turns.

**Artoo-Detoo (R2-D2)**

1985, DROIDS/DROIDS

Like C-3PO, the animated version of R2-D2 uses the same basic sculpt as the movie action figure with pop-up lightsaber but simplifies the decoration.

**R2-D2 with Retractable Leg**

1995, STAR WARS/POTF2 RED

For the first time, Artoo's middle mobility leg can be lowered or raised into the body. Translucent plastic at the top lets light shine through to the droid's eye.

**R2-D2 (Artoo-Detoo)**

1997, STAR WARS/POTF2 GREEN

This Electronic Power F/X R2-D2 has Tatooine desert weathering. Press a button on its front and Artoo's red sensor lights up and he starts to beep and chirp.

**R2-D2 (All-New Features)**

1998, STAR WARS/POTF2 FREEZE FRAME

This version of the heroic droid comes with a spring-loaded pop-up scanner, a retractable scomp link (to plug into computer terminals), a grasper arm, and a circular saw.

**R2-D2 (Launching Lightsaber)**
1998, RETURN OF THE JEDI/POTF2 FLASHBACK

This ungainly Artoo with a huge middle leg had to be sculpted that way to include a lightsaber that can shoot up from the dome, just like in *Jedi*.

**R2-D2 (with Holographic Leia)**
1999, STAR WARS/POTF2 COMMTECH

The first R2-D2 to include a holographic Princess Leia, the rare initial version has circular foot pegs. That was later corrected to a half-circle peg.

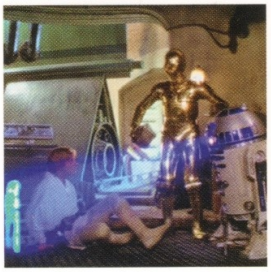

**R2-D2 with Booster Rockets**

1999 | THE PHANTOM MENACE/EPISODE I

With a twist of the dome and an upward push of the middle leg, R2-D2 reveals his booster rockets, something the astromech never shows in the original trilogy. An attempt to film him blasting off and soaring with practical effects on the soundstage in the United Kingdom was a comedy of errors as the droid turned into an accidental weapon.

This is a repainted, clean version of the 2000 R2-D2 Naboo Escape figure.

**R2-D2 (Droid Factory)**
2003 | ATTACK OF THE CLONES/SWS

This plucky astromech droid comes with a number of action features. To mimic R2-D2's escape from the droid factory on Geonosis, you push up his middle leg and out pop his side jets, to which you can attach plastic flames. To make Artoo seem to fly, you hold the top of the thin black tether and grab the gray plastic end below—and he ratchets up the string.

**R2-D2 (Dagobah)**
2004, THE EMPIRE STRIKES BACK/OTC

The dirtiest R2-D2 to date, the poor astromech has just been spit out of a Dagobah bog into a muddy grove. Hold down a button and hear Artoo scream.

**R2-D2 (Jabba's Sail Barge)**
2004, RETURN OF THE JEDI/SWS

An astromech bar? R2-D2 can probably strike it rich setting up a party business after his uncomfortable stint as a drink dispenser and server aboard Jabba's sail barge.

### Artoo Detoo (R2-D2)

2004 | STAR WARS SAGA/OTC VINTAGE-STYLE

R2-D2 can roll along the Tatooine dunes, plug into a Cloud City computer port, or saw through an Ewok capture net on the Forest Moon of Endor. His eye glows by natural light, and his center leg is removable along with one of his chest panels. If only the actual R2 units worked as well on set. Things got so bad in the Tunisian desert during the filming of the original *Star Wars*, that instead of using the droid's internal motor, it had to be dragged along by a hidden piece of rope. The units continued to have minds of their own throughout the filming of all six movies.

**R2-D2 (Droid Attack)**

2007 | EXPANDED UNIVERSE/
TAC MCQUARRIE SIGNATURE

Concept artist Ralph McQuarrie's explorations of R2-D2 involved a barrel-shaped droid from the start. This was a fan convention exclusive paired with C-3PO. Because of the droid's barrel shape, one of the few pieces of merchandise that George Lucas thought about while he was writing the *Star Wars* screenplay was a cookie jar in the shape of R2-D2.

**R5-D4 (Concealed Photon Missile Launcher)**

1996 | STAR WARS/POTF2 RED

One of the most elaborate figures produced to this point, R5 splits apart and launches a missile at the touch of the small yellow tab on the bottom left. On one version of the figure, the latch is straight; on the other, it's L-shaped. The attempt at making R5 look dirty comes off looking like spatter from a paintbrush.

**R5-D4**

**Rancor Keeper**
1984, RETURN OF THE JEDI/ROTJ 77-BACK

Emotionally involved with the rancor, the attendant at Jabba's palace actually cries when the beast's intended meal—Luke Skywalker—kills it instead.

**Malakili (Rancor Keeper)**

1997 | RETURN OF THE JEDI/POTF2 GREEN

The rancor keeper had gotten a name, a backstory, and a better sculpt by the time this second version of the figure was released. Malakili trains the ferocious rancor, ministering to its needs and eating meals with it. In the EU, after he learns of plans to pit his "pet" against a Krayt dragon, he plots an escape with the rancor—but the business with Luke Skywalker intervenes.

**Malakili (Rancor Keeper)**

**Rebel Commando (Episode VI Set)**
2006, RETURN OF THE JEDI/
TAC COMMEMORATIVE

Nearly twenty-five years later, the comparison to the vintage figure is startling. This is actually a repaint of a 1998 Endor Rebel Soldier with a new head and removable helmet.

**Rebel Commando**
2010, RETURN OF THE JEDI/TVC

Two years later, there's an even more amazing change: a mostly all-new figure with fourteen points of articulation, a cloth trench coat, and a removable helmet.

**Rebel Fleet Trooper**

1997 | STAR WARS/POTF2 GREEN

The Rebel fleet troopers don't stand a chance against Darth Vader's Stormtroopers. Their distinctive helmet was inspired by a World War II U.S. Navy Mark II "talker helmet." This first trooper was released at the end of Hasbro's "must be muscle-bound" figure era, and does not have much articulation.

**Rebel Commando**
2011, RETURN OF THE JEDI/TVC

The Rebel commando also comes as a black soldier with a head sculpt on loan from the 2006 Rebel Trooper (Endor Bunker) although retooled to fit on this body. All other parts are the same.

**Rebel Ground Crew (Scramble on Yavin)**

**Rebel Honor Guard I (Yavin)**
2007, STAR WARS/TAC

This is the first-ever honor guard figure. It has fourteen points of articulation and a new, removable helmet. A variation paints the Rebel's belt light brown.

**Rebel Honor Guard II (Yavin)**
2007, STAR WARS/TAC

In addition to the running change that turned the Honor Guard's belt brown, the visor on his helmet is now solid black, replacing the translucent visor of the initial run.

**Rebel Officer (with Darth Vader)**

**Rebel Soldier II (Endor)**

The alternate version of the Rebel soldier is clean shaven. Notice the blast effect from the blaster rifle.

**Endor Rebel Soldier**

1998 | RETURN OF THE JEDI/
POTF2 FREEZE FRAME

Replacing the vintage Rebel Commando, this figure takes advantage of more delicate paint masks and "pad" printing, so the design can be stamped onto uneven surfaces.

**Rebel Speeder Bike Pilot (with Speeder Bike)**
1998, EXPANDED UNIVERSE/POTF2 EU

The pilot and the included speeder bike are both based on concept sketches by famed ILM artist and designer Joe Johnston.

**Rebel Trooper (Tantive IV Defender)**

**Rebel Trooper II (Tantive IV Defender)**
2002, STAR WARS/SWS

The first militia that we see in *Star Wars* is defending the Rebel blockade runner. This figure has eleven points of articulation so that it can pose kneeling or standing.

**Rebel Trooper (Concept)**

2007 | EXPANDED UNIVERSE/
TAC MCQUARRIE SIGNATURE

Ralph McQuarrie's concept trooper looks like something from classic 1950s science fiction. The two-part helmet and the chest armor are removable. Since nothing is ever completely forgotten in the *Star Wars* universe, the McQuarrie version can be seen on a Rebel trooper in the 1987 *Star Wars:* Droids comic book series.

**Rebel Trooper I (Capture of Tantive IV)**

A repaint of the 2002 troopers, this is the first version with removable helmets. This trooper's hair is brown.

**Red Leader (with X-Wing Fighter)**
2004, STAR WARS/SWS VEHICLE

The heroic leader of Red Squadron, Garven Dreis, has the body of an earlier Luke X-wing pilot and the head of a Y-wing pilot, with a repainted helmet.

**Ree-Yees**
1983, RETURN OF THE JEDI/ROTJ 65-BACK

Ree-Yees is a partial anagram for "Three Eyes." In a brief scene, the alien covers C-3PO's mouth to shut him up.

**Ree-Yees**
1998, RETURN OF THE JEDI/
POTF2 FREEZE FRAME

This sculpt is both beefier and much more accurate than the vintage figure released fifteen years before.

**Ree-Yees (Star Tours Boarding Party)**

2010 | STAR TOURS/VINTAGE-STYLE STAR TOURS MULTIPACK

Ree-Yees is a repaint of the 1998 figure, but now comes with a three-eye, three-lens camera. This figure comes from a short pre-boarding film for the original Star Tours, where Ree-Yees can be seen using flash photography—strictly prohibited on the ride—and annoying other passengers, including Chewbacca.

**Representative Been**

**Romba**

1984 | RETURN OF THE JEDI/POTF 92-BACK

There were eight different Ewok figures produced for *Jedi*, even though none were separately identified in the movie. Romba is one of the first Ewoks from Bright Tree Village to fight against the Imperial invaders on the Endor moon. Romba is also one of the Ewoks who first finds the group of Rebel heroes caught up in the Ewoks' net trap.

**Romba (with Graak)**

## Emperor's Royal Guard

1983 | RETURN OF THE JEDI/ROTJ 65-BACK

Sometimes called the Imperial Royal Guard or just Imperial Guard, the protectors' uniforms stand out amidst the mostly muted colors of the original trilogy. The elite unit of guards is so important to the Emperor's safety that many details of the unit are classified as top secret. Even the number of guards is unknown, with guesses ranging from as few as fifty to tens of thousands.

**Emperor's Royal Guard**
1997, RETURN OF THE JEDI/POTF2 GREEN

The Emperor's last line of defense, the guards are known for their impressive costumes, not for any film action.

**Coruscant Royal Guard**
2000, THE PHANTOM MENACE/POTJ

The precursor to the Emperor's Royal Guard, these Republic Senate guards, with Centurion-like brush-top helmets, are well-trained soldiers.

**Royal Guard (Coruscant Security)**
2002, ATTACK OF THE CLONES/SWS

A completely new figure, this guard comes with a "vibro-active Force pike" with "electro effect."

**Royal Guard I (Senate Security)**

**Rum Sleg**
2009, THE PHANTOM MENACE/LC RED

You can catch a glimpse of bounty hunter Rum Sleg at the Boonta Eve Podrace. He has a skull-like face mask and white dreadlocks.

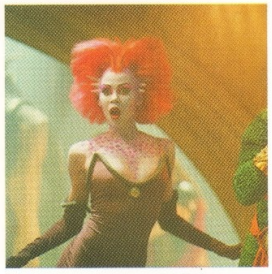

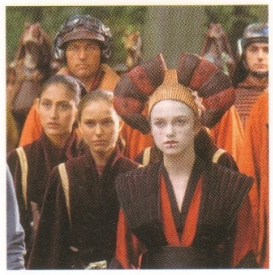

**RX-24 "REX"**

2002 | STAR TOURS/POTJ STAR TOURS

A defective droid that was supposed to be returned to the factory, REX becomes a captain aboard Star Tours. However, on his first trip to Endor he ends up everywhere but the Forest Moon—including the middle of a fierce battle between the Empire and Rebellion. Paul Reubens, aka Pee-wee Herman, provides REX's voice. Rex's opening dialogue sets the tone for the original Star Tours attraction: "Welcome aboard! This is Captain Rex from the cockpit. I know this is probably your first flight, and it's . . . mine too."

### Saesee Tiin (Jedi Master)

2001 | THE PHANTOM MENACE/POTJ

A member of the Jedi High Council, Master Tiin uses his telepathic mind to aid the Jedi. Tiin is from the moon Iktotch, a windswept body that toughens the skin of natives. He is a natural when it comes to flying starfighters, but rarely speaks and mostly keeps to himself—never taking on a Padawan apprentice. Tiin is one of the four Jedi who go to the Chancellor's office to arrest Palpatine when it becomes clear that he is a Sith Lord.

**Saesee Tiin (Jedi Master)**
2002, ATTACK OF THE CLONES/SWS

With a more active pose, this version is ready to use his Force energy and lightsaber to help rescue Jedi from the Geonosis arena.

**Saesee Tiin**
2003, CLONE WARS/CLONE WARS

**Saesee Tiin (Jedi vs. Darth Sidious)**
2006, REVENGE OF THE SITH/TSC BATTLE PACK

While this is basically a repack of the earlier carded figure, the addition of a well-made cloth cape really ups the ante.

**Salacious Crumb (Jabba the Hutt Playset)**

**Salacious Crumb (with Oola)**
1998 | RETURN OF THE JEDI/POTF2 EXCLUSIVE

Salacious, whose bizarre cackle is a great source of amusement to movie fans, has to amuse Jabba the Hutt at least once daily—or face death. Salacious is a Kowakian monkey-lizard whose shrill laugh and sadistic sense of humor scare most other beings—except his boss, Jabba. He also has a habit of playing disgusting practical jokes on the rest of the Hutt's retinue. More than a bit malicious, Crumb tries to rip out out C-3PO's photoreceptors and succeeds with one eye until R2-D2 shocks him.

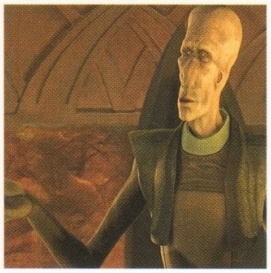

**Salicious Crumb (with Amanaman)**
2001, RETURN OF THE JEDI/POTJ DELUXE

**Tatooine Stormtrooper (Sandtrooper)**

1996 | STAR WARS/POTF2 RED

Surprisingly absent from the vintage line, this beefy soldier is the first of what is known commonly as a sandtrooper. The shoulder pauldron and the desert backpack differentiate him from a regular Stormtrooper, and he is given a dirty wash appropriate to his environment.

**Sandtrooper I (with Dewback)**
1997, STAR WARS/POTF2 GREEN

This sandtrooper differs from the carded version. There's the blue-gray pauldron, less dirt, changes to the backpack, and a new weapon: a battle lance to control the dewback.

**Sandtrooper II (with Dewback)**
1997, STAR WARS/POTF2 GREEN

A second version of the sandtrooper packed with the dewback emphasizes the sand part of the trooper with a nearly overall sand-colored spray deco.

**Sandtrooper (Cantina Pop-Up Diorama)**

The gray sandtrooper pauldron doesn't have an official ranking in the *Star Wars* mythos—but it's a nice variation!

**Sandtrooper I (Troop Builder)**

2003 | STAR WARS/SWS MULTIPACK

"Troop Builder" packages of three, four, or more figures have become very popular both for playtime and for fans who want to make dioramas of movie scenes or of their own devising. **Secret Apprentice**

2007 | THE FORCE UNLEASHED VIDEO GAME/
TAC EVOLUTIONS

The Force Unleashed is centered on Darth Vader's Secret Apprentice, once known as Galen Marek, the son of a slain Jedi. The story captivated even non-gamers since it purports to show how the Rebellion against the Emperor really starts, and allows a player to determine the apprentice's fate. His secret training by Darth Vader is almost harsher than any human can take. Under the code name Starkiller, he becomes Vader's personal assassin, following the Sith Lord's explicit orders. But the main task that Vader has in mind for Starkiller is to kill his own Master, Darth Sidious. (Also see: Galen Marek.)

**Shaak Ti (Jedi Master)**
2002 | ATTACK OF THE CLONES/SWS

This is the first figure of the Togrutan Jedi Master. She doesn't do much; it might have to do with how big her cloak is! Shaak Ti replaces Yaddle on the Jedi High Council after Yaddle is killed by a Dark Jedi. She helps lead a team of more than two hundred Jedi that storms the Geonosis arena to rescue Obi-Wan, Anakin, and Padmé in the first battle of the Clone Wars. Ti was filmed for two different death scenes in Episode III, once aboard General Grievous's ship and once in the Jedi Temple during Darth Vader's slaughter of the younglings. Neither worked, and the character was later killed off in the EU by Starkiller.

**Snaggletooth (Blue)**
1978 | STAR WARS/SW PLAYSET

Somebody goofed! When the first Snaggletooth figure was released as part of a Sears exclusive Cantina Adventure Set, the alien was depicted as tall and blue with gloved hands and high silver boots. But when the carded version was released the following year, the Snivvian creature was like the one in the film: short, red, and with exposed paws. This remains one of the strangest errors in thirty-five years of action figures.

Ralph McQuarrie's concept cold-weather trooper has added head, chest, and leg coverings, which remain in the final costume. **Stormtrooper**
1978, STAR WARS/SW 12-BACK

With its helmet sculpted as part of the torso, the Stormtrooper's head couldn't turn. Maybe that's why they were such bad shots!

**Crowd Control Stormtrooper**

1996 | EXPANDED UNIVERSE/POTF2 RED DELUXE

This is the same as the carded Stormtrooper except for weathering and a hole in its back to fit the galaxy's strangest crowd-clearing (or trash removal) device. The figure and device are just as strange as the same year's Han Solo with Smuggler Flight Pack. Perhaps a Stormtrooper could wear this contraption in a zero-gravity environment, but certainly not on Tatooine, Coruscant, or most other planets that we know about. Still, some kids somewhere must have had fun operating the flight-action thruster pack and the "capture claw."

**Stormtrooper with Blaster Rifle**
1995, STAR WARS/POTF2 RED

When compared to the original Stormtrooper figure, this version has a much more dynamic and action-oriented pose, even though it's too bulky up top.

**Stormtrooper with Battle Damage**

1996 | SHADOWS OF THE EMPIRE/SOTE

First shown in the *Shadows* comic, the swoop bike and a version of the trooper appear in the *Star Wars* Special Edition, scaring a ronto into dropping some Jawas. Tholme sets up a spy network with the help of Vos during the Clone Wars, and engages in sabotage. But Vos turns to the dark side and allies with Count Dooku. Tholme is eventually able to bring Vos back to the light side, and they both manage to hide out on Kashyyyk, escaping Order 66 and the Jedi purge that follows.

**Imperial TIE Fighter Pilot**

*Star Wars*

**TIE Pilot (Imperial Pilot Legacy II)**

2009 | STAR WARS SAGA/LC RED EVOLUTIONS

Based on the 2008 Biggs Darklighter as TIE Pilot figure, this version has a borrowed clone head and two gray "ace" stripes from the helmet lenses to the hoses. TIE pilots are the elite of the Imperial Navy, and usually top Academy graduates. They are fanatical supporters of the Emperor and their mission. They have to be, since their fighters have no combat deflector shields or integrated life support systems. That's why fellow Imperials refer to them as "coffin jockeys." Their mortality rate is extraordinarily high. This figure was repacked later in the year with a Target-exclusive TIE fighter.

**TIE Fighter Pilot (TIE Interceptor)**
2009, STAR WARS/LC RED

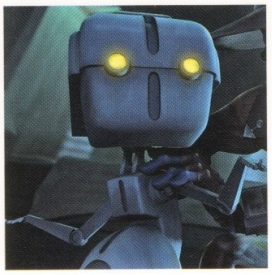

A virtual repack of the earlier 2009 TIE pilot, this space jockey doesn't have gray "ace" stripes on his helmet.

**Sand People (Tusken Raider)**

1978 | STAR WARS/SW 12-BACK

The tribal Sand People fascinated audiences from the start. Who are these desert nomads? How do they survive? For all their menace, how can Obi-Wan Kenobi, imitating the sound of a krayt dragon, scare them off? Some of their mysteries have yet to be revealed. The name of these fierce nomads later changed to Tusken Raiders. They are not human, but their species is undefined. They savagely raid human and alien settlements, riding banthas in single file to conceal their numbers. And they wield primitive but lethal weapons known as gaderffii or gaffi sticks. A rare variation of the figure has hollow tubes on the face.

**Tusken Raider Female (with Tusken Child)**
2002 | ATTACK OF THE CLONES/SWS

We had never seen a Tusken Raider family before Episode II. But it was important to the script to display Tuskens as having wives and children to add to the emotional wallop of Anakin's slaughter of an entire Tusken camp, where his mother Shmi had been held captive. This instantly iconic design was based on the vintage male Tusken costumes but given a new level of homespun beauty.

**Tusken Raider Child (with Tusken Female)**
2002, ATTACK OF THE CLONES/SWS

The Tusken child is a bit more protected from the hard desert environment. He fits comfortably into the backpack on the Tusken female.

**Tusken Raider (with Massiff)**

**Vlix**

1988 | DROIDS/DROIDS

Vlix is head of security for the Fromm crime gang, but there's another reason beyond a couple of animated appearances that the character has become infamous among collectors. Kenner had sculpted and was prepared to go into production with fourteen more figures from the animated *Ewoks* and *Droids* series, but low sales for the first nineteen figures killed those plans. But for some reason, Glasslite of Brazil, a Kenner affiliate, released Vlix as part of a handful of *Droids* figures in 1988. For some collectors, this strange character has become a holy grail.

The ultimate Ponda Baba comes with fourteen points of articulation, two interchangeable flipper hands, a jointed arm with detachable forearm—and even a bar glass. The two sets of arms are included with this version of Ponda Baba because of a continuity error in the original film. The Aqualish pirate's hands are finlike when attached, but in the close-up of the severed arm, the hand is clawed and furry. Also, although in every other case a lightsaber slash cauterizes a wound, there's a pool of blood on the floor near the arm.

*Return of the Jedi*

**Whorm Loathsom**
2009, THE CLONE WARS/TCW RED

A more perfect name couldn't be found for this nasty Separatist general who gets his comeuppance rather than a surrender from Jedi General Kenobi.

**Wicket (with Logray)**
1998, RETURN OF THE JEDI/
POTF2 FREEZE FRAME

Because the Ewoks are about half the size of other figures, Hasbro started packing two together for more perceived value.

**Wicket W. Warrick**

1984 | RETURN OF THE JEDI/ROTJ 77-BACK

The curious Ewok youngster makes first contact with Princess Leia, eventually leading the Ewoks and Rebels to join forces to defeat the Empire. Wicket's role is played by then eleven-year-old Warwick Davis. He was originally a background Ewok, but George Lucas liked his mannerisms and picked him for Wicket when Kenny Baker (R2-D2) came down with food poisoning.

**Wicket W. Warrick**
1985, EWOKS/EWOKS

Wicket looks a little overwhelmed in this version made for the animated *Ewoks* television series.

**Wicket**
2004, RETURN OF THE JEDI/OTC

This Wicket has been released twice before, but the deco of his torso and hood are different, as is the hood's color.

**Wicket**
2010, RETURN OF THE JEDI/TVC

Eight points of articulation in such a small figure! This new sculpt comes with Wicket's movie hood as well as the green hood from the *Ewoks* cartoon's second season.

**Widdle Warrick (The Battle of Endor)**
2007, RETURN OF THE JEDI/TAC BATTLE PACK

Widdle Warrick, Wicket's younger brother, is a repaint of a 1998 Wicket figure. They do bear a strong family resemblance!

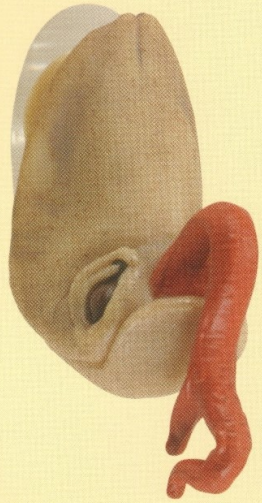

**Willrow Hood**
2009, THE EMPIRE STRIKES BACK/LC RED

A story spread virally among fans that this background character was carrying an ice cream maker as a prop. Hasbro has a sense of humor too.

**Wioslea**
2009, STAR WARS/TLC BLUE

Would you buy a used landspeeder from this Vuvrian? Luke sold Wioslea his after Ben Kenobi used a Jedi mind trick to help the sale along.

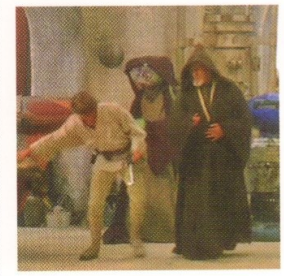

**Wol Cabasshite (Court Denizens)**
2004 | RETURN OF THE JEDI/SWS ULTRA

This bizarre alien sticks itself to surfaces in Jabba's palace and licks passersby. It's packed with other court denizens. In the EU, one of its species is a Jedi. Wol Cabasshite is actually the name of the species of sentients whose culture is structured around philosophy rather than technology. The alien in Jabba's palace is named Ghoel.

**Wookiee Warrior (Sneak Preview)**

**Wookiee Warrior (Attack on Kashyyyk)**
2008, THE FORCE UNLEASHED VIDEO GAME/TAC BATTLE PACK

The two Wookiees in this battle pack are repaints of the 2005 Sneak Preview figure and have new harnesses.

2008, THE FORCE UNLEASHED VIDEO GAME/TAC BATTLE PACK

This second Wookie warrior is a bit darker in color, and no less fearsome.

**Wooof (Klaatu)**
2010, RETURN OF THE JEDI/TVC

Often mistaken for Klaatu, this Jabba's Palace denizen was referred to as Wooof by the production crew.

**Wullf Yularen (Colonel, Death Star Briefing)**
2007 | STAR WARS/TSC SCENE PACK

Yularen stands out in a sea of gray uniforms on the Death Star as a colonel in Imperial Intelligence; the figure is retooled from two previous officers (Jerjerrod and Ozzel) with a new head. How amazing that we get to meet him as a "good guy" in *The Clone Wars*: another indication of the care that is given to tie the entire saga together.

**Wuher (with Droid Detector Unit)**
2000, STAR WARS/POTF2 COMMTECH

This loutish bartender of the Mos Eisley cantina is against admitting droids. He is alerted to their entry by a droid detector unit.

**Wuher (Mos Eisley Cantina)**
2004, STAR WARS/OTC SCREEN SCENE

The bartender is like the one that was going to be released in 2002 with a bar section before the sub-line got canceled. It reuses the figure from 2000 with a new right arm.

**Wullf Yularen (Admiral, Republic Navy)**
2009, THE CLONE WARS/TCW RED

Yularen is introduced at an earlier age in the animated series as an admiral in the Republic Navy and commander of Jedi Anakin Skywalker's fleet.

**Y-Wing Pilot (with Y-Wing Fighter)**

**Yaddle (Jedi High Council)**

**Yak Face**

1985 | RETURN OF THE JEDI/POTF 92-BACK

This camel-faced alien is the 93rd figure in the "Collect All 92!" promotion. He was never available in the United States, although apparently he was going to be part of a special mail-away offer. He was packaged on a 92-back bilingual card in Canada and on a Tri-Logo trilingual card in Europe.

**Yaddle (with Even Piell)**
2008, THE PHANTOM MENACE/TLC BLUE

# Yoda

**Yoda**

1980 | THE EMPIRE STRIKES BACK/TESB 32-BACK

The figure of the dimunitive Jedi Master seemed to change each time it was placed on a different backing card. Initially, as seen here, Yoda had a bright orange snake, cane, and even eyeballs. The snake became light and then dark brown, as did the cane and eyeballs. There were at least four different green hues used for Yoda's skin through the Power of the Force line. Yoda is the culmination of a magical mix of talent. Ralph McQuarrie did original concept work on the diminutive but powerful Jedi Master. Creature designer Stuart Freeborn sculpted the face based party on his own—and Albert Einstein. And the talented puppeteer Frank Oz, now a well-known director, gave Yoda his voice and made the puppet come alive.

**Yoda with Jedi Trainer Backpack**

1996, THE EMPIRE STRIKES BACK/POTF2 RED

Besides his gimer stick, or cane, Yoda comes with a plastic backpack to be used with Luke in Dagobah Fatigues to re-create scenes of Jedi training.

**Yoda**

1998, THE EMPIRE STRIKES BACK/
POTF2 FLASHBACK

A new Yoda sculpt with "realistic hair" on the back of his head comes with a boiling pot, his gimer stick (or cane), and a lamp.

**Yoda**

1998, THE EMPIRE STRIKES BACK/
POTF2 COMPLETE GALAXY

This Yoda, which comes with a flying bogwing inside a Dagobah sphere, has a somewhat darker paint job and more detailed sculpting in his robe than the similar carded figure.

**Yoda (with Jedi Council Chair)**

1999, THE PHANTOM MENACE/EPISODE I

The Episode I Yoda was a new puppet that had a larger face to fit all of the animatronics inside. No one liked it, and it was replaced by a digital Yoda. Here the "younger" Yoda looks like he has mustard plasters on his face; that's supposed to be hair.

**Yoda (Jedi Spirits)**

1999, RETURN OF THE JEDI/
POTF2 CINEMA SCENE

At 900 years, Yoda becomes part of the Force near the beginning of *Jedi*, only to return at the end as a spirit with Anakin and Obi-Wan.

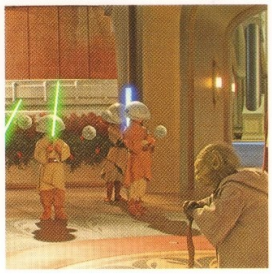

**Yoda (with Force Powers)**

2002, ATTACK OF THE CLONES/SWS DELUXE

Yoda's hand magnetically attracts his lightsaber, which he uses to topple the super battle droid on a diorama base that is included in the package.

*Attack of the Clones*

**Yoda (Jedi Master)**
2002, ATTACK OF THE CLONES/SWS

Yoda, while not eager to fight, doesn't shirk his duty either as he prepares to do battle with Count Dooku.

**Yoda (Jedi High Council)**
2002, ATTACK OF THE CLONES/SWS

Although this figure is mainly a repaint, it's a huge improvement over the Episode I Yoda. It also comes with a Council chair.

**Yoda (Padawan Lightsaber Training)**
2003, ATTACK OF THE CLONES/SWS

Yoda is packaged with Chian, one of the younglings he teaches at the Jedi Temple.

**Yoda**
2003, CLONE WARS/CLONE WARS

The "real world" version of the animated Yoda from the *Clone Wars* micro-series, he looks ready for some serious fighting.

**Yoda**

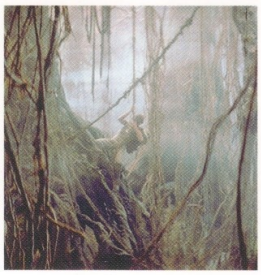

2003 | CLONE WARS/CLONE WARS

Yoda truly captures the unique animation style of the *Clone Wars* micro-series on Cartoon Network. It ran for twenty-five episodes over three years; the last season's episodes were about twelve minutes long, compared to three minutes each for the first two years. The series was the first introduction of Episode III's new archvillain, General Grievous.

**Yoda (Holiday Edition 2003)**
2003, EXPANDED UNIVERSE/SWS EXCLUSIVE

Yoda in a Santa suit with his bag of toys became an iconic figure when *Star Wars* concept artist Ralph McQuarrie painted him as the centerpiece of a Lucasfilm holiday card.

From Top:
*The Empire Strikes Back*
*Revenge of the Sith*

**Yoda (Dagobah Training)**
2004, THE EMPIRE STRIKES BACK/OTC

Yoda comes apart at the waist, but don't worry. His top half fits into Dagobah Luke's backpack for Jedi training.

**Yoda**

2004 | THE EMPIRE STRIKES BACK/ OTC VINTAGE-STYLE

This new sculpt of Yoda actually has legs for the first time. He's got ten points of articulation, a cloth cloak and skirt, a gimer stick (cane), and a pan flute around his neck. All that, and he's packed with a Dagobah snake, paying homage to the original vintage Yoda.

**Yoda (Firing Cannon)**
2005, REVENGE OF THE SITH/ROTS

Yoda comes with nine points of articulation, which makes it easier for him to fire a missile from the enclosed cannon.

**Yoda (Spinning Attack)**
2005, REVENGE OF THE SITH/ROTS

Yoda can be launched like a spinning top off his base toward Darth Sidious. He comes with both regular and lightsaber-holding right hands, a cane, and a detachable cloak.

**Holographic Yoda (Kashyyyk Transmission)**
2005, REVENGE OF THE SITH/ROTS EXCLUSIVE

The translucent Yoda holograph is based on the Yoda and Chian two-pack from 2003.

**Yoda (Fly into Battle!)**
2005, REVENGE OF THE SITH/ROTS DELUXE

Yoda doesn't look air-worthy in his fixed seated position, but he's perfect for mounting atop the included Kashyyyk can-cell.

**Yoda (Jedi vs. Sith)**
2005, REVENGE OF THE SITH/ROTS BATTLE PACK

The Yoda in this five-pack is a slight repaint—mainly the head and especially the eyes—of the figure packed with Chian.

**Yoda (Episode III Set)**
2006, REVENGE OF THE SITH/ TAC COMMEMORATIVE

Yoda celebrates Episode III in style with a new cloth cape.

**Yoda (with Kybuck)**

2007 | CLONE WARS/TAC

**Concept Yoda (with Concept Obi-Wan)**

2007, EXPANDED UNIVERSE/

The concept Yoda underwent many changes even after McQuarrie's final sketches. Creature Maker Stuart Freeborn evolved the head, adding a bit of himself–and Einstein.

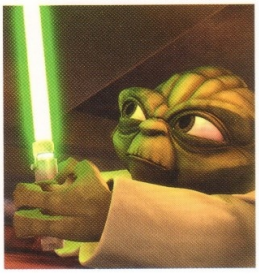

**Yoda**

My, what big eyes you have, Yoda! This is the first action figure of Yoda from the CG animated series.

Star Wars: The Clone Wars

**Yoda (Commemorative Tin Collection)**

2008, ATTACK OF THE CLONES/LC RED
GEONOSIS ARENA

Yoda is a repaint from a 2007 pack, with a new Jedi robe.

**Yoda**

2009, THE CLONE WARS/TCW RED

**Yoda (Ambush, with Clone Trooper Jek)**

2009, THE CLONE WARS/TCW RED 2-PACK

Yoda is a repaint of the 2008 *Clone Wars* figure. He still has too much hair, but it has been toned down a bit.

**Yoda**

2011, REVENGE OF THE SITH/TVC

Intense Yoda is back. While the torso has been modified from a 2007 version, it is basically all new with fourteen points of articulation. Yoda's hair is . . . yellow.

**Zam Wesell**
2002, ATTACK OF THE CLONES/

Zam Wesell comes across as a mystery woman in this heavily cloaked figure, but that's appropriate for a bounty hunter.

**Zam Wesell (Bounty Hunter)**
2002, ATTACK OF THE CLONES/SWS

This version of the bounty hunter is more articulated than the preview figure. She comes with a face mask that shows her true identity as a shape-shifting Clawdite.

**Zam Wesell**

This all-new Zam figure comes with an alternate Clawdite head, pulled-aside and covered veils, sniper rifle, and helmet. She has fourteen points of articulation.

**Zett Jukassa (Jedi Padawan)**

**Ziro's Assassin Droid**
2009, THE CLONE WARS/TCW RED
Ziro the Hutt's IG-86 assassin droid is a repaint of a similar droid from 2008.

## Zuckuss

1982 | THE EMPIRE STRIKES BACK/TESB 48-BACK

Yes, this is really Zuckuss. Because of some still-mysterious error, this bounty hunter's name was transposed with another, 4-LOM, and they were known that way for years. But when role-playing game maker West End Games pointed out that droids and not aliens used a number-letter naming system, Lucasfilm made the switch. Hasbro had the last laugh more than twenty years later when, as an homage, it released the two characters in the "wrong" packaging.

*The Empire Strikes Back*

**Zuckuss**
1998, THE EMPIRE STRIKES BACK/
POTF2 FREEZE FRAME
According to the EU, Zuckuss and 4-LOM join the Rebellion not long after accepting a mission to hunt down Han Solo.
